**Reinventing Public Education** Paul Hill, Lawrence C. Pierce, James W. Guthrie, 2009-02-15 A heated debate is raging over our nation s public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools Combining decades of experience in education the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes *Reinventing Public Education* shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity Using public funds local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction In a hands on concrete fashion the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice They show how contracting would free local school boards from operating schools so they can focus on improving educational policy how it would allow parents to choose the best school for their children and finally how it would ensure that schools are held accountable and academic standards are met While retaining a strong public role in education contracting enables schools to be more imaginative adaptable and suited to the needs of children and families In presenting an alternative vision for America s schools *Reinventing Public Education* is too important to be ignored

Jochim, 2015 This study focuses on governance of K 12 public schools Governance the work of institutions that set the rules under which schools must operate can protect children and prevent misuse of public funds but it can also prevent teachers and principals from doing their best for children There are proposals to simplify governance changing by giving control to mayors eliminating elected school boards or eliminating local oversight entirely This book approaches governance from a new angle who governs is less important than what powers government has

**Charter School City** Douglas N. Harris, 2020-07-15 In the wake of the tragedy and destruction that came with Hurricane Katrina in 2005 public schools in New Orleans became part of an almost unthinkable experiment eliminating the traditional public education system and completely replacing it with charter schools and school choice Fifteen years later the results have been remarkable and the complex lessons learned should alter the way we think about American education New Orleans became the first US city ever to adopt a school system based on the principles of markets and economics When the state took over all of the city's public schools it turned them over to non profit charter school managers accountable under performance based contracts Students were no longer obligated to attend a specific school based upon their address allowing families to act like consumers and choose schools in any neighborhood The teacher union contract tenure and certification rules were eliminated giving schools autonomy and control to hire and fire as they pleased In Charter School City Douglas N Harris provides an inside look at how and why these reform decisions were made and offers many surprising findings from one of the most extensive and rigorous evaluations of a district school reform ever conducted Through close examination of the results Harris finds that this unprecedented experiment was a noteworthy success on almost every measurable student outcome But as Harris shows New Orleans was uniquely situated for these reforms to work well and that this market based reform still required some specific and active roles for government Letting free markets rule on their own without government involvement will not generate the kinds of changes their advocates suggest Combining the evidence from New Orleans with that from other cities Harris draws out the broader lessons of this unprecedented reform effort At a time when charter school debates are more based on ideology than data this book is a powerful evidence based and in depth look at how we can rethink the roles for governments markets and nonprofit organizations in education to ensure that America's schools fulfill their potential for all students

Fixing Urban Schools Paul T. Hill, Mary Beth Celio, 2010-12-01 Every year in one out of three big cities the school superintendent leaves his or her job sending local community leaders back to square one Cleveland Baltimore and Washington D C are struggling to recreate their failed school systems and many more cities are likely to follow City leaders need more than new superintendents They need stable reform strategies strong enough to move an entrenched system Unfortunately it is not clear where they can turn for help Education experts are deeply divided about whether teacher retraining or new standards are enough to reform a struggling city system or whether more fundamental changes such as

family choice and family run schools are needed Based on new research this book identifies the essential elements of reform strategies that can transform school performance in big cities beset by poverty social instability racial isolation and labor unrest It also suggests ways that local leaders can assemble the necessary funding and political support to make such strategies work
