Capital Flows, Financial Markets and Banking Crises Chia-Ying Chang, 2017-04-21 The increasing capital flows in the emerging markets and developed countries have raised various concerns worldwide One main concern is the impact of the sharp decline of capital flows so called sudden stops on financial markets and the stability of banking systems and the economy The sudden stops and banking crises have been identified as the two main features of most financial crises including the recent Asian Financial Crisis and Global Financial Crisis However how capital flows and banking crises are connected still remains unanswered Most current studies on capital flows are empirical work which faces various challenges The challenges include how data has been collected and measured in each country and how sensitive the results are to the data and the adopted methodologies Moreover the links between capital flows and banking systems have been neglected This book helps provide some insight into the challenges faced by empirical studies and the lessons of the recent crises The book develops theoretical analysis to deepen our understanding on how capital flows banking systems and financial markets are linked with each other and provides constructive policy implications by overcoming the empirical challenges

Financial Governance in East Asia Gordon De Brouwer, Yunjong Wang, 2004-08-02 The focus of international financial reform in recent years has largely been at the global level in terms of improving the international financial architecture and at the national level in terms of getting domestic economic and structural policies right But there is also a growing appetite for addressing some issues at a regional level This debate has focused on improving regional policy dialogue and surveillance processes as well as developing regional mechanisms to provide financial support to prevent and resolve financial crises In East Asia for example governments have sought deeper regional policy dialogue by the creation of ASEAN 3 forum and enhanced financial cooperation by setting up the Chiang Mai Initiative These developments raise many questions What is best practice regional policy dialogue How is a regional financial architecture complementary to the global architecture What sorts of institutions work well at a regional level Do regions need a regional monetary fund What is going on in East Asia and how is it different to other regions This volume brings together a range of policy practical and conceptual papers to explore these and other issues

Economic Globalization and Asia Ramkishen S. Rajan, 2003 The term OC economic globalizationOCO has been discussed extensively in the popular press by business executives and by policy makers all over the world While academic economists have made some excellent contributions to specific technical aspects of economic globalization there appears to be a need for economists to discuss the broader aspects of the issue in a more accessible manner Failing this the general debate will be informed only by the writings of non economists That is the motivation for this book which is a collection of essays on various aspects of economic globalization in general but with specific reference to Asia Contents Economic Globalization Finance Trade and Taxation Economic Globalization and Small and Open Economies Finance Trade and Taxation International Monetary and Financial Issues in East Asia International Capital Flows and Regional Contagion Boom and Bust in East Asia in the 1990s Liquidity Enhancing Measures and Monetary Cooperation in East Asia Rationale and Progress Choosing the Right Exchange Rate Regime for Small and Open Economies in East Asia International Trade Issues in Asia The Nexus Between Trade Liberalization and Poverty in Asia India s Decade Long Trade Reforms How Does It Compare with Its East Asian Neighbours with Rahul Sen Singapore s Drive to Form Cross Regional

 Werner,2005-03-21 Modern mainstream economics is attracting an increasing number of critics of its high degree of
 abstraction and lack of relevance to economic reality Economists are calling for a better reflection of the reality of imperfect
 information the role of banks and credit markets the mechanisms of economic growth the role of institutions and the
 possibility that markets may not clear While it is one thing to find flaws in current mainstream economics it is another to
 offer an alternative paradigm which can explain as much as the old but can also account for the many anomalies That is what
 this book attempts Since one of the biggest empirical challenges to the old paradigm has been raised by the second largest
 economy in the world Japan this book puts the proposed new paradigm to the severe test of the Japanese macroeconomic
 reality Commodity Prices and Markets Takatoshi Ito,Andrew K. Rose,2011-02-15 Fluctuations of commodity prices most
 notably of oil capture considerable attention and have been tied to important economic effects such as inflation and low rates
 of economic growth Commodity Prices and Markets advances our understanding of the consequences of these fluctuations
 providing both general analysis and a particular focus on the countries of the Pacific Rim The volume addresses three distinct
 subjects the difficulties in forecasting commodity prices the effects of exogenous commodity price shocks on the domestic
 economy and the relationship between price shocks and monetary policy The ability to forecast commodity prices is difficult
 but of great importance to businesses and governments and this volume will be invaluable to professionals and policy makers
 interested in the field Growth, Crisis and the Korean Economy Dongchul Cho,2015-03-02 Since the 2008 global financial
 crisis policymakers as well as academicians have been seeking to fathom why subsequent recoveries remain tenuous Other
 outstanding issues that they have been trying to understand include why do some economies grow faster than others How
 should the exchange rate volatility be understood and what factors make an economy more likely to fall into an exchange rate
 crisis What policies need to be taken during tranquil periods and how should they be changed once the crisis is triggered As
 a partial effort to meet such interests this book provides insights into these issues This book examines growth and
 convergence Part I exchange rate volatility and the Asian crisis Part II and the global crisis Part III In addition the book also
 draws lessons from South Korea s experiences a country which has undergone three different crises and brisk recoveries
 Part IV The book also includes some practical and policy oriented analysis This is a truly comprehensive book bringing
 together varied topics and diversity under one common theme economic growth and crisis *Capital Controls and Capital
 Flows in Emerging Economies* Sebastian Edwards,2009-02-15 Some scholars argue that the free movement of capital across
 borders enhances welfare others claim it represents a clear peril especially for emerging nations In Capital Controls and

Capital Flows in Emerging Economies an esteemed group of contributors examines both the advantages and the pitfalls of restricting capital mobility in these emerging nations In the aftermath of the East Asian currency crises of 1997 the authors consider mechanisms that eight countries have used to control capital inflows and evaluate their effectiveness in altering the maturity of the resulting external debt and reducing macroeconomic vulnerability This volume is essential reading for all those interested in emerging nations and the costs and benefits of restricting international capital flows **New East Asian Regionalism** Charles Harvie, Fukunari Kimura, Hyun-Hoon Lee, 2005-12-20 East Asian countries currently the most dynamic region of the global economy have recently pursued trade liberalization through the adoption of various forms of bilateral and plurilateral Free Trade Agreements FTAs The book explores the key issues and possible outcomes arising from this departure from the region s traditional multilateral approach to trade liberalization Implications of this new approach for the region as a whole and key participating individual economies and blocs of economies are emphasized
