Beyond the Steppe Frontier Sören Urbansky, 2021-12-14 Over two thousand miles long the boundary between Russia and China is the world's longest land border Though sometimes considered a backwater the border region was always of critical geopolitical importance and has a fascinating history Not only did this border divide the two largest Eurasian empires it was also the place where European and Asian civilizations met where nomads and settled peoples mingled where the imperial interests of Russia China and Japan clashed and where both conflicts and gestures of friendship between the world's largest Communist regimes were staged This book is a history of this border from the late nineteenth century until the fall of the Soviet Union The border has undergone a remarkable transformation since the late nineteenth century As late as the 1920s Russian Chinese and native worlds were intricately interwoven in the region and the frontier was barely regulated By the end of the twentieth century however the two countries had succeeded in cutting kin cultural economic and religious connections between the two sides through deportation forced assimilation and nationalist propaganda campaigns Only with the collapse of the Soviet Union would China and Russia reopen the border but even today the line between countries demarcates two distinct regions with remarkably different worldviews and cultures Drawing on sources in seven languages including extensive archival research interviews and oral histories Urbansky stresses the significant role of the local population in supporting or more often undermining the two states border making efforts

Utopia's Discontents Faith Hillis, 2021 *Utopia's Discontents* provides the first synthetic treatment of the Russian revolutionary emigration before the Revolution It argues that neighborhoods created by Russian exiles became sites of revolutionary experimentation that offered their residents a taste of their anticipated utopian future

Empire and Environment in the Making of Manchuria Norman Smith, 2017-02-10 Since the seventeenth century

Chinese Japanese Manchu Russian and other imperial forces have defied Manchuria's unrelenting summers and unforgiving winters to fight for sovereignty over the natural resources of Northeast Asia. Until now historians have focused on rivalries between the region's imperial invaders. *Empire and Environment in the Making of Manchuria* examines the interplay of climate and competing economic and political interests in the region's vibrant and violent cultural narrative. In this unique and compelling analysis of Manchuria's environmental history, contributors demonstrate how geography shaped the region's past. Families that settled this borderland reaped its riches while at the mercy of an unforgiving and hotly contested landscape. As China's strength as a world leader continues to grow, this volume invites exploration of the indelible links between empire and environment and shows how the geopolitical future of this global economic powerhouse is rooted in its past.

Railways and the Russo-Japanese War Felix Patrikeeff, Harry Shukman, 2007-02-06 This book explores the nexus between railways and the Russo Japanese War 1904-05, the first modern war and one in which the railways played a key part. Felix Patrikeeff and Harry Shukman examine some of the key dimensions of the Russo Japanese War, most notably how uncomfortably technological and human dimensions of Russia's war effort interleaved in the course of the conflict. They demonstrate how advantages that might have been built upon were squandered, blunt traditional forms and habits were applied in politically tortuous contexts and technological edge negated by the internal turmoil of a country unable to tame a process of modernization. Illustrating the vital role railways played in the Russo Japanese War, generally considered to be the first modern technological conflict and a precursor to the First World War, *Railways and the Russo Japanese War* will appeal to students of the Russo Japanese War, Russian history, military history and international history in general.

Manchurian Railways and the Opening of China: An International History Bruce Elleman, Stephen Kotkin, 2015-01-28 The railways of Manchuria offer an intriguing vantage point for an international history of northeast Asia. Before the completion of the Trans-Siberian railway in 1916, the only rail route from the Imperial Russian capital of St. Petersburg to the Pacific port of Vladivostok transited Manchuria. A spur line from the Manchurian city of Harbin led south to ice-free Port Arthur. Control of these two rail lines gave Imperial Russia military, economic and political advantages that excited rivalry on the part of Japan and unease on the part of weak and divided China. Meanwhile, the effort to defend and retain that strategic hold against rising Japanese power strained distant Moscow. Control of the Manchurian railways was contested in the Russo Japanese War of 1904-5, Japan's 1931 invasion and establishment of the puppet state of Manchukuo, the second Sino Japanese War and World War II in Asia and the Chinese civil war that culminated in the Communist victory over the Nationalists. Today the railways are critical to plans for development of China's sparsely populated interior. This volume brings together an international group of scholars to explore this fascinating history.

Victor Arnautoff and the Politics of Art Robert W. Cherny, 2017-03-07 Victor Arnautoff reigned as San Francisco's leading mural painter during the New Deal era. Yet that was only part of an astonishing life journey from Tsarist officer to leftist painter. Robert W. Cherny's masterful biography of Arnautoff braids the

artist's work with his increasingly leftist politics and the tenor of his times. Delving into sources on Russian migrants and San Francisco's arts communities, Cherny traces Arnautoff's life from refugee art student and assistant to Diego Rivera to prominence in the New Deal's art projects and a faculty position at Stanford University. As Arnautoff's politics moved left, he often incorporated working people and people of color into his treatment of the American past and present. In the 1950s, however, his participation in leftist organizations and a highly critical cartoon of Richard Nixon landed him before the House Un-American Activities Committee and led to calls for his dismissal from Stanford. Arnautoff eventually departed America, a refugee of another kind, now fleeing personal loss and the disintegration of the left labor culture that had nurtured him before resuming his artistic career in the Soviet Union that he had fought in his youth to destroy. **2002** Massimo Mastrogregori, 2011-07-11.
