Reformed Administration In Lebanon:

Reformed Administration in Lebanon George Grassmuck, Kamal Suleiman Salibi, 1964 *Administrative Reform* GERALD E. CAIDEN, 2011-12-31 What is administrative reform How is it differentiated from other kinds of social reform Who are administrative reformers and how do they approach their task And who benefits and who suffers from it Does a theory of administrative reform exist A survey of published research on administrative reform reveals that satisfactory answers to these questions are handicapped by methodological and theoretical shortcomings There are no common definitions no agreement over content no selected boundaries no clear links with the wide phenomenon of social reform no firm hypothesis tested by empirical findings and no continuous dialogue between practitioners and theorists This book is the first comprehensive and systematic treatment of the subject for professionals and students in the fields of public and private administration It carefully examines the diverse interdisciplinary literature on the subject and identifies and develops the most promising approaches towards a unified theory Caiden shows how the study of administrative reform can contribute substantially to the development of administrative theory and constructs a working definition of the phenomenon of administrative reform distinguishing it from social change and from administrative change The practical use of this definition is tested by the analysis of various case histories of administrative cultures of different periods in history from which a common cycle of reform processes is discerned The author follows with a detailed examination of the processes themselves The book concludes with a discussion of the obstacles to reform and a review of the author's findings and conclusions **A Manual of Lebanese Administration. Critical examinations of efforts to make governments more efficient and responsive Political upheavals and civil wars in the Middle East and North Africa MENA have obscured efforts by many countries in the region to reform their public sectors Unwieldy unresponsive and often corrupt governments across the region have faced new pressure not least from their publics to improve the quality of public services and open up their decisionmaking processes Some of these reform efforts were under way and at least partly successful before the outbreak of the Arab Spring in 2010 Reform efforts have continued in some countries despite the many upheavals since then This book offers a comprehensive assessment of a wide range of reform efforts in nine countries In six cases the reforms targeted core systems of government Jordan s restructuring of cabinet operations the Palestinian Authority s revision of public financial management Morocco s voluntary retirement program human resource management reforms in Lebanon an e governance initiative in Dubai and attempts to improve transparency in Tunisia Five other reform efforts tackled line departments of government among them Egypt s attempt to improve tax collection and Saudi Arabia s work to improve service delivery and bill collection Some of these reform efforts were more successful than others This book examines both the good and the bad looking not only at what each reform accomplished but at how it was implemented The result is a series of useful lessons on how public sector reforms can be adopted in MENA
