**Regional Conflict and National Policy** Kent A. Price, 2013-11-26 First Published in 2011 This is Volume 9 of fourteen in a set of titles on Policy and Governance Resources for the Future is a non profit organization for research and education in the development conservation and use of natural resources including the quality of the environment The issues of conservation the environment and energy have enormous implications not only in terms of those issues specifically but also for regional conflict in the United States If we are to have any kind of resolution of these issues there must be a sense of equity that everyone is sacrificing equally If there is a perception of inequity then all of the ingredients are there for social unrest This volume explores this issue [Energy Abstracts for Policy Analysis](#) ,1985-07 **Local Politics and National**

**Policy** Ken Victor Leonard Hijino, 2017-04-28 This book is about why and how central and local governments clash over important national policy decisions Its empirical focus is on the local politics of Japan which has significantly shaped and been shaped by larger developments in national politics The book argues that since the 1990s changes in the national political arena fiscal and administrative decentralization as well as broader socio economic developments have led to a decoupling of once closely integrated national and local party systems in Japan Such decoupling has led to a breakdown of symbiotic relations between the centre and regions In its place are increasing strains between national and local governments leading to greater intra party conflict inter governmental conflicts and more chief executives with agendas and resources increasingly autonomous of the national ruling party Although being a book primarily focused on the Japanese case the study seeks to contribute to a broader understanding of how local partisans shape national policy making The book theorizes and investigates how the degree of state centralization vertical integration for party organizations and partisan congruence in different levels of government affect inter governmental relations Japan s experience is compared with Germany Canada and the UK to explore sources of multi level policy conflict Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Politics and Ideology in Canada** Michael Ornstein, Michael

Stevenson, 2003-02-18 Winner of the Harold Adams Innis Prize Politics and Ideology in Canada examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society Using class and ideology as key concepts Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981 The surveys cover an exceptionally broad spectrum of political issues including social programs civil and economic rights economic policy foreign ownership labour relations and language issues and sovereignty

A wide ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state But there was also widespread public alienation from politics Public opinion was quite strongly linked to class but not to party politics Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents State elites fell between these two though generally more favourable to capital The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs free trade privatization and deregulation

*Defining the National Interest* Peter Trubowitz, 1998-02-17 The United States has been marked by a highly politicized and divisive history of foreign policy making Why do the nation's leaders find it so difficult to define the national interest Peter Trubowitz offers a new and compelling conception of American foreign policy and the domestic geopolitical forces that shape and animate it Foreign policy conflict he argues is grounded in America's regional diversity The uneven nature of America's integration into the world economy has made regionalism a potent force shaping fights over the national interest As Trubowitz shows politicians from different parts of the country have consistently sought to equate their region's interests with that of the nation Domestic conflict over how to define the national interest is the result Challenging dominant accounts of American foreign policy making *Defining the National Interest* exemplifies how interdisciplinary scholarship can yield a deeper understanding of the connections between domestic and international change in an era of globalization

**Controlling Latin American Conflicts** Michael A. Morris, 2019-03-04 Latin America remains a turbulent region characterized by conflict and increased militarization despite the existence of regional juridical mechanisms for controlling disputes In this book scholars from both Latin and North America collaborate in presenting ten original approaches to containing and resolving conflict in the region Stressing the need to closely link contemporary approaches to conflict management with the Latin American legalistic tradition they examine a broad scope of mechanisms ranging from confidence building measures to arms control agreements This book is the first systematic attempt to survey arms control and to generate approaches for controlling conflicts in Latin America Ten original approaches to containing and resolving conflict in Latin America are developed in the successive chapters of this volume

*The Protective Tariff in Canada's Development* J.H. Dales, 1966-12-15 Canadian historians have always looked favourably on Macdonald's national policies including the protective tariff On the other hand the canons of economic theory have little or nothing to say in favour of protection Professor Dales attempts in these essays to bridge this gap between trade theory and the standard interpretation of Canadian development In the first three essays he is concerned with relaxing the rigorous assumptions of labour and capital immobility that characterize theoretical writings on international trade in order to make them more applicable to Canada for it must be recognized that large movements of labour and capital both into and out of the country have been one of the most important features of the Canadian economy

today The next three chapters discuss the probable historical effects of Canadian protection in the light of the modified theory Professor Dales makes statistical comparisons between the economic development of Canada and the United States in order to identify the main differences between the patterns of economic growth in the two countries and to throw light on the large and persistent gap between the Canadian and American standards of living The last two essays are in the nature of provocative squibs designed to break up some of the hard core conventional wisdom about the Canadian economy Although free trade versus protection has long been a dormant issue in policy discussions it never quite disappears from the scene Professor Dales persists in thinking that free trade with all countries and unilaterally if necessary is the best policy for Canada The controversial issues raised by these essays are of the highest importance not only to historians and economists but to all in any way concerned with the public policies of this country The book focuses our attention on a basic antinomy of Canadian life and thought that has been little recognized and by its stimulating analysis will help to form the shape of our continuing nation alysis Handbook of Regional Conflict Resolution Initiatives in the Global South Jeronimo

Delgado-Caicedo,2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People s Republic of China India Brazil or South Africa in the decision making process in today s world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives Discussing Conflict in Ethiopia Wolbert Smidt,Kinfe

Abraham,2007 This volume contains the papers presented at the Conference Ethiopian and German Contributions to Conflict Management and Resolution of November 2005 Addis Ababa The aim of this conference was to bring researchers and those working in the practical field of conflict resolution together before the background of renewed internal and international conflict Research in conflict resolution mechanisms is one of the most hopeful fields in modern social sciences Local conflicts can have devastating effects on the state and even involve the international level In turn international conflict can also destabilize society and create new local conflicts However local conflict resolution mechanisms could be of a great importance even within the international scene This volumes examines the experiences in Ethiopia and the impact the acquired knowledge could have for future conflict resolution and management Migration and Refugee Policies Ann Bernstein,Myron Weiner,2002-02-14 Migration and refugee movements are becoming increasingly prominent features of the millennial world Persistent disparities in wealth and job opportunities and continued political conflict and repression impel growing numbers of people to seek work and safely outside their own countries However many governments and their citizens remain reluctant to open their borders to foreigners For this reason in one country after another migration and refugee questions have become politically controversial creating the need for a sound understanding of policy options and their implications This book brings together five international scholars who survey key aspects of the international experience of migration and refugee policies In Part II drawing on the lessons presented by international experience a team of South African experts address the thorny migration and refugee issues confronting that country s new democratic government *The Dilemma of Regional Policy* Stilianos Alexiadis,2017-11-06 Applying the principles of Optimal Control Theory to the problem of regional allocation of investment can be a useful tool for demonstrating how the trade off between regional equity and overall efficiency can be overcome This book poses the following questions are spatial inequalities harmful for overall efficiency How is the economist to assist the policy maker in establishing generally applicable criteria or policies when the aims include equity as well as efficiency Alexiadis analyses the equity versus efficiency dilemma in the allocation of scarce resources expressing the argument in mathematical terms an issue of particular importance in development planning and programming This is invaluable reading for final year and postgraduate students of regional development and mathematical economics as well as researchers policy makers and all those working in regional development institutions **Economic Adjustment and Reform in Eastern Europe and the Soviet Union** Franklyn D. Holzman,1988 Economic reform structural adjustment macroeconomic stabilization and participation in the world economy are interconnected aspects of the same issue the long term economic viability of centrally planned economies in the rapidly changing economic environment of the modern world Any economic strategy that focuses on only one or two of these aspects at the expense of the others is likely to fail yet even strategies that build on all of these bases may well fail unless political leaders can muster exceptional skill garner international support and enjoy some good luck The contributions to this volume

reflect the recent research on this issue by various specialists on the economies of the Soviet Union and Eastern Europe Each author emphasizes macroeconomic stabilization structural adjustment participation in the larger world economy or economic reform

The Invisible Wall of China Mohit Nayal, 2012-09-01 The disintegration of Soviet Union in 1991 led to five new countries gaining independence in Central Asia The Muslims a predominant majority in the region had faced religious suppression under the rule of the communist Thus began an era where Islam was practiced with larger freedom However the governance of most of these states was with the autocratic leaders who had grown under the influence of communism Therefore it was but natural for them to soon impose religious restrictions This close tussle in almost all these newly raised states led to emergence of some radical groups Over the years the influence of such groups has spread to the extent of posing a threat to the stability of country like China A foothold for radical groups in China is a possibility as its western province of Xinjiang has historical links with Central Asia and was part of Turkistan Today Xinjiang due to its ethnic violence between the Uyghur Muslims and the Han Chinese is acknowledged to be quite volatile The link of Uyghur s with Central Asia has further compounded China problem Apart from the extremists China is also concerned regarding the growing American presence within the region of Central Asia To negate the American influence and restrain any turbulence on its western province supported by the extremist of Central Asia there is a need for China to review its external and internal policies which will steer it towards a more politically and economically stable nation Failing to addresses such simmering issues the nation will be trapped within the folds of THE INVISIBLE WALL OF CHINA

**The Relational Economy** Harald Bathelt, Johannes Glückler, 2011-06-23 How are firms networks of firms and production systems organized and how does this organization vary from place to place What are the new geographies emerging from the need to create access and share knowledge and sustain competitiveness In what ways are local clusters and global exchange relations intertwined and co constituted What are the impacts of global

changes in technology demand and competition on the organization of production and how do these effects vary between communities regions and nations This book synthesizes theories from across the social sciences with empirical research and case studies in order to answer these questions and to demonstrate how people and firms organize economic action and interaction across local national and global flows of knowledge and innovation It is structured in four clear parts Part I Foundations of Relational Thinking Part II Relational Clusters of Knowledge Part III Knowledge Circulation Across Territories Part IV Toward a Relational Economic Policy The book employs a novel relational framework which recognizes values interpretative frameworks and decision making practices as subject to the contextuality of the social institutions that characterize the relationships between the human agents It will be a valuable resource for academics researchers and graduate students across the social sciences and practitioners in clusters policy

Navigating a Changing World Geoffrey Hale, Greg Anderson, 2021-04-07 The negotiation of the Canada U S Free Trade agreement in 1985 88 initiated a period of substantially increased North American and later global economic integration However events since the election of Donald Trump in 2016 have created the potential for major policy shifts arising from NAFTA s renegotiation and continuing political uncertainties in the United States and with Canada s other major trading partners Navigating a Changing World draws together scholars from both countries to examine Canada U S policy relations the evolution of various processes for regulating market and human movements across national borders and the specific application of these dynamics to a cross section of policy fields with significant implications for Canadian public policy It explores the impact of territorial institutions and extra territorial forces institutional economic and technological among others on interactions across national borders both within North America and where relevant in broader economic relationships affecting the movement of goods services people and capital Above all Navigating a Changing World represents the first major study to address Canada s international policy relations within and beyond North America since the elections of Justin Trudeau in 2015 and Donald Trump in 2016 and the renegotiation of NAFTA

**Examining International Land Use Policies, Changes, and Conflicts** Hasnat, G. N. Tanjina, Hossain, Mohammed Kamal, 2020-11-06 Though conflicts continue to arise over land use and land cover changes the conversion of forest land to cropland or other land uses such as housing and urban development have been on the rise in recent years Decisions regarding land use and land cover influence climate change as well as various natural processes While proper changes can minimize the effects and speed of climatic changes the continued adverse changes may be accelerating the deterioration of the world s condition Examining International Land Use Policies Changes and Conflicts presents the latest research on the present status of land use and land cover changes throughout the world in order to determine appropriate land use policies that can protect earth s present and future condition The findings of the studies investigate the conflicts behind the land tenure and land uses in different countries of the world and examines existing policies and the reasons behind changes in them Ultimately the book provides readers with knowledge on how land can be managed in a
