Social Movements in India Raka Ray, Mary Fainsod Katzenstein, 2005-03-25 Social movements have played a vital role in Indian politics since well before the inception of India as a new nation in 1947 During the Nehruvian era poverty alleviation was a foundational standard against which policy proposals and political claims were measured at this time movement activism was directly accountable to this state discourse In the first volume to focus on poverty and class in its analysis of social movements a group of leading India scholars shows how social movements have had to change because poverty reduction no longer serves its earlier role as a political template With distinctive chapters on gender lower castes environment the Hindu Right Kerala labor farmers and biotechnology *Social Movements in India* will be attractive to students and researchers in many different disciplines

Reinventing Revolution Gail Omvedt, 1993 **New Critical Theory** William S. Wilkerson, Jeffrey Paris, 2001-11-19 *New Critical Theory* surveys contemporary leftist thought while introducing the tenets of this new form of critical theory Beginning with an exploration of the relationship between Marxism Habermas and the politics of identity William S Wilkerson and Jeffrey R Paris present a collection that critiques the globalization of capital The development of personality appears as subject to socialized standards in an age of global capitalism Only after scrutinizing

the effects of such a system can liberation be found The essays within join Critical Theory with postmodern insights on language and subjectivity to provide a more comprehensive view of emancipatory social theory Through this and other reflections on critical race gender and queer theories Wilkerson and Paris emerge with an encompassing volume defining New Critical Theory **Mobilizing Religion and Gender in India** Nandini Deo, 2015-10-30 Religious nationalists and women's activists have transformed India over the past century They debated the idea of India under colonial rule shaped the constitutional structure of Indian democracy and questioned the legitimacy of the postcolonial consensus as they politicized one dimension of identity Using a historical comparative approach the book argues that external events activist agency in strategizing and the political economy of transnational networks explain the relative success and failure of Hindu nationalism and the Indian women's movement rather than the ideological claims each movement makes By focusing on how particular activist strategies lead to increased levels of public support it shows how it is these strategies rather than the ideologies of Hindutva and feminism that mobilize people Both of these social movements have had decades of great power and influence and decades of relative irrelevance and both challenge postcolonial India's secular settlement its division of public and private The book goes on to highlight new insights into the inner dynamics of each movement by showing how the same strategies grassroots education electoral mobilization media management donor cultivation lead to similarly positive results Bringing together the study of Hindu nationalism and the Indian women's movement the book will be of interest to students and scholars of South Asian Religion Gender Studies and South Asian Politics **Revolutionary Cuba** Luis

[Marxism and Social Movements](#), 2013-06-20

Marxism and Social Movements is the first sustained engagement between social movement theory and Marxist approaches to collective action. The chapters collected here by leading figures in both fields discuss the potential for a Marxist theory of social movements, explore the developmental processes and political tensions within movements, set the question in a long historical perspective and analyse contemporary movements against neo-liberalism and austerity. Exploring struggles on six continents over 150 years, this collection shows the power of Marxist analysis in relation not only to class politics, labour movements and revolutions but also anti-colonial and anti-racist struggles, community activism and environmental justice, indigenous struggles and anti-austerity protest. It sets a new agenda both for Marxist theory and for movement research.

Considered the most significant recent agrarian movement in Mexico, the 1994 EZLN uprising by the indigenous peasantry of Chiapas attracted world attention. Timed to coincide with the signing of the NAFTA agreement, the Zapatista Army of National Liberation reasserted the value of indigenous culture and opposed the spread of neo-liberalism associated with globalization. The essays in this collection examine the background to the 1994 uprising together with the reasons for this and also the developments in Chiapas and Mexico in the years since. Among the issues covered are the history of land reform in the region, the role of peasant and religious organizations in constructing a new politics of identity, the participation in the rebellion of indigenous women and changing gender relations, plus the impact of the Zapatistas on Mexican democracy. The international group of scholars contributing to the volume include Sarah Washbrook, George and Jane Collier, Antonio García de León, Daniel Villafuerte Solís, Gemma van der Haar, Mercedes Olivera, Marco Estrada Saavedra, Heidi Moksnes, Neil Harvey and Tom Brass. This book was previously published as a special issue of *The Journal of Peasant Studies*. [Human Rights and Social Movements](#), Neil Stammers, 2009-04-20. This book champions social movements as one of the most influential agents that shape our conceptions of human rights. It argues that human rights cannot be understood outside of the context of social movement struggles. It explains how much of the literature on human rights has systematically obscured this link, consequently distorting our understandings of human rights. Neil Stammers shows how human rights can be understood. He

suggests that what he calls the paradox of institutionalisation can only be addressed through a recognition of the importance of human rights arising out of grassroots activism and through processes of institutional democratisation

Art and Postcapitalism Dave Beech, 2019-10-20 Artistic labour was exemplary for Utopian Socialist theories of attractive labour and Marxist theories of nonalienated labour but the rise of the anti work movement and current theories of fully automated luxury communism have seen art topple from its privileged place within the left's political imaginary as the artist has been reconceived as a prototype of the precarious 24/7 worker Art and Postcapitalism argues that art remains essential for thinking about the intersection of labour capitalism and postcapitalism not insofar as it merges work and pleasure but as an example of noncapitalist production Reassessing the contemporary politics of work by revisiting debates about art technology and in the nineteenth and twentieth century Dave Beech challenges the aesthetics of labour in John Ruskin William Morris and Oscar Wilde with a value theory of the supersession of capitalism that sheds light on the anti work theory by Silvia Federici Andre Gorz Kathi Weeks and Maurizio Lazzarato as well as the technological Cockayne of Srnicek and Williams and Paul Mason Formulating a critique of contemporary postcapitalism and developing a new understanding of art and labour within the political project of the supersession of value production this book is essential for activists scholars and anyone interested in the real and imagined escape routes from capitalism

Rescuing History from the Nation Prasenjit Duara, 1996-11-20 Prasenjit Duara offers the first systematic account of the relationship between the nation state nationalism and the concept of linear history Focusing primarily on China and including

discussion of India Duara argues that many historians of postcolonial nation states have adopted a linear evolutionary history of the Enlightenment colonial model As a result they have written repressive exclusionary and incomplete accounts The backlash against such histories has resulted in a tendency to view the past as largely constructed imagined or invented In this book Duara offers a way out of the impasse between constructionism and the evolving nation he redefines history as a series of multiple often conflicting narratives produced simultaneously at national local and transnational levels In a series of closely linked case studies he considers such examples as the very different histories produced by Chinese nationalist reformers and partisans of popular religions the conflicting narratives of statist nationalists and of advocates of federalism in early twentieth century China He demonstrates the necessity of incorporating contestation appropriation repression and the return of the repressed subject into any account of the past that will be meaningful to the present Duara demonstrates how to write histories that resist being pressed into the service of the national subject in its progress or stalled progress toward modernity

Globalization and Postmodern Politics Roger Burbach, 2001-01-20 The book

shows how wealth and power are concentrated in the hands of a transnational elite while ever increasing numbers of people are being marginalised Institutions such as the World Trade Organisation and the International Monetary Fund are intent upon exercising a new hegemony over individuals as the role of the traditional nation state is transformed At the centre of this power shift is a group of high tech robber barons who dominate the Information Age and exploit the technologies of globalisation for their own narrow interests Roger Burbach explores the rise of the new grass roots oppositional movements around the world Manifest in such diverse struggles as the uprising of the Zapatistas in Mexico and the battle of Seattle against the World Trade Organisation this new postmodern politics is de centred and has little interest in the old ideologies that dominated much of the twentieth century The final section of the book contextualises postmodern politics by drawing on contemporary examples The authors discuss the demise of socialist and protosocialist experiments in Chile Grenada Nicaragua and Cuba and the emergence of postmodern movements in Latin America The final two chapters take a specific look at the Zapatista movement and its significance for revolutionary struggles around the world
