Burns, 2006-04-11 ALEXANDER GILLESPIE WILLIAM C G BURNS The idea for this book grew out of the Ecopolitics conference in Canberra Australia in 1996 The conference captured the ferment of the climate change debate in the South Pacific as well as some its potential implications for the region s inhabitants and e systems At that conference one of the editors Gillespie delivered a paper on climate change issues in the region as did Ros Taplin and Mark Diesendorf who are also c tributors to this volume This book focuses on climate change issues in Australia New Zealand and the small island nations in the Pacific as the world struggles to cope with possible the impacts of environmental change and to formulate effective responses While Australia and New Zealand's per capita emissions of greenhouse gases are among the highest in the world their aggregate contributions are small However both nations may exert a disprop tionate influence in the global greenhouse debate because their obstinate positions at recent conferences of the parties to the United Nations Framework Convention on C mate Change FCCC may provide justification for other developed nations as well as developing countries to refuse to make meaningful reductions in their greenhouse gas emissions Rio Del Oro Specific Plan Project, Sacramento County, 2010 A Grand Strategy for America Robert J. Art, 2013-02-15 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world's preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert I Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America s contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America's interests. The seven are dominion forcibly trying to remake the world in America's own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states offensive capabilities isolationism withdrawing from all military involvement beyond U S borders containment holding the line against aggressor states and selective engagement choosing to prevent or to become involved only in those

conflicts that pose a threat to the country's long term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U S interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times Sea-level Rise and Variability John A. Church, Philip L. Woodworth, Thorkild Aarup, W. Stanley Wilson, 2010-12-01 Understanding Sea Level Rise and Variability identifies the major impacts of sea level rise presents up to date assessments of past sea level change thoroughly explores all of the factors contributing to sea level rise and explores how sea level extreme events might change It identifies what is known in each area and what research and observations are required to reduce the uncertainties in our understanding of sea level rise so that more reliable future projections can be made A synthesis of findings provides a concise summary of past present and future sea level rise and its impacts on society Key Features Book includes contributions from a range of international sea level experts Multidisciplinary Four color throughout Describes the limits of our understanding of this crucial issue as well as pointing to directions for future research The book is for everyone interested in sea level rise and its impacts including policy makers research funders scientists students coastal managers and engineers Additional resources for this book can be found at http www wiley com go church sealevel **Abstracts** ,1992-05 Scientific and Technical Aerospace Reports ,1992 George P. Mitchell and the Idea of Sustainability Jurgen Schmandt, 2010-10-11 An energy tycoon real estate developer and philanthropist George P Mitchell is also an idealist a big thinker who gave his time and fortune to the study of sustainability long before it became a household word Jurgen Schmandt who has worked for Mitchell for many years explains and traces the idea of a sustainable society from its origin in the eighteenth century concept of the commons to its twentieth century iteration in the 1987 United Nations report Our Common Future He then chronicles Mitchell's commitment to this idea from the early 1960s when the focus was on population growth to today when climate change and global warming dominate the debate Mitchell advanced his belief that humankind could create a balance between economic and ecological well being by organizing and hosting conferences awarding prizes supporting scholars and scientists and funding research and publications He did it at the Aspen Institute at The Woodlands Conferences at the National Academy of Sciences at the Mitchell Center for Sustainable Development and at the Houston Advanced Research Center Paradoxically he did not always do it in his own energy company Documenting one important man's engagement with one important idea Schmandt has preserved a significant episode in the ongoing quest to create societies that are capable of reaching and then sustaining a decent quality of life for their citizens Global Change and Local Places Association of American Geographers GCLP Research Team, 2003-06-26 This comprehensive book explores the ways people and biota contribute to climate change in four localities of the United States This volume summarizes the findings of the Global Change in Local Places GCLP project initiated by the Association of American Geographers to

investigate the contribution of local factors to global change how and why these factors change over time and how the effects might be controlled and mitigated locally The sources and driving forces for greenhouse gas emissions vary widely among the four research sites as do the possibilities and propensities to mitigate emissions and adapt to the local changes global warming could bring Policy makers and legislators will be unable to address human induced climate change effectively without the insights revealed by examining and understanding the daily routines that are simultaneously the sources of climate change and the keys to reducing its severity and coping with its effects Societal Responses To Regional Climatic Change Michael H Glantz, 2019-07-11 This volume is an outgrowth of a project undertaken by the Environmental and Societal Impacts Group ESIG for the U S Environmental Protection Agency s Office of Policy Analysis to identify societal responses to extreme climate related events in North America Climate Change Andrew Sturman, Hervé Quénol, 2024 A student friendly guide to climate change with a unique multi level approach written by leading experts The first text to focus on the impact of climate change at a local and regional level enriched with real world case studies to help students understand and apply the science of climate change Key Features An innovative approach which xplores the global regional and local impacts of climate change Provides a comprehensive overview of climate change to support students coming to the subject for the first time Contemporary case studies throughout the book on issues such as sea ice viticulture and wildland fires help students understand how to apply the science of climate change in a real world context Written by leading experts in the field Digital Formats and ResourcesClimate Change is available for students and institutions to purchase in a variety of formats and is supported by online resources The e book offers a mobile experience and convenient access www oxfordtextbooks co uk ebooksStudent Resources Case studies with discussion questions Blog style topical updatesLecturer Resources Image Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects Christopher B.
