Institutional Dynamics in Environmental Governance Bas Arts,Pieter Leroy,2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives

Political Modernisation and the Environment J. van Tatenhove,B. Arts,P. Leroy,2013-03-14 Recent years have witnessed a substantial change in both the organisation and substance of environmental policy both national and international Western societies have seen a change in the relationships between the state the market and civil society leading to new conceptions of governance a process here called political modernisation that gives rise to the institutionalisation of new policy arrangements An environmental policy arrangement refers to the organisation and substance of a policy domain in terms of policy coalitions policy discourses rules of the game and resources The book uses these theoretical notions to analyze changes in organisation substance and governance in several environmental policy domains such as infrastructure policies global policies on climate change and biodiversity green planning and agriculture policy Changing relationships

between the state the market and civil society caused by processes of globalization privatisation and individualisation have resulted in a plurality of policy arrangements in different domains Despite the fact that environmental politics has been substantially renewed there is a delicate balance between traditional and new policy arrangements One of the main themes of the book is the explanation of this balance Implementing the Environmental Protection Regime for the Antarctic D. Vidas, 2012-12-06 When the Protocol on Environmental Protection to the Antarctic Treaty entered into force on 14 January 1998 a new phase commenced for the Antarctic Treaty System The parties to the Protocol are today confronting issues related to the implementation of a complex international environmental protection regime both in international and domestic contexts Several crucial implementation questions need to be solved in order to enhance and make possible the implementation of the Protocol What would be the consequences for the parties of a possible failure in resolving the pending implementation issues on what premises can the solutions be based and what then are the options available This book provides a systematic overview of the implementation issues in sections on jurisdiction control and enforcement in the Antarctic Part I institutional support to the implementation of the Protocol Part II normative support to the implementation of the Protocol an Antarctic liability regime Part III relationship with other international instruments and arrangements Part IV and through a series of selected case studies issues involved in domestic implementation of the Protocol Part V This is a book that will appeal to Antarctic specialists and to all those interested in environmental law and policy **Economics of**

Climate Change: The Contribution of Forestry Projects Wolfram Kägi, 2012-12-06 Climate change is one of the major global environmental problems one that has the potential to confront us with great costs during the decades to come Climate change is caused by emissions of greenhouse gases GHGs such as carbon dioxide CO₂ As deforestation leads to CO₂ emissions and growing forests sequester CO₂ forestry projects provide us with options to mitigate CO₂ effects This study analyses the contribution forestry projects can make within the context of climate change The contribution of forestry projects is here discussed on two levels On a first level the CO₂ effect of individual projects is analysed On a second level the study asks whether the analysis of forestry projects can contribute to questions on climate change which have been discussed in the economic literature during the past two decades While most studies on forestry projects focus on particular details predominantly on technical issues this study takes a rather broad perspective drawing together different relevant aspects the stability of international agreements is discussed costs and benefits of reducing GHG emissions in industrial countries are reviewed the underlying causes of deforestation are analysed and insights from resource economics are taken into consideration Such a wide perspective allows the identification discussion and appreciation of problems and opportunities associated with forestry projects in the context of climate change which are otherwise not recognised **Coercive and Discursive Compliance Mechanisms in the Management of Natural Resources** Geir Hønneland, 2000-05-31 This book is the result of more than a decade's preoccupation with the issue of compliance in the Barents Sea fisheries first as an

interpreter in the Norwegian Coast Guard then as a graduate student at the University of Tromsø and finally as a PhD student at the University of Oslo and a research fellow at the Fridtjof Nansen Institute FNI. Many of those who deserve a thank you in this preface have already been properly thanked on other occasions among them my previous colleagues and superiors in the Norwegian Coast Guard. On the present occasion I would particularly like to extend my thanks to the FNI leadership during my time here for giving me the trust and freedom to pursue my enthusiasm. Many other colleagues at the institute from both the research and the administrative staff have contributed to the present work. For fear of forgetting someone I prefer not to mention names. There have to be a few exceptions though. From the administration I would particularly like to thank Kari Lorentzen for her professional help in the library and Ann Skarstad and Anne Christine Thestrup for language assistance. Thanks to Claes Lykke Ragner for producing the map on page 7 and to Ivar M. Liseter for help in the preparation of camera ready copy. Among the research staff I would mention my long standing fellow student and colleague both in the Coast Guard and at the FNI, Anne Kristin Jørgensen.

International Environmental Law and Policy in Africa B. Chaytor, K.R. Gray, 2013-11-11 C O O KID11. I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R. Gray and Beatrice Chaytor. It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal towards which I have had an undivided focus over the last two decades. There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority. This belief prevails strongly in many quarters of the industrialised countries. In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston's 1979 thesis that Pollution Prevention Pays. 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries.

Hazardous Decisions D. Huitema, 2002-10-31 where Jeremy Richardson, Albert Weale and Hugh Ward were excellent hosts at the Department of Government and Thomas Christiansen a very good roommate. Having included the UK as a country where decision processes were far less participatory and thus worse in my own view than those in the Netherlands I started doing my first interviews there which were mainly intended to identify suitable case studies for research. But then I read a highly critical review of a book that had a similar topic as my study. The critique was that cases of hazardous waste siting cannot adequately be studied without understanding their national context. This made me decide to devote some attention to the legal context of hazardous waste siting in the three countries of interest which is of course only a part of the national context and its development through the years. The study of the UK system of environmental regulation and land use planning was not a simple issue and I was warned various times for instance by Andrew Blowers at the Open University that the legislation was highly complex and easily misinterpreted. I felt

personally touched by such warnings and decided that I should perhaps approach the UK system a bit less as an evil empire and maybe be a bit more objective in my appraisals

Law and Economics of International

Climate Change Policy R. Schwarze, 2013-03-09 International climate change policy can be broadly divided into two periods A first period where a broad consensus was reached to tackle the risk of global warming in a coordinated global effort and a second period where this consensus was finally framed into a concrete policy The first period started at the Earth Summit of Rio de Janeiro in 1992 where the United Nations Framework Convention on Climate Change UNFCCC was opened for signature The UNFCCC was subsequently signed and ratified by 174 countries making it one of the most accepted international treaties ever The second period was initiated at the 3 Conference of the Parties COP3 to the UNFCCC in Kyoto in 1997 which produced the Kyoto Protocol KP Till now eighty four countries have signed the Kyoto Protocol but only twelve ratified it A major reason for this slow ratification is that most operational details of the Kyoto Protocol were not decided in Kyoto but deferred to following conferences This deferral of the details while probably appropriate to initially reach an agreement is a major stepping stone for a speedy ratification of the protocol National policy makers and their constituencies who would ultimately bear the cost of Kyoto are generally not prepared to ratify a treaty that could mean anything from an unsustainable strict regime of international control of greenhouse gases GHGs to an L regime of loopholes or from a pure market based international carbon trading to a regime of huge international carbon tax funds

Handbook of Environmental Economics Karl-Göran Mäler, Jeffrey R. Vincent, 2005-12-09 Much applied environmental economics is concerned with the valuation of changes in environmental quality Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods It also includes cross cutting chapters that deal with aspects of welfare theory uncertainty experimental methods and public health that are pertinent to valuation Throughout the volume attention is paid to research and policy issues that arise not only in high

income countries where most of the theory and econometrics that underlie applied valuation methods have been developed but also in poorer parts of the world The volume provides a state of the art reference for scholars and practitioners alike

Pesticide Risk Assessment in Rice Paddies: Theory and Practice Ettore Capri,Dimitrios Karpouzas,2011-08-11 Rice is cultivated throughout the world under submerged conditions The high water requirements and the heavy pesticide load used in rice paddies worldwide have resulted in contamination of associated surface water such as streams ditches rivers and lakes The uniform risk assessment approach which has been developed for other crops is not applicable to rice paddies because of the specific conditions applied to rice cultivation Pesticide Risk Assessment in Rice Paddies Theory and Practice fills the gap in information on this subject Written by experts this book summarizes the methods used for pesticide risk assessment in rice paddies the limitations and problems encountered and future developments It also examines the various agronomic pesticide application and risk assessment approaches used in different rice cultivated zones in Asia America and Europe and is an essential reference for those working in this area The only up to date book dealing with pesticide risk assessment in the flooded conditions of rice paddies Offers guidelines on the use and application of existing modeling tools specific for rice cultivation Presents the differences and similarities in rice cropping systems and how these relate to pesticide risk assessment

Management of Contaminated Site Problems, Second Edition Kofi Asante-Duah,2019-04-12 This book outlines the strategies used in the investigation characterization management and restoration and remediation for various contaminated sites It draws on real world examples from across the globe to illustrate remediation techniques and discusses their applicability It provides guidance for the successful corrective action assessment and response programs for any type of contaminated land problem and at any location The systematic protocols presented will aid environmental professionals in managing contaminated land and associated problems more efficiently This new edition adds twelve new chapters and is fully updated and expanded throughout

Public Health Risk Assessment for Human Exposure to Chemicals K. Asante-Duah,2002-09-30 In fact with the control and containment of most infectious conditions and diseases of the past millennium having been achieved in most developed countries and with the resultant increase in life expectancies much more attention seems to have shifted to degenerative health problems Many of the degenerative health conditions have been linked to thousands of chemicals regularly encountered in human living and occupational work environments It is important therefore that human health risk assessments are undertaken on a consistent basis in order to determine the potential impacts of the target chemicals on public health

Public Health Risk Assessment for Human Exposure to Chemicals Kofi Asante-Duah,2017-06-22 This book provides a concise yet comprehensive overview of the many facets relating to human health risk assessments in relation to chemical exposure problems It presents some very important tools and methodologies that can be used to address chemical exposure and public health risk management problems in a consistent efficient and cost effective manner On the whole the book represents a collection and synthesis of the principal

elements of the risk assessment process that may be used to more effectively address issues pertaining to human exposures to chemicals found in modern societies This also includes an elaboration of pertinent risk assessment concepts and techniques methodologies for performing human health risk assessments Written for both the novice and the experienced the subject matter of this book is an attempt at offering a simplified and systematic presentation of public health risk assessment methods and application tools all these facilitated by a layout that will carefully navigate the user through the major processes involved A number of illustrative example problems are interspersed throughout the book in order to help present the book in an easy to follow pragmatic manner
