Development

and Diffusionism J. Dibia, 2015-12-04 This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development. It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities, Eurocentric diffusionism played a significant role in the failure of development planning. Population and Food in the Early Twenty-first Century Nurul Islam, 1995-01-01 The IFPRI roundtable with its focus on the prospects of a long term balance between food demand and supply provided a link between the two conferences as the adequacy of food supply at affordable prices for future populations is a crucial element in a strategy designed to alleviate poverty and accelerate growth in the context of an increasing population. Media and Technology in Emerging African Democracies Cosmas Uchenna Nwokefor, Kehbema Langmia, 2010-09-02 Media and Technology in Emerging African Democracies is a standard text that will give students an opportunity to familiarize themselves with some of the best literature in media technology impact in emerging African democracies with relevant concentration on information and communication technology ICT. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological. Low income countries are by definition those where such ingredients are missing. None of today's high income countries started its growth process with the required and complete list of growth ingredients. Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated and questioned. This volume, the second of the Oxford Handbook of Africa and Economics, reassesses the economic policies

and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book
