Regional Inequality And Structural Changes:

Regional Inequality and Structural Changes Eduardo A. Haddad, 2018-10-26 Published in 1999 The liberalization process in Latin America during the 1990s resulted in the increase and diversification of trade in the region Brazil as a major player strengthened its insertion into the world economy through the adoption of strategies for opening up markets and of new production technologies complemented more recently by the creation of a broadly based stabilization plan In this context issues related to structural changes in the economy such as those involving the complexity of new international trading agreements and their impact on the Brazilian economy warrant special attention The results of this study suggest that the interplay of market forces in the Brazilian economy favour the more developed region of the country *Regional Inequality and Structural Changes in the Brazilian Economy* Eduardo Amaral Haddad, 1998 *Growth, Structural Change and Regional Inequality in Malaysia* Asan Ali Golam Hassan, 2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality *Regional Inequality and Development* Takahiro Akita, Mitsuhiko Kataoka, 2022-07-14 This book addresses three main issues in regional income inequality and development meaning of regional inequality measurement of regional inequality and the relationship between national economic development and regional income inequality It provides analytical methods useful in exploring the determinants of regional inequality in income and productivity Some software commands in Stata statistical software package available for the measurement and analysis of income inequality are also introduced Some researchers have argued that spatial concentration of population in and around major cities and the concurrent increase in regional inequality do not hinder national economic development and may stimulate it Nevertheless many national governments seek to promote balanced regional economic development and reduce regional income inequality because unbalanced development and higher levels of regional inequality may cause political or ethnic conflicts between different regions of the country As the applications of the analytical methods introduced in the first part of the book the second part presents four independent empirical studies on regional inequality and development in Indonesia They offer very interesting case studies for the formulation of policies and programs to reduce regional inequalities because as the world's largest archipelagic country with more than 13 thousand islands and 300 ethnic groups Indonesia is

spatially diverse in terms of its ecology natural resource endowments economy ethnicity and culture This book can be used as a textbook for undergraduate and graduate students who are interested in national economic development and regional income inequality It is also beneficial for practitioners and policy makers who are in charge of the formulation

implementation and evaluation of development policies and programs **Regional Inequality in Transitional China** Felix Haifeng Liao,Yehua Dennis Wei,Li Huang,2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition Regional Inequality in Transitional China will appeal to scholars and students of geography economics and Chinese studies more broadly

Openness, Economic Growth and Regional Disparities Yanqing Jiang,2013-11-29 Substantial disparities across different Chinese regions are one of the most prominent features in China s development process This book investigates the mechanisms through which openness affects regional economic growth and interregional disparities in China Based on the latest data and employing a variety of panel data regression techniques it provides readers with new findings that shed light on the effects of openness on China s regional economic growth and the evolution of the country s interregional disparities

Regional Disparities in Small Countries Daniel Felsenstein,Boris A. Portnov,2005-12-28 1 2 Daniel Felsenstein and Boris A Portnov 1 Department of Geography Hebrew University of Jerusalem Israel 2 Department of Natural Resources and Environmental Management University of Haifa Israel During the Candiot War of 1645 1669 the Ottoman Sultan Ibrahim I ordered his chief admiral to attack Malta Fearing imminent defeat by the superior Venetian forces stationed on the island the admiral decided to trick the sultan out of the idea As the story goes he placed a candle on his naval map allowing the wax to drip on the tiny island until it was completely covered Then he exclaimed in false surprise Malta Yok There is no Malta and convinced the sultan to sail his fleet to the Island of Crete instead Although Malta is not featured in this volume most of the countries it covers are of wax drip size Intuitively it may be expected that everything in small countries is diminutive distances population economies and even regional inequalities Thus at a symposium on The Challenge of Development convened in Israel in 1957 to mark the inauguration of a new building for the Department of Economics at the Hebrew University of Jerusalem the eminent US economist Simon Kuznets stated that developed small states seem to have succeeded

in spreading the fruits of economic growth more widely among their populations than the larger states at comparable levels of income per capita **Structural Change and Income Distribution** Guanghai Wan, 2017 This study explores the relationship between inequality and structural transformation by constructing a theoretical model developing analytical frameworks and implementing a case study The general equilibrium model we develop demonstrates that inequality exhibits an inverted U shape as structural change proceeds from onset to completion Our analytical frameworks enable decomposition of total inequality into sector contributions and a change in total inequality into a component attributable to structural transformation and the other component to concentration or spatial agglomeration Applying the decomposition frameworks to data from the People's Republic of China yield various interesting findings and more importantly confirms the inverted U shape as predicted by our theoretical model **The Economic Development of Europe's Regions** Joan Ramón Rosés, Nikolaus Wolf, 2018-11-06 This book is the first quantitative description of Europe's economic development at a regional level over the entire twentieth century Based on a new and comprehensive set of data it brings together a group of leading economic historians in order to describe and analyze the development of European regions both for nation states and for Europe as a whole This provides a new transnational perspective on Europe's quantitative development offering for the first time a systematic long run analysis of national policies independent from the use of national statistical units The new transnational dimension of data allows for the analysis of national policies in a more thorough way than ever before The book provides a comprehensive database at the level of modern NUTS 2 regions for the period 1900-2010 in 10 year intervals and a panoramic view of economic development both below and above the national level It will be of great interest to economic historians economic geographers development economists and those with an interest in economic growth **How to Achieve Inclusive Growth** Valerie Cerra, Barry Eichengreen, Asmaa El-Ganainy, Martin Schindler, 2022 This authoritative book explains the sources and scale of current economic challenges and proposes solutions to craft a brighter future by building a sustainable green and inclusive society in the years ahead **Designing Integrated Industrial Policies Volume II** Shigeru Thomas Otsubo, Christian Samen Otchia, 2020-12-01 Very little has been written on industrialization and deindustrialization in Asia and Africa This reference work sheds illuminating light upon the industrial development in Asia and Africa It also provides an in depth look into China's engagement and migrant labour in Africa The book also addresses the roles of public private partnership PPP and international development cooperation and how they are fundamental to industrialization in Asia and Africa Designing Integrated Industrial Policies will be a very useful reference particularly as a how to guide on industrial promotion and designing integrated industrial policies not only for economic growth and job creation but also for inclusive development It comes with country cases and illustrates useful tools for industrial policy simulation and for evidence based policy making through these concrete examples **Impact Evaluation of Infrastructure Interventions** Henrik Hansen, Ole Winckler Andersen, Howard White, 2013-09-13 The focus on results in

development agencies has led to increased focus on impact evaluation to demonstrate the effectiveness of development programmes. This book illustrates the broad range of methods available for counterfactual analysis of infrastructure programmes such as establishment, rehabilitation and maintenance of roads, water supply and electrical power plants and grids. Understanding the impact of interventions requires understanding of the context in which the intervention takes place and the channels through which it is expected to occur. For infrastructure interventions it is particularly important to identify the links between the input and the outcomes and impacts because the well-being of people, the ultimate impact, does not change directly as a consequence of the intervention. Therefore, impact evaluation of infrastructure programmes typically requires mixing both quantitative and qualitative approaches as illustrated in many of the contributions to this edited volume.

This book was originally published as a special issue of the *Journal of Development Effectiveness*. **Investigating Spatial Inequalities** Peter Gladoić Håkansson, Helena Bohman, 2019-11-29. Offering in-depth perspectives on factors such as local labour markets, housing and mobility, this book investigates centralization tendencies in Scandinavia and South East Europe that help shape regional development and act as a catalyst to creating regional inequalities. *Economic Growth, Income Distribution and Poverty Reduction in Contemporary China* Shujie Yao, 2004-11-10. Yao reviews the economic development history of contemporary China from 1949 up to today, paying special attention to the interface among growth, inequality and poverty reduction. International Encyclopedia of Human Geography, 2019-11-29. International Encyclopedia of Human Geography, Second Edition, Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender, race, nationality, location and other factors. In other words, the things that make people and places different. Questions of, for example, politics, economics, race relations and migration are introduced and discussed through a geographical lens. This updated edition will assist readers in their research by providing factual information, historical perspectives, theoretical approaches, reviews of literature and provocative topical discussions that will stimulate creative thinking. Presents the most up-to-date and comprehensive coverage on the topic of human geography. Contains extensive scope and depth of coverage. Emphasizes how geographers interact with, understand and contribute to problem solving in the contemporary world. Places an emphasis on how geography is relevant in a social and interdisciplinary context. Liberalization, Growth and Regional Disparities in India Madhusudan Ghosh, 2013-01-18. Upon the backdrop of impressive progress made by the Indian economy during the last two decades after the large-scale economic reforms in the early 1990s, this book evaluates the performance of the economy on some income and non-income dimensions of development at the national, state and sectoral levels. It examines regional economic growth and inequality in income originating from agriculture, industry and services. In view of the importance of the agricultural sector despite its declining share in gross domestic product, it evaluates the performance of agricultural production and the impact of agricultural reforms on spatial integration of food grain markets. It studies rural poverty, analyzing the trend in employment, the trickle-down process and the

inclusiveness of growth in rural India It also evaluates the impact of microfinance as an instrument of financial inclusion on the socio economic conditions of rural households Lastly it examines the relative performance of fifteen major states of India in terms of education health and human development An important feature of the book is that it approaches these issues applying rigorously advanced econometric methods and focusing primarily on their regional disparities during the post reform period vis vis the pre reform period It offers important results to guide policies for future development

Overcoming Fragmentation in Southeast Europe Panayiotis Getimis,2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration *Institutional Logics in*

Action Eva Boxenbaum,Michael Lounsbury,2013-07-09 The Institutional Logics Perspective is one of the fastest growing new theoretical areas in organization studies Thornton Ocasio Lounsbury 2012 Building on early efforts by Friedland Alford 1991 to bring society back in to the study of organizational dynamics this new scholarly domain has revived institutional analysis by embracing a

NAFTA's Impact on Mexico's Regional Development Adrián de León-Arias,Patricio Aroca,2021-10-01 In this book the dynamics of continuity and change in the regional economic development of Mexico and the US border states are analyzed These studies cover the last 25 years after the first trade agreement between a developed and a developing country took place and where international trade and investment have been combined with a set of relevant local factors such as regional innovation industrialization patterns multinational corporations modes of operation public investment and national content of exports The book offers researchers a precise identification of stylized facts that characterize the pattern of regional development in Mexico and the US Southwest as well as state of the art applications contrasting hypotheses from new economic geography endogenous and neo Schumpeterian economic growth models and new international trade To graduate and advanced undergraduate students in the fields of spatial geographic economics this book offers an excellent source for its updated review of current topics on regional development in Mexico To policy makers the book helps to identify policy areas to reinforce the dynamics of regional development Whereas other books have looked at the several impacts of NAFTA on national economies productive sectors and societies this book analyzes the trade agreement's impact with a long term view across the diversity of developments of Mexico's regions As well the analysis is carried out with the perspective of

prospective reforms of a renovated trade agreement between the United States and the new Mexican federal administration. The collaborators in this book are researchers who are experts at the international and national levels in the field of regional economic development. During the last 25 years they have conducted their analyses in different regions of Mexico and the United States as university researchers, advisors to state and federal governments and as practitioners.

Drivers of Innovation, Entrepreneurship and Regional Dynamics Karima Kourtiti, Peter Nijkamp, Roger R. Stough, 2011-06-10

The need for informed and effective insights into key concepts and models of regional development and growth from an endogenous growth perspective has risen over the past decade. These recent advances address in particular local and regional assets and characteristics comprising inter alia creativity, knowledge, innovation forces and entrepreneurship. Access to and exploitation of these modern forms of human and social capital are of paramount importance for the dynamic regional economic environment in a city or region. This volume offers an overview and critical treatment of the spatial economic roots, opportunities and impacts of new growth strategies mainly from an evidence-based perspective. In the various contributions to this volume, relevant findings and strategic options are interpreted and discussed from both an analytical and a policy perspective to help cultivate creativity, human capital development and innovation as well as entrepreneurial activity with a view to exploiting the drivers of economic development in order to strengthen the competitive edge of cities and regions.
