Sacred Architecture:

Sacred Buildings Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality

New Sacred Architecture Phyllis Richardson, 2004 This timely book reflects an awakening of interest in religious faiths and the emergence of a global exchange of architecture and culture While Spain s Rafael Moneo has recently completed a cathedral in Los Angeles Britain s Thomas Heatherwick is designing a Buddhist temple in Japan John Pawson is working on a Cistercian monastery in the Czech Republic and Richard Meier has completed his Jubilee Church in Rome It seems as one Wallpaper registered pundit commented religion is getting a redesign and the architect s faith is as unimportant as his or her nationality I Looking at ways in which contemporary architects are approaching religious or meditative space this book focuses on churches chapels temples synagogues and mosques that have been built in the last few years and that represent a late twentieth early twenty first century aesthetic

Symbols and Language in Sacred Christian Architecture Radu Dragan, Augustin Ioan, 1996 This volume addresses questions regarding contemporary interpretation of the language of sacred and religious buildings While inspired by Heidegger s hermeneutic approach as well as by Chomsky s view on language and Eliade s archetypes and symbols its interpretive hypothesis appropriates the Orthodox Christian perspective on church architecture The second half of the book is a close reading of the Bible pertaining to questions on architecture and is presented both historically and symbolically The purpose of the interpretation is to trace back the possible grounds for a primitive hut of the sacred space the never existing first Christian church In an environment striving for a renewed ecumenical unity such a hermeneutical approach on sensitive issues such as sacred religious architecture pursued by two architectural scholars from Eastern Europe s Romania is meant to propose a fresh overview of a timeless question

Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume Modern Architecture and the Sacred presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern

Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Modernism and American Mid-20th Century Sacred Architecture Anat Geva, 2018-10-08 Mid 20th century sacred architecture in America sought to bridge modernism with religion by abstracting cultural and faith traditions and pushing the envelope in the design of houses of worship Modern architects embraced the challenges of creating sacred spaces that incorporated liturgical changes evolving congregations modern architecture and innovations in building technology The book describes the unique context and design aspects of the departure from historicism and the renewal of heritage and traditions with ground breaking structural features deliberate optical effects and modern aesthetics The contributions from a pre eminent group of scholars and practitioners from the US Australia and Europe are based on original archival research historical documents and field visits to the buildings discussed Investigating how the authority of the divine was communicated through new forms of architectural design these examinations map the materiality of liturgical change and communal worship during the mid 20th century *The Hermeneutics of Sacred Architecture: Hermeneutical calisthenics : a morphology of ritual-architectural priorities* Lindsay Jones, 2000 The two volumes of this investigation into how we perceive sacred architecture propose an original interpretation of built environments as ritual architectural events Exploring the world s cultures and religious traditions Volume One maps out patterned responses to sacred architecture according to the human experience mechanism interpretation and comparison of architecture Volume Two an exercise in comparative morphology offers a comprehensive framework of ritual architectural priorities by looking at architecture as orientation as commemoration and as ritual context *Sacred Architecture, Its Rise, Progress, and Present State* Richard Brown, 1845

The Sacred Architecture of Byzantium Nicholas N. Patricios, 2014-04-24 The churches of the Byzantine era were built to represent heaven on earth Architecture art and liturgy were intertwined in them to a degree that has never been replicated elsewhere and the symbolism of this relationship had deep and profound meanings Sacred buildings and their spiritual art underpinned the Eastern liturgical rites which in turn influenced architectural design and the decoration which accompanied it Nicholas N Patricios here offers a comprehensive survey from the age of Constantine to the fall of Constantinople of the nexus between buildings worship and art His identification of seven distinct Byzantine church types
