S Lesniewskis Logic Lecture Notes:

S. Leśniewski's Lecture Notes in Logic Jan J.T. Srzednicki, Z. Stachniak, 2012-12-06 Stanislaw Lesniewski 1886 1939 was one of the leading Polish logicians and founders of the Warsaw School of Logic whose membership included beside himself Jan Lukasiewicz Tadeusz Kotarbinski Alfred Tarski and many others In his lifetime LeSniewski published only a few hundred pages He produced many important results in many areas of mathematics these stood in various relations to each other and to materials produced by others and in time created more and more editorial problems Very many were left unpublished at the time of his death Then in 1944 in the fire of Warsaw the whole of this material was burned and lost a considerable loss since a great deal of what is important could have been reconstructed from these notes The present publication aims at presenting unique Lesniewski s materials from alternative sources comprising lecture notes taken during some of Lesniewski s lectures and seminars delivered at the University of Warsaw between the two world wars The editors are aware of the limitations of student notes which cannot compensate for the loss of the original materials However they are unique in reflecting Lesniewski s ideas as he himself presented them Already at the time of his death it was realized that these notes would provide a unique access to Lesniewski s own thought as well as a valuable record of some of the activities of the Warsaw School of Logic

Leśniewski's Systems Protothetic Jan J.T. Srzednicki, Z. Stachniak, 2012-12-06 Between the two world wars Stanislaw Lesniewski 1886 1939 created the famous and important system of foundations of mathematics that comprises three deductive theories Protothetic Ontology and Mereology His research started in 1914 with studies on the general theory of sets later named Mereology Ontology followed between 1919 and 1921 and was the next step towards an integrated system In order to combine these two systematically he constructed Protothetic the system of first principles Together they amount to what Z Jordan called most thorough original and philosophically significant attempt to provide a logically secure foundation for the whole of mathematics The volume collects many of the most significant commentaries on and contributions to Protothetic A Protothetic Bibliography is included

Plural Logic Alex Oliver, Timothy John Smiley, 2016 Alex Oliver and Timothy Smiley provide a new account of plural logic They argue that there is such a thing as genuinely plural denotation in logic and expound a framework of ideas that includes the distinction between distributive and collective predicates the theory of plural descriptions multivalued functions and lists

Twardowski in Lvov in 1895 This school belongs to analytic philosophy and successfully worked in all branches of philosophy The Warsaw school of logic became perhaps the most important part of Twardowski's heritage Lesniewski Lukasiewicz and Tarski leading Polish logicians achieved results which essentially influenced the development of contemporary logic A close connection of logic and philosophy was a typical feature of the Lvov Warsaw school The papers included in the collection deal with all directions of research undertaken by Polish analytic philosophers Special attention is paid to logic and comparisons with other philosophical movements particularly with Brentanism which was one of the sources of the Lvov Warsaw school

Leśniewski's Systems of Logic and Foundations of Mathematics Rafal Urbaniak, 2013-09-24 This meticulous critical assessment of the ground breaking work of philosopher Stanislaw Le niewski focuses exclusively on primary texts and explores the full range of output by one of the master logicians of the Lvov Warsaw school The author's nuanced survey eschews secondary commentary analyzing Le niewski's core philosophical views and evaluating the formulations that were to have such a profound influence on the evolution of mathematical logic One of the undisputed leaders of the cohort of brilliant logicians that congregated in Poland in the early twentieth century Le niewski was a guide and mentor to a generation of celebrated analytical philosophers Alfred Tarski was his PhD student His primary achievement was a system of foundational mathematical logic intended as an alternative to the Principia Mathematica of Alfred North Whitehead and Bertrand Russell Its three strands protothetic ontology and mereology are detailed in discrete sections of this volume alongside a wealth of other chapters grouped to provide the fullest possible coverage of Le niewski's academic output With material on his early philosophical views his contributions to set theory and his work on nominalism and higher order quantification this book offers a uniquely expansive critical commentary on one of analytical philosophy's great pioneers *Actions, Products, and Things* Arkadiusz Chrudzimski, Dariusz Lukasiewicz, 2013-05-02 For a long time Franz Brentano has been widely perceived almost exclusively as the re-discoverer of intentionality and the founder of the continental phenomenology It was only during the last 30 years that his immense importance for the development of analytic philosophy and also the arbitrariness of the very division between analytic and continental philosophy became clear This volume is devoted to Brentano's influence on the Polish Analytic Philosophy better known under the name of Lvov Warsaw School Contributors Arianna Betti Amsterdam Arkadiusz Chrudzimski Szczecin and Salzburg Dale Jacqueline Pennsylvania Dariusz Lukasiewicz Bydgoszcz Maria van der Schaar Leiden Peter Simons Leeds Barry Smith Buffalo and Saarbrücken Jan Wolenski Cracow [The Cambridge History of Philosophy 1870-1945](#) Thomas Baldwin, 2003-11-27 Table of contents **Logic from Russell to Church** Dov M. The History of Continua Stewart Shapiro, Geoffrey Hellman, 2020-12-01 Mathematical and philosophical thought about continuity has changed considerably over the ages Aristotle insisted that continuous substances are not composed of points and that they can only be divided into parts potentially There is something viscous about the continuous It is a unified whole This is in stark contrast with the prevailing contemporary account which takes a continuum to be composed of an uncountably infinite set of points This volume presents a collective study of key ideas and debates within this history The opening chapters focus on the ancient world covering the pre Socratics Plato Aristotle and Alexander The treatment of the medieval period focuses on a relatively recently discovered manuscript by Bradwardine and its relation to medieval views before during and after Bradwardine's time In the so called early modern period mathematicians developed the calculus and with that the rise of infinitesimal techniques thus transforming the notion of continuity The main figures treated here include Galileo Cavalieri Leibniz and Kant In the early part of the nineteenth century Bolzano was one of the first important mathematicians and philosophers to insist that continua are composed of points and he made a heroic attempt to come to grips with the underlying issues concerning the infinite The two figures most responsible for the contemporary orthodoxy regarding continuity are Cantor and Dedekind Each is treated in an article investigating their precursors and influences in both mathematics and philosophy A new chapter then provides a lucid analysis of the work of the mathematician Paul Du Bois Reymond to argue for a constructive account of continuity in opposition to the dominant Dedekind Cantor account This leads to consideration of the contributions of Weyl Brouwer and Peirce who once dubbed the notion of continuity the master key which unlocks the arcana of philosophy And we see that later in the twentieth century Whitehead presented a point free or gunky account of continuity showing how to recover points as a kind of extensive abstraction The final four chapters each focus on a more or less contemporary take on continuity that is outside the Dedekind Cantor hegemony a predicative approach accounts that do not take continua to be composed of points constructive approaches and non Archimedean accounts that make essential use of infinitesimals
