Neurological Rehabilitation Michael P. Barnes,David C. Good,2013-01-10 Neurological Rehabilitation is the latest volume in the definitive Handbook of Clinical Neurology series It is the first time that this increasingly important subject has been included in the series and this reflects the growing interest and quality of scientific data on topics around neural recovery and the practical applications of new research The volume will appeal to clinicians from both neurological and rehabilitation backgrounds and contains topics of interest to all members of the multidisciplinary clinical team as well as the neuroscience community The volume is divided into five key sections The first is a summary of current research on neural repair recovery and plasticity The authors have kept the topics readable for a non scientific audience and focused on the

aspects of basic neuroscience that should be most relevant to clinical practice The next section covers the basic principles of neurorehabilitation including excellent chapters on learning and skill acquisition outcome measurement and functional neuroimaging The key clinical section comes next and includes updates and reviews on the management of the main neurological disabling physical problems such as spasticity pain sexual functioning and dysphagia Cognitive emotional and behavioural problems are just as important and are covered in the next section with excellent chapters for example on memory and management of executive dysfunction The final part draws the sections on symptom management together by discussing the individual diseases that are most commonly seen in neurorehabilitation and providing an overview of the management of the disability associated with those disorders The volume is a definitive review of current neurorehabilitation practice and will be valuable to a wide range of clinicians and scientists working in this rapidly developing field A volume in the Handbook of Clinical Neurology series which has an unparalleled reputation as the world's most comprehensive source of information in neurology International list of contributors including the leading workers in the field Describes the advances which have occurred in clinical neurology and the neurosciences their impact on the understanding of neurological disorders and on patient care

Intermediate Care of Older People Siân Wade,2006-02-22 Intermediate care has become a buzzword within health and social care over the last few years Seen as the panacea for a number of woes particularly for older people intermediate care has been held up as a way forward within contemporary health and social care This text explores in detail what is understood by the concept of intermediate care and in particular ways in which the needs of older people can be best met by this new range of services Initial discussion centres on the concept of intermediate care and the motives for its development This is followed by a summary of the range of intermediate care services that have been developed with a discussion of some of the confusion that surrounds the concept The debate then moves on to centre on older people discussing first why older people have come to be perceived as one of the main client groups that may benefit from intermediate care and then how intermediate care could be developed to better serve their needs An overview of ageing and the uniqueness of older people is then provided followed by an exploration of some of the challenges faced by older people within society and how this has extended into the delivery of health and social care

Schizophrenia Bulletin ,1998

Psychiatry and Pedopsychiatry Ladislav Hosák,Michal Hrdlička,2017-02-01 The textbook Psychiatry and Pedopsychiatry provides a comprehensive overview of psychiatry Unlike other textbooks it also focuses on pedopsychiatry which is very important in the context of this specialization gaining independence in the Czech Republic The book systematically covers mental disorders from the perspectives of their clinical record file epidemiology etiopathogenesis examination methods the course of illnesses and their treatment It also includes interesting topics which are not commonly treated in textbooks despite being crucial for clinical practice and important for students general knowledge such as psychiatry of somatic diseases and psychiatry of consultation social rehabilitation the structure of the discipline and a proposal for a needed reform urgent states in psychiatry The text also includes an important chapter on the structure of

psychiatric care in the Czech Republic and on upcoming changes The treatment of mental patients should be gradually transferred from large psychiatric hospitals which are often far away from the patient s homes to their natural living and social environment The scholars also paid special attention to the chapter on various methods used in psychotherapy a discipline which has been competing poorly in clinical practice against the fast and cheap pharmacotherapy
