Global issues are emerged due to the advent of internationalization and interdependence processes. There is a number of global issues prevailing world-wide. The present research paper tries to explore the three way classification of global issues such as inter social, natural social and anthropo-social global problems that may occur as a result of different circumstances. Issues related to Inter-social global are associated to war and peace whereas natural social global problems are related to environmental problems, energy issues, global lack of food, the climate change etc. Global issues such as health care, human rights, education, urbanization etc are classified under anthropo-global issues. This study made an attempt to measure the impact of regional civil protection on the under-research global issues. The major objective of the study is to understand and explore the nature as well as the typology of global concerns. The discussion of this study is based on detailed literature review. This research paper aims to discuss the necessary recommendations that will come as solutions of the under study global issues as well as the role of civil protection in the development policies.
