Mansfield,Helen V. Milner,2012-05-27 Preferential trading arrangements PTAs play an increasingly prominent role in the global political economy two notable examples being the European Union and the North American Free Trade Agreement These agreements foster economic integration among member states by enhancing their access to one another s markets Yet despite the importance of PTAs to international trade and world politics until now little attention has been focused on why governments choose to join them and how governments design them This book offers valuable new insights into the political economy of PTA formation Many economists have argued that the roots of these agreements lie in the promise they hold for improving the welfare of member states Others have posited that trade agreements are a response to global political conditions Edward Mansfield and Helen Milner argue that domestic politics provide a crucial impetus to the decision by

governments to enter trade pacts Drawing on this argument they explain why democracies are more likely to enter PTAs than nondemocratic regimes and why as the number of veto players interest groups with the power to block policy change increases in a prospective member state the likelihood of the state entering a trade agreement is reduced The book provides a novel view of the political foundations of trade agreements *The Oxford Handbook of Comparative Regionalism* Tanja A. Börzel, Thomas Risse, 2016-02-04 The Oxford Handbook of Comparative Regionalism the first of its kind offers a systematic and wide ranging survey of the scholarship on regionalism regionalization and regional governance Unpacking the major debates leading authors of the field synthesize the state of the art provide a guide to the comparative study of regionalism and identify future avenues of research Twenty seven chapters review the theoretical and empirical scholarship with regard to the emergence of regionalism the institutional design of regional organizations and issue specific governance as well as the effects of regionalism and its relationship with processes of regionalization The authors explore theories of cooperation integration and diffusion explaining the rise and the different forms of regionalism The handbook also discusses the state of the art on the world regions North America Latin America Europe Eurasia Asia North Africa and the Middle East and Sub Saharan Africa Various chapters survey the literature on regional governance in major issue areas such as security and peace trade and finance environment migration social and gender policies as well as democracy and human rights Finally the handbook engages in cross regional comparisons with regard to institutional design dispute settlement identities and communities legitimacy and democracy as well as inter and transregionalism
