*Dangerous Behavior* Calvin J. Frederick, 1978      *Transit Development in Rock Mechanics* Meifeng Cai, Yang Gengshe, Jin'an Wang, 2014-10-20 *Transit Development in Rock Mechanics Recognition Thinking and Innovation* contains 150 papers presented at the 3rd ISRM International Young Scholars Symposium on Rock Mechanics 8-10 November 2014 Xi'an, China. The volume focusses on the transitional development in rock mechanics research from surface to underground mining and from shallow to a deep rock excavations and on the transition of knowledge thinking and innovation from pioneers to the young generation. The contributions cover a wide range of topics: Field investigation and measurements; Physical and mechanical properties of rocks; Analysis and design methods for rock engineering; Numerical and physical modeling; Multi-fields coupling analysis methods; Rock slope, tunnel and foundation engineering; Monitoring and control of rock pressure in underground engineering; Dynamic rock mechanics and blasting; Support and reinforcement techniques for geotechnical engineering; Prediction and control of artificial hazards with excavation in rock. *Transit Development in Rock Mechanics Recognition Thinking and Innovation* will be invaluable to engineers and academics interested or involved in rock mechanics, geotechnical engineering, mine engineering and underground engineering. The Symposium was organized by the Commission on Education of International Society for Rock Mechanics and Xi'an University of Science and Technology and sponsored by the International Society for Rock Mechanics (ISRM) and the Chinese Society for Rock Mechanics and Engineering (CSRME).

*Computational and Experimental Simulations in Engineering* Shaofan Li, 2023-12-04. This book gathers the latest advances, innovations and applications in the field of computational engineering as presented by leading international researchers and engineers at the 29th International Conference on Computational bioengineering, geotechnical engineering, offshore, multi-scale structural integrity, materials design and computer modeling methods in engineering. The contributions, which were selected by means of a rigorous international peer review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.      *Surgery, Its Principles and Practice: History; surgical physiology; surgical pathology; infections; tumors; wounds* William Williams Keen, John Chalmers Da Costa, 1906

*Artificial Intelligence and Security* Xingming Sun, Xiaorui Zhang, Zhihua Xia, Elisa Bertino, 2022-07-04. This three-volume set LNCS 13338-13340 constitutes the thoroughly refereed proceedings of the 8th International Conference on Artificial Intelligence and Security (ICAIS 2022) which was held in Qinghai, China, in July 2022. The total of 166 papers included in the 3 volumes were carefully reviewed and selected from 1124 submissions. The papers present research development and applications in the fields of artificial intelligence and information security.      *Public Roads*, 1930      *The Practical Guide to Aging for Beginners* Su Jun Wei, Chen Hui-Chung, 2021-09-01. An Illustrated Guide to the Aging Phenomena in Life. Aging will slowly penetrate every aspect of life. My favorite foods no longer taste as good as they once did. The place I live in felt very noisy all in a sudden. After finally retiring, I start to have personal time but nothing seems to arouse my interest. Have you or

your family ever had these problems In fact these troubles are all caused by aging Aging is a natural process If you don't pay special attention to it in time these small troubles will snowball into big ones Long repressed psychological pressure will eventually burst out and transform into behaviors that others find annoying Gradually you will become a difficult old man woman who you don't even like A problem that neither patience nor companionship can solve Long term suppression may cause greater emotional rebound making pure companionship hard to last long Everything has a lifespan and the body isn't an exception However in the face of the various troubles in life caused by aging people still subconsciously encourage them to hang in there or ask the people around them to be with them more However what is required isn't short term tolerance but rather day after day and year after year of patience The so called accompaniment often hurts each other since they don't know how to do it right The life of the person involved is filled by these sufferings caused by aging and may in turn make the family members accompanying them feel uncomfortable Aging is not a disease Only by understanding the aging of the body and the various possible behaviors after aging can we better respond to it When encountering problems related to aging the author noticed that many people may intuitively think Is there any way to cure aging If the problem isn't cured it is not a good way This notion may cause many people to go all the way from regular medical treatment to unpopular remedies and eventually delay the time for rehabilitation When facing the problem of aging many people see it as a disease If it cannot be cured there's nothing else to do However the author does not agree with this statement In fact many problems in life are not simply caused by aging but the result of the interaction between aging and the environment Although the human body ages it still retains considerable flexibility in adapting to the environment Even if the aging situation is severe many of the problems encountered in life can still be improved As long as we understand the mechanism of body aging and take appropriate countermeasures against the tendency of aging we can immediately improve the current quality of life and effectively delay the symptoms of aging

Improper Modernism Daniela Caselli,2016-12-05 In her compelling reexamination of Djuna Barnes s work Daniela Caselli raises timely questions about Barnes biography and feminist criticism identity and authority and modernist canon formation Through close readings of Barnes s manuscripts correspondence critically acclaimed and little known texts Caselli tackles one of the central unacknowledged issues in Barnes intertextuality She shows how throughout Barnes s corpus the repetition of texts by other authors from Blake to Middleton and by Barnes herself forces us to rethink the relationship between authority and gender and the reasons for her marginal place within modernism All her texts linked as they are by correspondences and permutations wage a war against the common sense of the straight mind Caselli begins by analyzing how literary criticism has shaped our perceptions of Barnes showing how the various personae assigned to Barnes are challenged when the right questions are posed Why is Barnes such a famous author when many of her texts remain unread even by critics Why has criticism reduced Barnes s work to biographical speculations How can Barnes s hybrid eccentric and unconventional corpus be read as part of literary modernism when it often seems to sever itself from it How can an oeuvre reject the labels of feminist and lesbian literature whilst nevertheless holding at its centre the relationships between language sexuality and the real How can Barnes s work help us to rethink the relation between simplicity and difficulty within literary modernism Caselli concludes by arguing that Barnes s complex and bewildering work is committed to a high modernist notion of art as a supremely difficult undertaking whilst refusing to conform to standards of modernist acceptability

**Raising Parents** Patricia M. Crittenden,2013-04-03 This book provides a systematic account of parental behaviour and the means of identifying and addressing inadequate parenting It is intended for professionals who work with children or adults who were harmed as children and its central concern is with parents who endanger their children or whose children may endanger themselves or others Understanding and helping troubled parents to become secure and balanced people is of crucial importance for the parents themselves for their children and for society at large This book is a guide to understanding parents as people who have children as opposed to seeing them as existing solely in terms of their ability to fulfill their

children's needs The book shares equally a respect for theory empirical science and social values and applications It aims to provide a springboard for new lines of research e g around the role of danger in eliciting inadequate parental behavior and the interdependency of parent and child behaviour as well as a guide for clinicians and professionals who must protect both disturbed individuals and the public to understand their clients patients better both parents and children Raising Parents will be essential reading for professionals and practitioners in the field including psychologists psychotherapists psychiatrists and social workers as well as those taking courses in attachment and psychopathology developmental psychology clinical psychology and behavioural courses in psychiatry *Climates and Weather Explained* Bart Geerts, Edward

leading psychologist explains why nearly all of us including many of those who are persecuted and powerless so often defend the social systems that cause misery and injustice Why do we so often defend the very social systems that are responsible for injustice and exploitation In *A Theory of System Justification* John Jost argues that we are motivated to defend the status quo because doing so serves fundamental psychological needs for certainty security and social acceptance We want to feel good not only about ourselves and the groups to which we belong but also about the overarching social structure in which we live even when it hurts others and ourselves Jost lays out the wide range of evidence for his groundbreaking theory and examines its implications for our communities and our democracy Drawing on twenty five years of research he provides an accessible account of system justification theory and its insights System justification helps to explain deep contradictions including the feeling among some women that they don't deserve the same salaries as men and the tendency of some poor people to vote for policies that increase economic inequality The theory illuminates the most pressing social and political issues of our time why has it been so hard to combat anthropogenic climate change as well as some of the most intimate why do some black children prefer white dolls to black ones and why do some people stay in bad relationships Jost's theory has far reaching implications and he offers numerous insights that political activists and social justice advocates can use to promote change
