*Relating to Rock Art in the Contemporary World* Liam M. Brady, Paul S.C. Taçon, 2016-12-01 Rock art has long been considered an archaeological artifact reflecting activities from the past yet it is also a phenomenon with present day meaning and relevance to both indigenous and non indigenous communities Relating to Rock Art in the Contemporary World

challenges traditional ways of thinking about this highly recognizable form of visual heritage and provides insight into its contemporary significance. One of the most visually striking forms of material culture embedded in landscapes, rock art is ascribed different meanings by diverse groups of people including indigenous peoples, governments, tourism offices, and the general public, all of whom relate to images and sites in unique ways. In this volume, leading scholars from around the globe shift the discourse from a primarily archaeological basis to one that examines the myriad ways that symbolism, meaning, and significance in rock art are being renegotiated in various geographical and cultural settings from Australia to the British Isles. They also consider how people manage the complex meanings, emotions, and cultural and political practices tied to rock art sites and how these factors impact processes relating to identity construction and reaffirmation today. Richly illustrated and geographically diverse, *Relating to Rock Art in the Contemporary World* connects archaeology, anthropology, and heritage studies. The book will appeal to students and scholars of archaeology, anthropology, heritage, heritage management, identity studies, art history, indigenous studies, and visual theory, as well as professionals and amateurs who have vested or avocational interests in rock art. Contributors: Agustín Acevedo, Manuel Bea Jutinach, Bowonsachoti Gemma Boyle, John J. Bradley, Noelene Cole, Inés Domingo, Kurt E. Dongoske, Davida Eisenberg, Degen Dinae Fiore, Ursula K. Frederick, Kelley Hays Gilpin, Catherine Namono, George H. Nash, John Norder, Marianna Ocampo, Joshua Schmidt, Duangpond Singhaseni, Benjamin W. Smith, Atthasit Sukkham, Noel Hidalgo Tan, Watinee Tanompolkraeng, Luke Taylor, Dagmara Zawadzka. [An Archaeological History of Indian Buddhism](#) Lars Fogelin, 2015-04-01. Weaving together studies of archaeological remains, architecture, iconography, inscriptions, and Buddhist texts, the book offers a comprehensive survey of Indian Buddhism from the 6th century BCE to its eventual decline, examining in particular the difficulty of practicing individual asceticism while maintaining a coherent community of Buddhists. [Sacred Darkness](#) Holley Moyes, 2012-09-01. Caves have been used in various ways across human society, but despite the persistence within popular culture of the iconic cave man, deep caves were never used primarily as habitation sites for early humans. Rather, in both ancient and contemporary contexts, caves have served primarily as ritual spaces. In *Sacred Darkness*, contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice. Covering the ritual use of caves in Europe, Asia, Australia, Africa, Mesoamerica, and the US Southwest and Eastern woodlands, this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day. These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices. This state-of-the-art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion, sacred landscape, or cosmology, and a must read for any archaeologist interested in caves. *Monastery, Monument, Museum* Maurizio Peleggi, 2017-10-31. Ranging across the longue durée of Thailand's history, *Monastery, Monument, Museum* is an eminently readable and original contribution to

the study of the kingdom's art and culture. Eschewing issues of dating style and iconography, historian Maurizio Peleggi addresses distinct types of artifacts and artworks as both the products and vehicles of cultural memory. From the temples of Chiangmai to the Emerald Buddha from the National Museum of Bangkok to the prehistoric culture of Northeast Thailand and from the civic monuments of the 1930s to the political artworks of the late twentieth century, even well-known artworks and monuments reveal new meanings when approached from this perspective. Part I, Sacred Geographies, focuses on the premodern era when religious credence informed the cultural alteration of landscape and devotional sites and artifacts, including visual representation of the Buddhist cosmology that were created. Part II, Antiquities, Museums, and National History, covers the 1830s through the 1970s when antiquarianism and eventually archaeology emerged and developed in the kingdom, partly the result of a shift in the elites' worldview and partly a response to colonial and neocolonial projects of knowledge. Part III, Discordant Mnemoscapes, deals with civic monuments and artworks that anchor memory of twentieth-century political events and provide stages for both their commemoration and counter-commemoration by evoking the country's embattled political present. Monastery Monument Museum shows us how cultural memory represents a kind of palimpsest, the result of multiple inscriptions, reworkings, and manipulations over time. The book will be a rewarding read for historians, art historians, anthropologists, and Buddhism scholars working on Thailand and Southeast Asia generally, as well as for academic and general readers with an interest in memory and material culture.

**Peoples of the Buddhist World** Paul Hattaway, 2004  
In the past 20 years, Christians around the world have launched initiatives to reach Muslims, Communists, Hindus, and other major unreached people groups, but the Buddhist world has largely been overlooked. Hundreds of millions of Buddhists continue to live and die without any exposure to the Gospel. In *Peoples of the Buddhist World*, researcher and author Paul Hattaway graphically presents prayer profiles of more than 200 Buddhist people groups around the world, beautifully illustrated with color pictures throughout. In addition, experts have contributed articles on various aspects of Buddhism, helping the reader to learn pray and work until that day when the kingdom of the world has become the kingdom of our Lord and of his Christ, and he will reign for ever and ever. Rev. 11:15. From publisher's description.

*The Heritage Corridor* Denis Byrne, 2021-10-14  
*The Heritage Corridor* argues for a transnational approach to investigating and recording heritage places that emerge from histories of migration. Addressing the material legacy of migration, this book also relates it to issues of contemporary importance. Presenting an image of the built environment of migration as one shaped by the ongoing flows of people, ideas, objects, and money that circulate through migration corridors, Byrne proposes that houses and other structures built by migrants in their home villages in China over the period 1840-1940 should be seen as crystallisations of the labour aspirations and longings enacted and experienced by their builders while overseas. Demonstrating that the material world of the migrant is distributed across transnational space, the book calls for an approach to the heritage of migration that is similarly expansive. It proposes and illustrates new methods and strategies for heritage practice. *The Heritage Corridor* is a

book for scholars and students in the fields of critical heritage studies migration studies and Chinese diasporic mobilities It is designed to be accessible to heritage practitioners readers with an interest in the material worlds of migration past and present and to all those with an interest in the archaeology of transnational migration     Creolization and Diaspora in the Portuguese Indies Stefan Halikowski Smith,2011-09-23 This book examines the sizeable Portuguese community in Ayutthaya the chief river state in Siam during a period in which Portuguese power in the region declined The analysis turns on the creolization and diaspora that affected this community as well as problems with international trade the Christian conversion process and European rivalries     Cold War Monks Eugene Ford,2017-10-24 The groundbreaking account of U S clandestine efforts to use Southeast Asian Buddhism to advance Washington s anticommunist goals during the Cold War How did the U S government make use of a Buddhist policy in Southeast Asia during the Cold War despite the American principle that the state should not meddle with religion To answer this question Eugene Ford delved deep into an unprecedented range of U S and Thai sources and conducted numerous oral history interviews with key informants Ford uncovers a riveting story filled with U S national security officials diplomats and scholars seeking to understand and build relationships within the Buddhist monasteries of Southeast Asia This fascinating narrative provides a new look at how the Buddhist leaderships of Thailand and its neighbors became enmeshed in Cold War politics and in the U S government s clandestine efforts to use a predominant religion of Southeast Asia as an instrument of national stability to counter communist revolution
