Regional Integration A. El-Agraa, 1999-07-30 The book provides a comprehensive and critical analysis of the theoretical and empirical literature in international economics arising from the proliferation of regional integration schemes in the last four decades The focus is on the pure theoretical and empirical work in the field covering all recent developments in theoretical work and measurement techniques in regional integration The new book fully updates the analysis in the author's very well received *The Theory and Measurement of International Economic Integration* 1989 to take into account the impact of a further decade of rapid integration around the world Detailed empirical analysis of the major integration schemes themselves can be found in the author's collection *International Economic Integration* 1997      **Regional Integration, Identity & Citizenship in the Greater Horn of Africa** Kidane Mengisteab, Redie Bereketeab, 2012 Examines how regional integration can resolve the crises of the Greater Horn of Africa exploring how it can be used as a mechanism for conflict resolution promoting the economy and tackling issues of identity and citizenship The Greater Horn of Africa GHA is engulfed by three interrelated crises various inter state wars civil wars and inter communal conflicts an economic crisis manifested in widespread debilitating poverty chronic food insecurity and famines and environmental degradation that is ravaging the region While it is apparent that the countries of the region are unlikely to be able to deal with the crises individually there is consensus that their chances of doing so improve markedly with collective regional action The contributors to this volume address the need for regional integration in the GHA They identify those factors that can foster integration such as the proper management of equitable citizenship rights as well as examining those that impede it including the region's largely ineffective integration scheme IGAD and explore how the former can be strengthened and the latter transformed explain how regional integration can mitigate the conflicts and examine how integration can help to energise the region's economy Kidane Mengisteab is Professor of African Studies and Political Science at Penn State University Redie Bereketeab is a researcher at the Nordic Africa Institute Sweden      **Regional Integration Processes in the Commonwealth of Independent States** Katarzyna Czerewacz-Filipowicz, Agnieszka Konopelko, 2016-11-26 This book investigates the economic political and cultural factors that influence regional economic integration processes as well as international political cooperation in the area of the Commonwealth of Independent States CIS The authors analyze market integration manifested in interregional trade investment and service connections Taking a constructivist approach they shed new light on how national ethnic religious and linguistic factors as well as systems of government political regimes and models of leadership shape foreign policy decision making in various post Soviet countries      *Assessment and Measurement of Regional Integration* Philippe De Lombaerde, 2006-09-27 The book fills a niche in the market for books on regional integration where most of the publications deal with theory or the analysis of specific cases almost no books can be found dealing with analytical methodology The book includes a combination of well known and expert scholars and up and coming young

academics The book will appeal strongly to both economists and politics and while the authors present an interdisciplinary approach the economists and political scientists approaches are kept separate

**Regional integration and productivity : the experiences of Brazil and Mexico (Working Paper ITD = Documento de Trabajo ITD ; n. 14)** Mauricio Mesquita Moreira, Ernesto Lopez Cordova, 2015 What is the impact of integration on productivity What are the main channels Is there anything specific about productivity effects in regional agreements This paper tries to answer these questions by looking at the experience of Brazil and Mexico We estimate firm level productivity and test its causal links with trade and FDI variables The results suggest strong trade related gains with import discipline emerging as the dominant effect The results on learning by exporting were mixed with gains restricted to Brazil's regional and worldwide exports On FDI foreign firms appear to have had a positive impact on their buyers and suppliers in Mexico but in Brazil the overall impact was statistically insignificant on productivity levels and negative on productivity growth
