Self-study and Inquiry Into Practice Linda Kroll, 2012 There are new pressures and familiar pressures on teacher educators to prepare teachers who will be able to teach successfully in a changing world and who will be able to change the world The question of how to prepare well qualified teachers has become an international question with global responses and consequences This book describes a stance and pedagogy for helping young teachers to be successful in the most challenging of circumstances Self study and Inquiry into Practice describes how inquiry can contribute to effective teaching in urban settings The use of inquiry and self study as a way of thinking about understanding and developing one's practice and one's teaching supports teachers continued inspiration and resilience enabling them to teach all children effectively in the face of very challenging circumstances Using rich examples and case studies of how pre service teachers and beginning teachers have used inquiry to learn from demanding urban placements Kroll shows the importance of using inquiry and self study in learning to teach and also in continuing to learn as one teaches Inquiry is a useful way to understand what students

understand and what they learn from our teaching self study reminds us of the power and responsibility we have to ensure that all our students achieve their highest potential This book aims to help teachers and teacher educators overcome the wash out effect of teacher education when teaching in challenging circumstances learn to ask questions and to pose questions to themselves learn to think about difficult theory in a way that will be useful to them in the moment make inquiry stance a habit of mind be empowered as experts in investigating and improving their own practice Being a successful teacher in urban schools takes a special kind of person one who has been thoroughly prepared and one who pays close attention to the learners she or he is teaching This book will be useful for both practicing teachers and teacher educators as they work together to craft excellent teacher education and teaching for all students adult and child It provides theoretical and practical ideas about how inquiry and self study can promote lifelong learning and resilience in the practice of one of the most challenging but rewarding professions

Employing Community-Based Experiential Learning in Teacher Education Gary Harfitt, Jessie Mei Ling Chow, 2020-07-18 This book positions itself at the intersection of the interrelationship between three key areas of initial teacher education constructivist learning theories teaching practicum and the promotion of reflective practices It presents an innovative approach to teacher preparation at undergraduate and postgraduate levels by critically examining the implementation of a mandatory experiential learning block across subject disciplines on undergraduate and postgraduate teacher preparation courses This book presents multiple examples and case studies of these varied experiential learning projects that will inform academics teachers and policymakers Through these rich examples the authors set out to address the theory practice dilemma in teacher education where teachers to be are often positioned as consumers of educational research in classrooms read reference books and academic papers on teaching and observe university and school experts before applying the same acquired theories and practices in their own classes In the book the authors argue for a shift away from this conventional teacher learning curriculum that is characterised by the separation of theory and practice choosing instead to promote pedagogy and methods courses where practice underpins all learning These pedagogical perspectives include the promotion of a diverse range of learning contexts including on and off campus learning sites for student teachers to experience during their time on teacher education courses
