Looking At Senses:

The Senses Fiona Macpherson, 2011-06-09 A Collection of Classic and Contemporary Articles on the Philosophy of the Senses

Ritual, Performance and the Senses Jon P. Mitchell, Michael Bull, 2015-02-26 Ritual has long been a central concept in anthropological theories of religious transmission. *Ritual Performance and the Senses* offers a new understanding of how ritual enables religious representations, ideas, beliefs, values to be shared among participants. Focusing on the body and the experiential nature of ritual, the book brings together insights from three distinct areas of study: cognitive neuroanthropology, performance studies, and the anthropology of the senses. Eight chapters by scholars from each of these sub-disciplines investigate different aspects of embodied religious practice, ranging from philosophical discussions of belief to explorations of the biological processes taking place in the brain itself. Case studies range from miracles and visionary activity in Catholic Malta to meditative practices in theatrical performance, and include three pilgrimage sites: the Church of the Holy Sepulchre in Jerusalem, the festival of Ramlila in Ramnagar, India, and the mountain shrine of the Lord of the Shiny Snow in Andean Peru. Understanding ritual allows us to understand processes at the very centre of human social life and humanity itself, making this an invaluable text for students and scholars in anthropology, cognitive science, performance studies, and religious studies.

Synaesthesia and the Ancient Senses Shane Butler, Alex Purves, 2014-09-03 Like us, the ancient Greeks and Romans came to know and understand the world through their senses. Yet sensory experience has rarely been considered in the study of antiquity, and when the senses are examined, sight is regularly privileged. *Synaesthesia and the Ancient Senses* presents a radical reappraisal of antiquity's textures, flavours, and aromas, sounds, and sights. It offers both a fresh look at society in the ancient world and an opportunity to deepen the reading of classical literature. The book will appeal to readers in classical society and literature, philosophy, and cultural history. All Greek and Latin is translated, and technical matters are explained for the non-specialist. The introduction sets the ancient senses within the history of aesthetics, and the subsequent essays explore the senses throughout the classical period and on to the modern reception of classical literature.

On the Epistemology of the Senses in Early Chinese Thought Jane Geaney, 2002-01-01 By departing from traditional sinological approaches, this method uncovers a detailed picture of certain shared underlying views of sense perception in the Lun Yu, the Mozi, including the Neo-Mohist Canons, the Xunzi, the Mencius, the Laozi, and the Zhuangzi.
