Reform In Soviet Politics The Lessons Of Recent Policies On Land And Water:

Reform in Soviet Politics Thane Gustafson, 1981 This book examines the record of the Brezhnev regime in its only major domestic innovation the attempt to modernise Soviet agriculture Under Brezhnev the Soviets have invested more than half a trillion dollars in the countryside but the Kremlin has remarkably little to show for the effort The reason for the poor return Gustafson argues is that it is fundamentally flawed because it has been conducted along traditional Soviet lines For all its innovative features the agricultural programme resembles nothing so much as the Stalinist industrialising campaigns of the fifties The Soviets cannot afford another such reform Consequently the agricultural programme cannot stand as a model for meeting the complex problems the Soviets will have to deal with in the next twenty years Gustafson asserts that whatever solution they devise will depend on whether the Soviet political elite can develop resources and instruments of power more appropriate to the needs of a mature industrial economy But whether such changes are possible rests on fundamental questions about the essence of power in the Soviet regime

The Soviet Polity in the Modern Era Erik P. Hoffmann, Robbin Frederick Laird, *Soviet Science on the Edge of Reform* Harley D. Balzer, 2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist

Politics and the Soviet System Thomas F. Remington, 1989-06-18 This collection of essays focuses on topics pertaining to Soviet propaganda and policy making Among the essays there is a study of the view of international relations presented by Soviet TV news a survey of development in comparative communist studies and an analysis of recent changes

Ideas and International

Political Change Jeffrey T. Checkel, 1997-01-01 The end of the Cold War dramatically and unexpectedly transformed international politics toward the end of the 20th century At the heart of this change was the struggle over new and old ideas

Ideology and Rationality in the Soviet Model Kristian Gerner, Stefan Hedlund, 2022-02-13 First published in 1989 Ideology and Rationality in the Soviet Model assumes that since the October Revolution the development of the Soviet Union has essentially been a process of trial and error Economic rationality has been sacrificed to political expedients and the cultural sphere has been put to use as a legitimating and rationalizing device This book analyses the internal logic of this process from the 1917 Bolshevik Revolution to Gorbachev's revolution from above including coverage of the Stalin Khrushchev and Brezhnev eras The book focuses on the structural determinants of the Soviet Model thus seeking to reveal the specific rationalities that characterize Soviet man Its conclusion casts serious doubt on the likelihood of new policies defeating seven decades of Bolshevik rule and social indoctrination It will be of interest to students of economics political science and history

The Environment and World History Edmund Burke III, Kenneth Pomeranz, 2009-04-08 Since around 1500 C E humans have shaped the global environment in ways that were previously unimaginable Bringing together leading environmental historians and world historians this book offers an overview of global environmental history throughout this remarkable 500 year period In eleven essays the contributors examine the connections between environmental change and other major topics of early modern and modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more Rather than attributing environmental change largely to European science technology and capitalism the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world leading to intensified exploitation of land and water The wide range of regional studies including some in Russia China the Middle East India Southeast Asia Latin America Southern Africa and Western Europe together with the book's broader thematic essays makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history

The Third Revolution Harold Perkin, 2002-11-01 This volume examines the leading professional societies since World War II those in the free market economies of the United States Britain France West Germany and Japan and those in the collapsed command economies of East Germany and the Soviet Union It praises their achievements but also warns of the greed and corruption of their elites asking whether corruption rather than ideology caused the collapse of the Soviet Union and Eastern Europe and if Anglo American capitalism is likely to go the same way
