Landscape as Urbanism Charles Waldheim, 2022-03-15 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field s pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of

progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come *Universal Singular* Sonia Curnier, 2022-11-21 A critical introduction to the design of public spaces The way public spaces are designed reflects the period in which they were created However in our globalized world of experience and images the desire for uniqueness tends to achieve the opposite increasingly designers of open spaces resort to the same devices and thereby distance themselves from the urban context The author analyzes ten outstanding contemporary designs of public spaces in Europe in terms of their function in the urban context and what materials are used for their implementation In interviews with the designers she retraces the changes of the concepts during the design stage of the projects underpinning her findings with numerous sketches In addition her research focuses on how the projects were received in the community Learning from designers of outstanding public spaces in Europe Numerous unpublished design sketches A clear guide to urban design Also available in a French edition *Unprecedented Realism* K. Michael Hays, Rodolfo Machado, Jorge Silvetti, 1995 For almost two decades the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials construction function and the cultural role of architecture Yet the conditions they address and the effects they produce are unprecedented Their projects synthesize seemingly incompatible images uses and typologies *Unprecedented Realism* is not an illustration of theory Rather what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge as theoretical research that is still irreducibly architectural *Unprecedented Realism* presents both buildings and urban infrastructures Steps of Providence RI Entrance for Cranbrook Bloomfield Hills Mich Carnegie Mellon University Center Pittsburgh Pershing Square Los Angeles and Times Square New York City Along with the analytic text of K Michael Hays the volume includes critical essays by Alan Colquhoun George Baird Fars el Dahdah and Rodolphe el Khoury please see the Table of Contents

paesaggistico che tende a promuovere nello spazio aperto delle periferie diffuse delle città attuali nuove vie di urbanità e insieme un rinnovato paesaggio in città Stadtlandschaft come visione progettuale che riapre in urbanistica il ritorno dei grandi fattori naturalistici e offre risposte al progetto della complessità metropolitana attraverso l'organizzazione su vasta scala del sistema degli spazi verdi recuperando nei suoi concetti chiave la lezione di un passato interrotto dal funzionalismo quello dell'urbanistica Beaux Arts Si tratta di quattro aspetti chiave il conformarsi alla topografia dei luoghi l'utilizzazione delle aree in maniera che siano naturalisticamente adatte la conservazione e lo sviluppo di tutte le risorse naturali e infine la promozione della bellezza come strutturazione dell'impianto urbano piuttosto che come semplice operazione di arredo

Emanuela Belfiore **Neoliberalism on the Ground** Kenny Cupers, Helena Mattsson, Catharina Gabrielsson, 2020-02-25
Architecture and urbanism have contributed to one of the most sweeping transformations of our times Over the past four decades neoliberalism has been not only a dominant paradigm in politics but a process of bricks and mortar in everyday life Rather than to ask what a neoliberal architecture looks like or how architecture represents neoliberalism this volume examines the multivalent role of architecture and urbanism in geographically variable yet interconnected processes of neoliberal transformation across scales from China Turkey South Africa Argentina Mexico the United States Britain Sweden and Czechoslovakia Analyzing how buildings and urban projects in different regions since the 1960s have served in the implementation of concrete policies such as privatization fiscal reform deregulation state restructuring and the expansion of free trade contributors reveal neoliberalism as a process marked by historical contingency Neoliberalism on the Ground fundamentally reframes accepted narratives of both neoliberalism and postmodernism by demonstrating how architecture has articulated changing relationships between state society and economy since the 1960s Architectural Publications Index ,2003 Islamic Gardens and Landscapes D. Fairchild Ruggles, 2011-12-30 Western admirers have long seen the Islamic garden as an earthly reflection of the paradise said to await the faithful However such simplification Ruggles contends denies the sophistication and diversity of the art form Islamic Gardens and Landscapes immerses the reader in the world of the architects of the great gardens of the Islamic world from medieval Morocco to contemporary India Just as Islamic culture is historically dense sophisticated and complex so too is the history of its built landscapes Islamic gardens began from the practical need to organize the surrounding space of human civilization tame nature enhance the earth's yield and create a legible map on which to distribute natural resources Ruggles follows the evolution of these early farming efforts to their aristocratic apex in famous formal gardens of the Alhambra in Spain and the Taj Mahal in Agra Whether in a humble city home or a royal courtyard the garden has several defining characteristics which Ruggles discusses Most notable is an enclosed space divided into four equal parts surrounding a central design element The traditional Islamic garden is inwardly focused usually surrounded by buildings or in the form of a courtyard Water provides a counterpoint to the portioned green sections Ranging across poetry court documents agronomy manuals and early garden representations and richly illustrated

with pictures and site plans Islamic Gardens and Landscapes is a book of impressive scope sure to interest scholars and enthusiasts alike
