Regulating Reproduction:

Regulating Reproduction Emily Jackson, 2001-10-10 This new book provides a clear and accessible analysis of the various ways in which human reproduction is regulated A comprehensive exposition of the law relating to birth control abortion pregnancy childbirth surrogacy and assisted conception is accompanied by an exploration of some of the complex ethical dilemmas that emerge when one of the most intimate areas of human life is subjected to regulatory control Throughout the book two principal themes recur First particular emphasis is placed upon the special difficulties that arise in regulating new technological intervention in all aspects of the reproductive process Second the concept of reproductive autonomy is both interrogated and defended This book offers a readable and engaging account of the complex relationships between law technology and reproduction It will be useful for lecturers and students taking medical law or ethics courses It should also be of interest to anyone with a more general interest in women's bodies and the law or with the profound regulatory consequences of new technologies

Regulating Assisted Reproductive Technologies Amel Alghrani, 2018-11-22 Reproductive science continues to revolutionise reproduction and propel us further into uncharted territories The revolution signalled by the birth of Louise Brown after IVF in 1978 prompted governments across Europe and beyond into regulatory action Forty years on there are now dramatic and controversial developments in new reproductive technologies Technologies such as uterus transplantation that may enable unisex gestation and babies gestated by dad or artificial wombs that will completely divorce reproduction from the human body and allow babies to be gestated by machines usher in a different set of legal ethical and social questions to those that arose from IVF This book revisits the regulation of assisted reproduction and advances the debate on from the now much discussed issues that arose from IVF offering a critical analysis of the regulatory challenges raised by new reproductive technologies on the horizon

The Legal, Medical and Cultural Regulation of the Body Stephen W. Smith, 2016-03-03 The regulation of the body provides an important concern in law medical practice and culture This volume contributes to existing research in the area by encouraging experts from a range of related disciplines to consider the legal cultural and medical ways in which we regulate the body further exploring how conceptions of self liberalism property and harm inform and influence contentious legal and ethical questions about what we can and cannot do to or with our own bodies

Revisiting the Regulation of Human Fertilisation and Embryology Kirsty Horsey, 2015-06-19 The Human Fertilisation and Embryology Act 2008 was a major update to the UK's laws on the use and regulation of reproductive technology and assisted reproduction Since the enactment of the new law the sector's regulatory body the Human Fertilisation and Embryology Authority HFEA has also consulted on various related topics including barriers to egg and sperm donation in the UK multiple births single embryo transfer and using IVF technology to prevent mitochondrial disease This book critically considers recent developments in human fertilisation legislation asking whether the 2008 Act has achieved its stated aim of being fit for purpose Bringing together a range of international experts

the book evaluates the fresh risks and challenges emerging from both established and existing technologies and techniques in the field of human fertilisation and embryology as well as offering valuable insights into the social and regulatory challenges that lie ahead Key topics include problems with DIY assisted conception the lack of reform in respect of the regulation of surrogacy arrangements and mitochondrial DNA transfer As a review of the status of assisted reproduction legislation this book will be of great use and interest to students researchers and practitioners in medical law bioethics medicine and child welfare Leading Works in Health Law and Ethics Sara Fovargue, Craig Purshouse, 2023-07-20 Health and healthcare are vitally important to all of us and academic interest in the law regulating health has over the last 50 years become an important field of academic study An analysis of the development of changes in and scope of health law and ethics to date is both timely and of interest to students and scholars alike along with an exploration of its likely future development This work brings together contributions from leading and emerging scholars in the field Each contributor has been invited to select and analyse a leading work which has for them shed light on the way that health law and ethics has developed The chapters are both autobiographical reflecting upon the works that have proved significant to contributors and also critical analyses of the current state of the field This collection also includes a specially written Introduction and Conclusion which critically reflect upon the development of health law and ethics and its likely future developments in the light of the reflections by contributors on their chosen leading works The book will be of interest to students teachers and researchers in health law and ethics as it provides critical discussions and assessments of some of the leading scholarship in the field

Documentation Bulletin ,1965-11 **Globalization and Health** Belinda Bennett, George F. Tomossy, 2006-06-21 Within contemporary society globalization has emerged as a key concern at the centre of ethical legal and policy debates relating to health care Conflicts between public interests and individual rights the challenge of regulating health professionals and access to health services and the effects of a global market all feature prominently in these discussions As a result of globalization these issues can no longer be understood solely within the political boundaries that define traditional notions of

individuals and communities Rather solutions demand a global conception of rights and obligations which in turn requires new approaches to health policy formulation and a reevaluation of existing ethical and legal frameworks In essence the impact of globalization on human health is testing the robustness of modern regulatory systems legal doctrines and ethical paradigms PUBLIC HEALTH DEVELOPING GLOBAL CONCERNS The interconnectedness of the global economy presents new challenges in public health While globalization has facilitated improvements in health care it has also created new hazards and avenues for the exploitation of vulnerable persons It is becoming increasingly apparent that both national and international responses are required Indeed as the chapters in this section convey public health is rightly a global concern Globalization has led to a sharing of both risks and responsibilities in public health Belinda Bennett reminds us of the ease with which infectious diseases can spread within the global community given the speed of modern travel and trade

Biomedical Index to PHS-supported Research ,1993 **Biology of Sharks and Their Relatives** Jeffrey C. Carrier,John A. Musick,Michael R. Heithaus,2012-04-09 Virtually every area of research associated with sharks and their relatives has been strongly impacted by the revolutionary growth in technology The questions we can now ask are very different than those reported even two decades ago Modern immunological and genetic techniques satellite telemetry and archival tagging modern phylogenetic analysis **Political Ecology** David Bell,Leesa Fawcett,Roger Keil,Peter Penz,2005-08-18 Political Ecology addresses environmental issues which Innis was concerned with from a contemporary political economy perspective They explore a wide range of themes and issues including sustainability risk and regulation population growth planetary management impact of humanity on environment role of technology and communication Case studies provide further insight into issues such as industrial racism women and development and collective action by highlighting ethical and political questions and providing critical insights into the issues and debates in political ecology **Reproductive Rights and the Law** Kerry O'Halloran,2025-08-11 This book examines reproductive rights and their complex interaction with the law and with society exploring differing perspectives and placing these in their respective cultural social and religious contexts Kerry O'Halloran explores the socially divisive question of abortion and using examples from both developing and developed countries considers how context determines the legal position *Research Awards Index* ,1989 **Saviour Siblings and the Regulation of Assisted Reproductive Technology** Malcolm K. Smith,2016-03-03 Advances in the field of Assisted Reproductive Technology ART have been revolutionary This book focuses on the use of ARTs in the context of families who seek to conceive a matching sibling donor as a source of tissue to treat an existing sick child Such children have been referred to as saviour siblings Considering the legal and regulatory frameworks that impact on the accessibility of this technology in Australia and the UK the work analyses the ethical and moral issues that arise from the use of the technology for this specific purpose The author claims the only justification for limiting a family's reproductive liberty in this context is where the exercise of reproductive decision making results in harm to others It is argued that the harm principle is the

underlying feature of legislative action in Western democratic society and as such this principle provides the grounds upon which a strong and persuasive argument is made for a less restrictive regulatory approach in the context of sibling relationships. The book will be of great relevance and interest to academics, researchers, practitioners and policy makers in the fields of law, ethics, philosophy, science and medicine.

Prebiotic Chemistry and Chemical Evolution of Nucleic Acids César Menor-Salván, 2018-08-01 The origin of life is one of the biggest unsolved scientific questions. This book deals with the formation and first steps of the chemical evolution of nucleic acids, including the chemical roots behind the origin of their components from the simplest sources in a geochemical context. Chemical evolution encompasses the chemical processes and interactions conducive to self-assembly and supramolecular organization, leading to an increase of complexity and the emergence of life. The book starts with a personal account of the pioneering work of Stanley Miller and Jeffrey Bada on the Chemistry of Origins of Life and how the development of organic chemistry, beginning in the 19th century, led to the emergence of the field of prebiotic chemistry, situated at the frontier between organic geochemistry and biochemistry. It then continues reviewing in tutorial manner current central topics regarding the organization of nucleic acids, the origin of nucleobases and nucleosides, their phosphorylation and polymerization, and ultimately their self-assembly and supramolecular organization at the inception of life.

International Perspectives on End-of-Life Law Reform Ben P. White, Lindy Willmott, 2021-12-09 Addresses the vexed question of how and why reform of end-of-life law occurs, drawing on ten international case studies.

The Oxford Handbook of Reproductive Ethics Leslie Francis, 2016-12-28 Intimate and medicalized natural and technological reproduction poses some of the most challenging ethical dilemmas of our time. Reproduction presses the boundaries of humanity and ethical respect, the permissible limits of technology, conscientious objection by health care professionals, and social justice. This volume brings together scholars from multiple perspectives to address both traditional and novel questions about the rights and responsibilities of human reproducers, their caregivers, and the societies in which they live. Among issues treated in the volume are: what it is to be a parent, the responsibilities of parents, and the role of society in facilitating or discouraging parenting; May gamete donors be anonymous? Is surrogacy, in which a woman gestates a child for others, ethically permissible when efforts are made to prevent coercion or exploitation? Should it be mandatory to screen newborns for potentially serious conditions or permissible to sequence their genomes? Are both parties to a reproductive act equally responsible to support the child, even if one deceived the other? Are there ethical asymmetries between male and female parents, and is the lack of available contraceptives for men unjust? Should the costs of infertility treatment be socially shared, as they are for other forms of health care? Do parents have a duty to try to conceive children under the best circumstances they can, or to avoid conception if the child will suffer? What is the status of the fetus, and what ethical limits constrain the use of fetal tissue? Reproduction is a rapidly changing medical field with novel developments such as mitochondrial transfer or uterine transplantation occurring regularly. And there are emerging natural challenges too, with

Zika virus just the latest The volume gives readers tools not only to address the problems we now know but ones that may emerge in the future as well **Regulating Reproduction** Robert H. Blank,1992-10-16 Examines the social context and current state of reproductive mediating technologies such as artificial insemination in vitro fertilization surrogate motherhood sex preselection DNA probes prenatal diagnosis and sterilization **Law, Religion, Constitution** W. Cole Durham,Silvio Ferrari,Cristiana Cianitto,Donlu Thayer,2016-04-29 What is the place assigned to religion in the constitutions of contemporary States What role is religion expected to perform in the fields that are the object of constitutional regulation Is separation of religion and politics a necessary precondition for democracy and the rule of law These questions are addressed in this book through an analysis of the constitutional texts that are in force in different parts of the world Constitutions are at the centre of almost all contemporary legal systems and provide the principles and values that inspire the action of the national law makers After a discussion of some topics that are central to the constitutional regulation of religion the book considers a number of national systems covering countries with a variety of religious and cultural backgrounds The final section of the book is devoted to the discussion of the constitutional regulation of some particularly controversial issues such as religious education the relation between freedom of speech and freedom of religion abortion and freedom of conscience *Advances in Genome Assembly for Fisheries and Aquaculture* Liang Guo,Roger Huerlimann,Ka Yan Ma,2022-03-28
