Reform In Great Britain And Germany 1750 185:

Materials of the Mind James Poskett, 2019-05-10 This is not only the first global history of nineteenth century science but the first global history of phrenology Phrenology was the most popular mental science of the Victorian age From American senators to Indian social reformers this new mental science found supporters around the globe Materials of the Mind tells the story of how phrenology changed the world and how the world changed phrenology This is a story of skulls from the Arctic plaster casts from Haiti books from Bengal and letters from the Pacific Drawing on far flung museum and archival collections and addressing sources in six different languages Materials of the Mind is an impressively innovative account of science in the nineteenth century as part of global history It shows how the circulation of material culture underpinned the emergence of a new materialist philosophy of the mind while also demonstrating how a global approach to history can help us reassess issues such as race technology and politics today

The Age of Cultural Revolutions Colin Jones, Dror Wahrman, 2002-01-08 This superb collection of essays brings together the most exciting new work in cultural and literary history Although the authors focus on the various cultural revolutions of the late 18th and early 19th centuries the significance of their investigations extends far beyond that moment They show how the major categories of modern social life took root in this era but they emphasize the surprising and often paradoxical ways those developments took place Nothing about the experience of class gender race nation sentiment or even death was pre ordained These essays will enable readers to take a fresh new look at the origins of modernity Lynn Hunt editor of The New Cultural History and coeditor of Beyond the Cultural Turn This is a valuable and provocative set of essays Differing markedly in subject matter they are linked by their intelligence and concern to reassess early modern English and French histories and the differences conventionally drawn between them in the light of current work on language class race and gender Linda Colley author of Britons Forging the Nation 1707 1837

Becoming a Physician Thomas Neville Bonner, 2000 Focusing on the social intellectual and political context in which medical education took place Thomas Neville Bonner offers a detailed analysis of transformations in medical instruction in the United Kingdom France Germany and the United States between the Enlightenment and World War II From a unique comparative perspective this study considers how divergent approaches to medical instruction in these countries mirrored as well as impacted their particular cultural contexts The book opens with an examination of key developments in medical education during the late eighteenth century and continues by tracing the evolution of clinical teaching practices in the early 1800s It then charts the rise of laboratory based teaching in the nineteenth century and the progression toward the establishment of university standards for medical education during the early twentieth century Throughout the author identifies changes in medical student populations and student life including the opportunities available for women and minorities

The Human Tradition in Modern Europe, 1750 to the Present Cora Ann Granata, Cheryl A. Koos, 2008 This engaging and humanizing text traces the development of Europe since the mid eighteenth century through the lives of people

of the time Capturing key moments themes and events in the continent s turbulent modern past the book explores how ordinary Europeans both shaped their societies and were affected by larger historical processes By focusing on the lives of individual actors both famous and obscure students can gain a sense for how the well known revolutions wars and social transformations of the modern era were experienced in private homes work places political forums and on battlefields throughout the region Fittingly the book opens with the French Revolution and concludes with the fall of the Berlin Wall and the collapse of Eastern European communism Throughout the contributors use compelling biographies to examine many of the major events and developments in European history including the age of reaction and revolutions in the early nineteenth century industrialization Victorianism new imperialism fin de si cle culture the first and second World Wars the Russian Revolution Italian fascism Nazism the Holocaust and decolonization Americanization and the 1968 youth revolts Contributions by Karin Breuer Helen Harden Chenut John Cox Stephen P Frank Cora Granata Maura E Hametz Michael Kilburn Cheryl A Koos Robert A McLain Karen Petrone Paolo Scrivano Alyssa Goldstein Sepinwall Matthew G Stanard Michele M Strong and Patricia Tilburg Pauper Voices, Public Opinion and Workhouse Reform in Mid-Victorian England Peter Jones, Steven King, 2020-08-08 This book represents the first attempt to identify and describe a workhouse reform movement in mid to late nineteenth century England beyond the obvious candidates of the Workhouse Visiting Society and the voices of popular critics such as Charles Dickens and Florence Nightingale It is a subject on which the existing workhouse literature is largely silent and this book therefore fills a considerable gap in our understanding of contemporary attitudes towards institutional welfare Although many scholars have touched on the more obvious strands of workhouse criticism noted above few have gone beyond these to explore the possibility that a concerted movement existed that sought to place pressure on those with responsibility for workhouse administration and to influence the trajectory of workhouse policy

From Jack Tar to Union Jack Mary A. Conley, 2017-03-01 Jack Tar to Union Jack examines the intersection between empire navy and manhood in British society from 1870 to 1918 Through analysis of sources that include courts martial cases sailors own writings and the HMS Pinafore Conley charts new depictions of naval manhood during the Age of Empire a period which witnessed the radical transformation of the navy the intensification of imperial competition the democratisation of British society and the advent of mass culture Jack Tar to Union Jack argues that popular representations of naval men increasingly reflected and informed imperial masculine ideals in Victorian and Edwardian Britain Conley shows how the British Bluejacket as both patriotic defender and dutiful husband and father stood in sharp contrast to the stereotypic image of the brave but bawdy tar of the Georgian navy This book will be essential reading for students of British imperial history naval and military history and gender studies Modern Britain, 1750 to the Present James Vernon, 2017-04-20 An introductory textbook charting a global history of modern Britain from 1750 to the present **Peaceful and Violent Origins of Voting Rights** Toke S. Aidt, Raphaël Franck, 2025 The Great Reform Act of 1832 was a pivotal moment in British

political development that opened the door of democratic reform entailing a slow and gradual journey to universal suffrage secret ballot and competitive elections But it could have failed In *Peaceful and Violent Origins of Voting Rights* Tokes Aidt and Raphael Franck articulate a new process based perspective on the study of democratization through a detailed analysis of the Great Reform Act of 1832 Instead of using the historical narrative to provide evidence of a particular theory the authors use microdata generated by the reform to test competing theories Aidt and Franck apply their approach to the Reform Bill through econometric analyses that draw on rich micro political data to show why the reform succeeded despite significant opposition at three different stages in both the House of Commons and the House of Lords as well as winning popular support in a general election While fears of revolution were critical in generating popular support for the Reform Bill in the 1831 General Election they argue that it was mainly extra parliamentary agitation from reform societies that helped the bill obtain its one vote majority in the House of Commons By viewing democratic reform as a process rather than as a single event the authors provide more nuanced answers to what caused the West to extend the franchise Further the book presents new insights into the underlying forces of democratisation processes

A History of Modern Germany Hajo

Holborn, 1982 A three volume reassessment of the last five centuries of German history *The Cambridge Social History of Britain, 1750-1950* F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians they have had no difficulty in finding their subject The difficulty rather is that an outpouring of research and writing is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of topical monographic research and presented an interpretation of the development of modern British society since 1750 from three perspectives those of regional communities the working and living environment and social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change
