*The Politics of the Hajj from a Comparative Perspective* Muriel Gomez-Perez, Cédric Jourde, Marie Brossier, 2025-02-28. This book analyzes the contemporary politics of the Hajj in countries of Africa, the Near East and Southeast Asia. States must organize the mobility of approximately two million pilgrims every year. States also manage the flow of vast amounts of financial resources related to the Hajj, as well as the transmission of religious and political ideas about how the world ought to be governed. The contributions in this volume investigate how states attempt to manage the Hajj and the power relations they develop with pilgrims, religious leaders and entrepreneurs of various types. They also examine the Hajj organization from the viewpoint of pilgrims: how they make sense of the bureaucratic apparatus they encounter, how they navigate the constraints imposed upon them, and how they seize opportunities to fulfill their religious, economic and social aspirations. *The Politics of the Hajj from a Comparative Perspective* closely analyzes political interactions between states, pilgrims, religious actors and entrepreneurs, and the extent to which they have evolved over time.

*Religion in Global Politics* Jeffrey Haynes, 2014-10-13. One of the most resilient ideas about societal development after World War II was that nations would inevitably secularise as they modernised. However, as we come to the end of the secular twentieth century, it is obvious that religion continues to be an important factor in politics around the world. The author examines the continuing importance of religion, focusing upon the regions of Europe, the Americas, Africa and Asia.

*Religious Politics in Global and Comparative Perspective* William H. Swatos Jr., 1989-09-07. Current social and political theories which tend to dismiss religious resurgence as a deviant occurrence in the broad sweep of history do not provide an adequate framework for the study of the dramatic resurgence of religion as a worldwide political force. This book is the first to address the interplay of religion and politics systematically and on a global scale. Offering interpretive essays as well as quantitative comparative analyses, it develops a comprehensive theoretical framework and presents the most complete comparative account available of the realities of religious politics in the contemporary world. The first of the interpretive chapters focuses on the cultural factor as a means of clarifying the role of religion in the modern world system. The next two chapters examine the concept of the self in the context of globalization and the absence of solidarity as a unifying force in societal systems. The role of ultimate values in politics and the reasons for the emergence of militant religious movements in nation states is also considered. A worldwide study of religious change.

between 1900 and 1980 gives a clear picture of contemporary global religious movements and formulates a tentative set of explanations of change based on data analysis The statistical links between religious beliefs and political views and between religion and democracy are explored The editor's concluding chapter looks at the implications of the author's findings for general theory in the sociology of religion The editor stresses the need for reconceptualizing basic theoretical constructs particularly the concept of religion itself An important contribution to our understanding of the religious and political forces that are shaping the modern world this work will be of interest to academics researchers and students of world religions sociology and political science     The SAGE Handbook of the Sociology of Religion James A Beckford, Jay
