

REFLECTIONS ON COMMUNITY STUDIES

Manuel Calvino

Universidad de La Habana
Havana, Cuba

In this article, the author reflects on some of the limitations of the field of Community Psychology. The critical reflections offered focus on: (a) the sterile quality of the field's alternatives between offering paternalistic or utopian perspectives on how community processes operate; (b) the field's reliance on scientific objectivity and neutrality; (c) the field's ignorance of those who live in the community and the consequent presentation of "disembodied" communities; (d) the field's ahistorical and decontextualized treatment of community phenomena; and (e) the paradoxical nature of providing help to a community. © 1998 John Wiley & Sons, Inc.

As reflected in its title, my goal in writing this article is to share with my colleagues in community psychology my reflections about the field and the challenges that it confronts. In many respects, our field has taken upon itself a task considered by many as fruitless, if not impossible. That task, however, becomes increasingly important as the needs of those residing in many communities become ever more urgent. I understand that these reflections do not represent either popular or widely held views. Hopefully, those interested in the economic, sociopolitical, and psychological reality of what are defined as communities in Latin America will appreciate the salience of my comments regarding how we apply our expertise in interventions, in theory, and in research methods.

Readers will note that I have not focused my comments on my country, Cuba. I base this decision on several factors. First, I believe community psychology in Cuba has (to paraphrase the old saying) a long past but a short history. In stating this, I am distinguishing clearly between what the field can be, and what it has been, in Cuba. In some respects, the Cuban Revolution represented a community effort, that is, a sociopolitical

Vidich,1971 **Where Music Helps: Community Music Therapy in Action and Reflection** Brynjulf Stige,2017-07-05
This book explores how people may use music in ways that are helpful for them especially in relation to a sense of wellbeing belonging and participation The central premise for the study is that help is not a decontextualized effect that music produces The book contributes to the current discourse on music culture and society and it is developed in dialogue with related areas of study such as music sociology ethnomusicology community psychology and health promotion Where Music Helps describes the emerging movement that has been labelled Community Music Therapy and it presents ethnographically informed case studies of eight music projects localized in England Israel Norway and South Africa The various chapters of the book portray music s help in action within a broad range of contexts with individuals groups and communities all of whom have been challenged by illness or disability social and cultural disadvantage or injustice Music and musicing has helped these people find their voice literally and metaphorically to be welcomed and to welcome to be accepted and to accept to be together in different and better ways to project alternative messages about themselves or their community and to connect with others beyond their immediate environment The overriding theme that is explored is how music comes to afford things in concert with its environments which may suggest a way of accounting for the role of music in music therapy without reducing music to a secondary role in relation to the therapeutic that is being just a symbol of psychological states a stimulus or a text reflecting socio cultural content
