Mathematics Of Program Construction 5th International Conference Mpc 2000 Ponte De Lima Portugal July 35 2000 Proceedings:

Mathematics of Program Construction Roland Backhouse, Jose Nuno Oliveira, 2006-12-30 This volume contains the proceedings of MPC 2000 the fifth international conference on Mathematics of Program Construction This series of conferences aims to promote the development of mathematical principles and techniques that are demonstrably useful and usable in the process of constructing computer programs whether implemented in hardware or software The focus is on techniques that combine precision with concision enabling programs to be constructed by formal calculation Within this theme the scope of the series is very diverse including programming methodology program specification and transformation programming paradigms programming calculi and programming language semantics The quality of the papers submitted to the conference was in general very high However the number of submissions has decreased compared to the previous conferences in the series Each paper was refereed by at least five and often more committee members In order to maintain the high standards of the conference the committee took a stringent view on quality this has meant that in some cases a paper was rejected even though there was a basis for a good conference or journal paper but the submitted paper did not meet the committee's required standards In a few cases a good paper was rejected on the grounds that it did not fit within the scope of the conference
