Building Regions Luk Van Langenhove, 2016-04-08 Regions How they emerge and how they are dramatically changing the appearance of the present world of states and its related forms of governance from local to global levels is analysed in this monograph But what are regions Regions can be small or huge They can be part of a single state be composed out of different states or stretched out across borders They can be important recognized economic social or cultural entities or they can be largely ignored by the people who live on a region s territory They can be well defined with clear cut boundaries as is the case in so called constitutional regions or they can be fuzzy as for instance in cross border regions In sum they are not a natural kind and defining regions is not a simple task Luk Van Langenhove advances the concept of region building as an alternative to the construction of regions with three issues of region building being explored Why are regions built in a world of states How do region building processes take place How are regions transforming the present world order Crossing disciplinary boundaries this book is an exercise in theorizing regions and brings together under one conceptual framework different processes and concepts such as regional integration devolution federalism and separatism and refines the social constructionist view on regions

China and India Jonathan Holslag, 2010-01-22 For all their spectacular growth China and

India must still lift a hundred million citizens out of poverty and create jobs for the numerous laborers Both powers hope trade and investment will sustain national unity For the first time Jonathan Holslag identifies these objectives as new sources of rivalry and argues that China and India cannot grow without fierce contest Though he recognizes that both countries wish to maintain stable relations Holslag argues that success in implementing economic reform will give way to conflict This rivalry is already tangible in Asia as a whole where shifting patterns of economic influence have altered the balance of power and have led to shortsighted policies that undermine regional stability Holslag also demonstrates that despite two decades of peace mutual perceptions have become hostile and a military game of tit for tat promises to diminish prospects for peace Holslag therefore refutes the notion that development and interdependence lead to peace and he does so by embedding rich empirical evidence within broader debates on international relations theory His book is down to earth and realistic while also taking into account the complexities of internal policymaking The result is a fascinating portrait of the complicated interaction among economic political military and perceptual levels of diplomacy
