Handbook of HIV Prevention John L. Peterson, Ralph J. DiClemente, 2012-12-06 In the nearly two decades since the HIV pandemic began the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical The Handbook of HIV Prevention is intended as the first attempt to meet this need The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health medicine nursing education and the social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation

After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press Current Catalog National Library of Medicine (U.S.),1991 First multi year cumulation covers six years 1965 70

Addiction and Pregnancy Laura M. Sanders,Barry R. Sherman,Chau Trinh,1998-08-27 Pioneering evidence is presented in this book to support the effectiveness of peer counseling for substance abuse treatment of pregnant women and their families The introduction by Barry R Sherman describes his personal experience as a behavioral scientist doing work in a culture other than his own A comprehensive overview of the crack epidemic and its impact on women is followed by an up to date account of acupuncture in addiction treatment The authors use the theory and principles of social learning to justify the peer counselor model known as SISTERS Chapters include discussions of conducting culturally competent research development and validation of the Abstinence Self Efficacy Scale ASES and the Traumatic Life Events TLE Inventory as well as the social support systems of drug dependent women Both quantitative and qualitative methods are used to evaluate program impact A urine toxicology index of sobriety as well as empirical measures of psychosocial functioning and client satisfaction demonstrate sufficient success and cost effectiveness of the program to warrant serious support by health care providers and insurance companies **Changing Addictive Behavior** Jalie A. Tucker,Dennis M. Donovan,G. Alan Marlatt,2001-02-15 This volume proposes that prevailing clinical approaches to treating addictive behaviors are actually best suited to a minority of the population with problems in the case of substance abusers those with substantial functional impairment and physical dependence But what about persons with mild to moderate addictive behavior problems for whom intensive treatment may prove unnecessarily costly disruptive and stigmatizing Or those substance abusers who are unable or unmotivated to abstain but want to reduce the harm associated with drug use Contributors draw upon cutting edge theory and research to examine ways that traditional therapeutic treatments can be supplemented by public health interventions that extend the reach and effectiveness of care Timely and pragmatic the book points the way toward necessary evolutions in the roles of behavior change specialists in today s challenging health care environment
