Probability in Social Science S. Goldberg, 2012-12-06 Birkhauser Boston Inc will publish a series of carefully selected monographs in the area of mathematical modeling to present serious applications of mathematics for both the undergraduate and the professional audience Some of the monographs to be selected and published will appeal more to the professional mathematician and user of mathematics serving to familiarize the user with new models and new methods Some like the present monograph will stress the educational aspect and will appeal more to a student audience either as a textbook or as additional reading We feel that this first volume in the series may in itself serve as a model for our program Samuel Goldberg attaches a high priority to teaching students the art of modeling that is to use his words the art of constructing useful mathematical models of real world phenomena We concur It is our strong conviction as editors that the connection between the actual problems and their mathematical models must be factually plausible if not actually real As this first volume in the new series goes to press we invite its readers to share with us both their criticisms and their constructive suggestions

Selected Water Resources Abstracts, 1978-11 **Mathematical Models in Epidemiology** Fred Brauer, Carlos Castillo-Chavez, Zhilan Feng, 2019-10-10 The book is a comprehensive self contained introduction to the mathematical modeling and analysis of disease transmission models It includes i an introduction to the main concepts of compartmental models including models with heterogeneous mixing of individuals and models for vector transmitted diseases ii a detailed analysis of models for important specific diseases including tuberculosis HIV AIDS influenza Ebola virus disease malaria dengue fever and the Zika virus iii an introduction to more advanced mathematical topics including age

structure spatial structure and mobility and iv some challenges and opportunities for the future There are exercises of varying degrees of difficulty and projects leading to new research directions For the benefit of public health professionals whose contact with mathematics may not be recent there is an appendix covering the necessary mathematical background There are indications which sections require a strong mathematical background so that the book can be useful for both mathematical modelers and public health professionals

A Microeconomic Approach to the Measurement of Economic Performance Catherine J. Morrison,2012-12-06 This text is designed to provide a comprehensive guide to students researchers or consultants who wish to carry out and to interpret analyses of economic performance with an emphasis on productivity growth The text includes an overview of standard productivity growth measurement techniques and adaptations and data construction procedures It goes further however by expanding the traditional growth accounting index number framework to allow consideration of how different aspects of firm behavior underlying productivity growth are interrelated how they can be measured consistently in a parametric model and how they permit a well defined decomposition of standard productivity growth measures These ideas are developed by considering in detail a number of underlying theoretical results and econometric issues The impacts of various production characteristics on productivity growth trends are also evaluated by overviewing selected methodological extensions and empirical evidence More specifically in the methodological extensions emphasis is placed on incorporation of cost and demand characteristics such as fixity and adjustment costs returns to scale and the existence of market power into analyses of productivity growth These characteristics generally disregarded in such analyses can have very important impacts on production structure and firm behavior and thus on economic performance They also provide the conceptual basis for vii viii PREFACE measures that are often used independently as indicators of economic performance such as investment capacity utilization and profit measures
