Mathematical Circles, Volume I: In Mathematical Circles: Quadrants I, II, III, IV Howard W. Eves, 2020-08-03 *Mathematical Apocrypha Redux: More Stories and Anecdotes of Mathematicians and the Mathematical* Steven G. It differs from other books of its type in that many of the stories are from the twentieth century and many about currently living mathematicians. A number of the best stories come from the author's first hand experience. The writing is lively, engaging and informative. There are stories the reader may wish to share with students and colleagues, friends and relatives. The purpose of the book is to explore and to celebrate the many facets of mathematical life. The stories reveal mathematicians as intense human and sympathetic. They should resonate with readers everywhere. This book will appeal to students from high school through graduate school to faculty and mathematical scientists of all stripes and also to physicists, engineer and anyone interested in mathematics.

Handbook of the History and Philosophy of Mathematical Practice

Bharath Sriraman, 2024-04-26. The purpose of this unique handbook is to examine the transformation of the philosophy of mathematics from its origins in the history of mathematical practice to the present. It aims to synthesize what is known and what has unfolded so far as well as to explore directions in which the study of the philosophy of mathematics as evident in increasingly diverse mathematical practices is headed. Each section offers insights into the origins, debates, methodologies and newer perspectives that characterize the discipline today. Contributions are written by scholars from mathematics, history and philosophy as well as other disciplines that have contributed to the richness of perspectives abundant in the study of philosophy today who describe various mathematical practices throughout different time periods and contrast them with the development of philosophy. Editorial Advisory Board: Andrew Aberdein, Florida Institute of Technology, USA; Jody Azzouni, Tufts University, USA; Otávio Bueno, University of Miami, USA; William Byers, Concordia University, Canada; Carlo Cellucci, Sapienza University of Rome, Italy; Chandler Davis, University of Toronto, Canada; 1926-2022 Paul Ernest, University of Exeter, UK; Michele Friend, George Washington University, USA; Reuben Hersh, University of New Mexico, USA; 1927-2020 Kyeong Hwa Lee, Seoul National University, South Korea; Yuri Manin, Max Planck Institute for Mathematics, Germany; 1937-2023 Athanase Papadopoulos, University of Strasbourg, France; Ulf Persson, Chalmers University of Technology, Sweden; John Stillwell, University of San Francisco, USA; David Tall, University of Warwick, UK. 1941-2024. This book with its exciting depth and breadth illuminates us about the history, practice and the very language of our subject about the role of abstraction, of proof and manners of proof about the interplay of fundamental intuitions about algebraic thought in contrast to geometric thought. The richness of mathematics and the philosophy encompassing it is splendidly exhibited over the wide range of time these volumes cover from deep Platonic and Neoplatonic influences to the most current experimental approaches. Enriched as well with vivid biographies and brilliant personal essays written by and about people who play an important role in our tradition, this extraordinary collection of essays is fittingly dedicated to the memory of Chandler Davis, Reuben Hersh and Yuri Manin. Barry Mazur, Gerhard Gade, University Professor, Harvard University. This encyclopedic Handbook will be a treat for all those interested in the history and philosophy of mathematics. Whether one is interested in individuals from Pythagoras through Newton and Leibniz to Grothendieck, fields, geometry, algebra, number theory, logic, probability, analysis, viewpoints from

Platonism to Intuitionism or methods proof experiment computer assistance the reader will find a multitude of chapters that inform and fascinate John Stillwell Emeritus Professor of Mathematics University of San Francisco Recipient of the 2005 Chauvenet Prize Dedicating a volume to the memory of three mathematicians Chandler Davis Reuben Hersh and Yuri Manin who went out of their way to show to a broader audience that mathematics is more than what they might think is an excellent initiative Gathering authors coming from many different backgrounds but who are very strict about the essays they write was successfully achieved by the editor in chief The result a great source of potential inspiration Jean Pierre Bourguignon

I, Mathematician Peter Casazza, Steven G. Krantz, Randi D. Ruden, 2015-03-10 Mathematicians have pondered the psychology of the members of our tribe probably since mathematics was invented but for certain since Hadamard's The Psychology of Invention in the Mathematical Field The editors asked two dozen prominent mathematicians and one spouse thereof to ruminate on what makes us different The answers they got are thoughtful interesting and thought provoking Not all respondents addressed the question directly Michael Atiyah reflects on the tension between truth and beauty in mathematics T W Körner Alan Schoenfeld and Hyman Bass chose to write reflectively and thoughtfully about teaching and learning Others including Ian Stewart and Jane Hawkins write about the sociology of our community Many of the contributions range into philosophy of mathematics and the nature of our thought processes Any mathematician will find much of interest here
