Mathematics in Action - Consortium, 2014-12-24 In the *Mathematics in Action* series students discover mathematical concepts through activities and applications that demonstrate how math applies to their everyday lives. Different from most math books, this series teaches through activities encouraging students to learn by constructing, reflecting on, and applying the mathematical concepts. The user-friendly approach instills confidence in even the most reticent math students and shows them how to interpret data algebraically, numerically, symbolically, and graphically. The active style develops mathematical literacy and critical thinking skills. Updated examples, brand new exercises, and a clearer presentation make the Fifth Edition of this text more relevant than ever to today's students. Note: You are purchasing a standalone product. Instructors: contact your Pearson representative for more information. **Mathematics in Action** Consortium for Foundation Mathematics, 2004-04 This intermediate algebra text, based on standards in the AMATYC Crossroads document, motivates college math students to develop mathematical literacy and a solid foundation for future study in mathematics and other disciplines. This third book of a three-book series presents mathematical concepts and skills through relevant activities derived from real-life situations. These activities are meaningful to students because they illustrate how mathematics arises naturally from real-world situations and problems. The *Mathematics in Action* series is based on the assumption that students learn mathematics best by doing mathematics in a meaningful context. Therefore, the text takes a collaborative approach to learning. Students take an active role in their own learning by working in groups, thereby developing communication skills, a sense of independence, and a can-do attitude about mathematics. Technology is integrated throughout the book so that students learn to interpret real-life data numerically, symbolically, and graphically. This text increases their knowledge of mathematics, their problem-solving skills, and their overall confidence in their ability to learn. **Mathematics in Action 2** Consortium for Foundation Mathematics, CUNY, Pre-Precalculus Group, SUNY, 1998-11 This book empowers students to develop mathematical literacy in the real world and is a solid foundation for future study in mathematics and other disciplines. This first book of a two-book series supports the need for mathematics through real-life applications that are relevant to students. It is filled with real-world situations in which the crucial need for mathematics arises. **Mathematics in Action** For Foundation Mathematics Consortium, 2007-03-01 *Mathematics in Action* Consortium for Foundation
