Regionalization Labor Market Interdepe:

Regionalization and Labour Market Interdependence in East and Southeast Asia Duncan Campbell, Asma Lateef, Aurelio Parisotto, Anil Verma, 2016-01-06 How can we account for the dynamic growth of East and Southeast Asian countries Much of the debate has turned on the question of the state versus the market as exclusive and often competing explanations of the successful performance of individual countries This book explores the distinctively interdependent nature of the East and Southeast Asian experience As firms create a regional organization of production the growing interdependence of national labour markets is one major outcome *Globalisation, Regionalism and Economic Interdependence* Filippo di Mauro, Stéphane Dees, Warwick J. McKibbin, 2008 An assessment of the extent to which increased global and regional integration has changed the functioning of the world economy With contributions from both academics and professionals it analyses the implications for global trade relocation of production structural changes and the international transmission of shocks *Asian Migrations* Beatriz P. Lorente, 2005 The migration of people within and beyond Asia no longer takes the form of permanent ruptures uprooting and resettlement Today such movement is more likely to be transient and complex ridden with disruptions and detours and based on translocal interconnections between places and multiple chains of movement Written from various disciplinary perspectives this collection of essays explores the migration experiences of a wide spectrum of people from professional and managerial elites to contract workers and refugees In addressing the nature of these Asian migrations the authors demonstrate how mobility in today s world has transformed notions of citizenship and identity and of displacement and home **Globalization of Labour Markets** Olga Memedovic, A. Kuyvenhoven, Willem T.M. Molle, 2013-03-11 To the classical driving forces of migration such as poverty oppression and war yet another is being added globalization With the increasing economic interdependence between countries migration has become one of the important links Many less developed countries LDCs accept migration of their workers to developed countries DCs because it reduces the pressure on unemployment and remittances increase the capital inflow to the country On the other hand some of the DCs see migration as a threat to their employment and system of social security Participants of the Second Annual Workshop of the Network EU LDC Trade and Capital Relations gave a broad view of the problem which both DCs and LDCs are facing in connection with the globalization of labour markets This volume consists of 10 chapters by scholars from the European Union EU and LDCs Each paper is discussed in terms of its policy relevance by a policy maker as well as by an academic specializing in the field In the opening chapter we aim to do justice to the discussion during the Workshop in Rotterdam in May 1995 at which preliminary versions of all chapters were presented Edited versions of the interventions by the policy makers and experts are included as far as possible after the chapters The opinions expressed in this volume are those of the authors and not necessarily those of their organizations **The New Interdependence in the Americas** Raúl Andrés Hinojosa Ojeda, 1989 **Regional Dynamics** Gordon L. Clark, Meric S. Gertler, John E. M.

Whiteman,2017-09-05 Originally published in 1986 This book is concerned with how regional economies adapt and respond to changing circumstances and especially with the spatial system and processes of restructuring Throughout the book there is a methodological commitment to adjustment theory a unique analytical framework for the study of the dynamics of advanced capitalist economies Instead of homogenising space in the manner of neoclassical economic theory the authors focus on adjustment processes that produce and reproduce spatial differentiation The most important facets of regional economic structure are covered employment wages prices migration and capital investment in terms of their own dimensions and their connections with the larger theoretical framework Each part of the book develops one particular dimension of regional adjustment and each has an overview and summary Within each part there is a sequence of related studies focussing on the empirical aspects theoretical logic and distributive consequences of regional adjustment **Labor Markets and Social Security** John T. Addison,Paul J.J. Welfens,2013-03-09 John T Addison and Paul J J Welfens Because inflation seems moribund in OECD countries stubborn unemployment became the top policy priority of the 1990s Unemployment has increased in many countries reaching critical levels for unskilled and young workers in most continental EU countries Europe s employment performance has continued to lag that in North America The U S in particular achieved a remarkable combination of low inflation and full employment in the late 1990s at a time when the EU suffered from record unemployment rates even if inflation was remarkably low Since the 1980s the consensus view among economists is that structural unemployment plays a much more important role than cyclical unemployment in Europe but that labour costs wage costs plus nonwage costs are also part of Europe s labour market problem Most EU countries rely on a pay as you go public pension system Contribution rates gradually increased in the 1980s and 1990s when the share of young workers in overall employment was declining and life expectancy increasing Rising nonwage costs from the pension system are but one important feature of labour markets in Europe Given the remarkable dynamics of labour markets new entry into the labour force labour turnover and changes in employment characteristics one has to also search for other factors behind sustained unemployment High unemployment is critical for EU countries where one can point to relatively few positive developments after 1975 The U K **The New Regional Economies** William R. Barnes,Larry C. Ledebur,1998 The politics and economics of the United States are wedded in the political economy of the nation state and the nationalist economic policies This nationalist paradigm is however showing the following signs of fatigue the role of the nation state is diminishing as the economy globalizes US national accounting systems are less effective technology forces change trading blocs are emerging there is less control of exchange rates regional economies are restructuring and competitive environments are changing This book proposes that political jurisdictions are not economies but polities and explores the complex and important economic implications of this thesis *Open Regionalism* Clark Winton Reynolds,1997 **International Labour Review** ,1998 **Testing Global Interdependence** Natalia E. Dinello,Ernest Aryeetey,2007-01-01 While many countries may embrace

globalization at the conceptual level the specifics of implementation vary greatly from country to country This book includes diverse narratives which suggest how to limit globalization's negative aspects and ensure constructive engagement in the global community Regional Planning Issues United States. Congress. Joint Economic Committee. Subcommittee on Urban Affairs,1970 *The Operation of Internal Labor Markets* Lawrence T. Pinfield,2013-11-22 Employment systems consist of complex arrays of formal and informal rules that structure the relationships between employees and employers There are many different types of employment systems Some are specified in considerable detail in collectively bargained quasilegal employment contracts while others are left to discretion This book describes the latter type of employment system one in which there is an active market for knowledge and skills This is the salaried employment system of ForestCo a large multiplant manufacturing company in the forest products industry Here supervisors and managers actively adjust the jobs and persons under their authority to meet the market social and institutional forces that influence the activities and performance of their departments The study of employment systems is a relatively recent phenomenon and few prior studies or theories were found to guide this investigation Neither the scope nor the components of employment system studies are yet established The field is confused and contested Nevertheless there is related literature which can be used to focus attention on different features of employment systems One emerging body of work that holds the most promise for the study of employment systems is internal labor market ILM theory The Theory, Practice and Potential of Regional Development Kelly Vodden,David J.A. Douglas,Sean Markey,Sarah Minnes,Bill Reimer,2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build **Asian Regionalism in the World Economy** Masahiro Kawai,Jong-Wha Lee,Peter A. Petri,2010-01-01 The structure and policy architecture of the world economy as it emerges from the historic challenges now underway will be affected by the dramatic rise of Asian economies and deepening

connections among them This important book examines the dramatic transformation of the Asian economy the challenges it faces emerging regional solutions and how Asia can play a more constructive role in the global economy Asia is becoming not just the world's factory but also its leading creditor and one of its key sources of dynamism and stability Key questions are identified and addressed in three areas Asia's growth and productivity financial stability and regional economic integration In each of these areas the contributing authors evaluate current trends and the forces shaping the future They consider whether the regions progress is sustainable and what it will take to make it so How is Asia reshaping its economy in response to the changing global landscape More urgently how can Asia weather the severe global financial and economic storm originating from the global credit crisis How will it extend its gains to people left behind And how can it contribute to better governance and greater prosperity in the world economy This book covers new ground by connecting theory assembling detailed evidence on trends and challenges and offering forward-looking policy prescriptions This timely book will appeal to Asian economic policymakers as well as postgraduate students interested in Asian economics international economics and regional integration Staff of international and regional organizations interested in Asian economics will also find this book invaluable

European Regional Development Paweł Churski, Tomasz Herodowicz, Barbara Konecka-Szydłowska, Robert Perdał, 2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio-economic and socio-political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present-day socio-economic megatrends The proposed approach to the development factors is also used for the author's operationalisation of the concept of territorial capital which is at the centre of regional place-based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004-2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan-European national and intra-regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004-2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing

the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels

Global, Regional and Local Perspectives on the Economies of Southeastern Europe Alexandra Horobet, Lucian Belascu, Persefoni Polychronidou, Anastasios Karasavoglou, 2020-12-12 This book includes papers presented at the 11th International Conference Economies of the Balkan and Eastern European Countries EBEEC held in Bucharest Romania in May 2019 It sheds new light on the micro and macroeconomic developments in the Eastern European and Balkan countries while at the same time taking into account the broader regional and global factors influencing these developments By examining how the decisions and the performance of economic social and political actors in the region are intertwined with wider regional and global events the contributions highlight the dynamic development in Eastern Europe and the Balkans region Further the book demonstrates how the region has overcome numerous challenges in the past and is evolving within the framework of European economic integration and the global effervescent economy

Spatial Analysis and Location Modeling in Urban and Regional Systems Jean-Claude Thill, 2017-11-30 This contributed volume collects cutting edge research in Geographic Information Science Technologies Location Modeling and Spatial Analysis of Urban and Regional Systems The contributions emphasize methodological innovations or substantive breakthroughs on many facets of the socio economic and environmental reality of urban and regional contexts

Regions and Development Sheila Page, 2000 At the 1996 EADI Conference the papers presented in the World Trade and Trade Policy workshop looked at the new trends in regionalism from a variety of points of view for different institutions They considered the effects of regions their implications for policy and performance in the developing countries and for international economic institutions and tried to interpret them in terms of economic and political theory

Growth, Trade, and Integration in Latin America Weine Karlsson, Akhil Malaki, 1996 Evaluations of recent economic reforms and integration efforts in the region Emphasizes success of outward oriented policies and regional cooperation schemes such as Mercosur and NAFTA Handbook of Latin American Studies v 57
