Buddhism Adrian Snodgrass,1988 Present book surveys and re interprets the vast work of traditional and modern Japanese scholarship on the Twin mandalas **Japanese Mandalas** Elizabeth ten Grotenhuis,1998-11-01 The first broad study of Japanese mandalas to appear in a Western language this volume interprets mandalas as sanctified realms where identification between the human and the sacred occurs The author investigates eighth to seventeenth century paintings from three traditions Esoteric Buddhism Pure Land Buddhism and the kami worshipping Shinto tradition It is generally recognized that many of these mandalas are connected with texts and images from India and the Himalayas A pioneering theme of this study is that in addition to the South Asian connections certain paradigmatic Japanese mandalas reflect pre Buddhist Chinese concepts including geographical concepts In convincing and lucid prose ten Grotenhuis chronicles an intermingling of visual doctrinal ritual and literary elements in these mandalas that has come to be seen as characteristic of the Japanese religious tradition as a whole This beautifully illustrated work begins in the first millennium B C E in China with an introduction to the Book of Documents and ends in present day Japan at the sacred site of Kumano Ten Grotenhuis focuses on the Diamond and Womb World mandalas of Esoteric Buddhist tradition on the Taima mandala and other related mandalas from the Pure Land Buddhist tradition and on mandalas associated with the kami worshipping sites of Kasuga and Kumano She identifies specific sacred places in Japan with sacred places in India and with Buddhist cosmic diagrams Through these identifications the realm of the buddhas is identified with the realms of the kami and of human beings and Japanese geographical areas are identified with Buddhist sacred geography Explaining why certain fundamental Japanese mandalas look the way they do and how certain visual forms came to embody the sacred ten Grotenhuis presents works that show a complex mixture of Indian Buddhist elements pre Buddhist Chinese elements Chinese Buddhist elements and indigenous Japanese elements Esoteric Buddhism and Texts Jinhua Chen,2024-02-08 This book explores trans cultural and cross border transformation of Esoteric Buddhism in East Asia focusing on the significance of Esoteric Buddhism in relation to some forms of material culture including rituals arts and the construction of sacred space and narratives In East Asia Esoteric Buddhism s influences can be seen across all levels of society not only in that it achieved a recognizable sectarian identity but also because elements of esoteric teachings were absorbed by other religious schools influencing their philosophical tenets and everyday practices The influence was not confined to the religious sphere scholars have been paying

more and more attention to the significance of Tang Esoteric Buddhism in relation to material culture and the dissemination of Esoteric Buddhist technologies in South Central and East Asia No matter how one looks at a ma ala an integral feature of esoteric practice or the uncannily expressive statues of Buddhas Bodhisattvas or Yidam that come in all shapes and sizes or the murals that depict the variegated mysterious themes of the esoteric tradition one can always recognise the profound connection between art and Esoteric Buddhism Esoteric Influences also abound in East Asian literature across different genres displaying its unique characters both in poetry and prose Likewise in architecture one can readily make out the enigmatic colorful and distinctive elements characteristic of the esoteric tradition Monks initiated into the esoteric lineages not only brought Buddhist classics and practices to China but also advanced knowledge in astronomy calendrical calculations and mathematical theories The chapters in this volume investigate the profound and far reaching impacts wrought by Esoteric Buddhism on rituals arts and the construction of sacred space and narratives in East Asia This book will be beneficial to advanced students and researchers interested in Religious Studies History and Buddhist studies It was originally published as a special issue of Studies in Chinese Religions

Payne,2018-08-09 Language in the Buddhist Tantra of Japan dismantles the preconception that Buddhism is a

religion of mystical silence arguing that language is in fact central to the Buddhist tradition By examining the use of extraordinary language evocations calling on the power of the Buddha in Japanese Buddhist Tantra Richard K Payne shows that such language was not simply cultural baggage carried by Buddhist practitioners from South to East Asia Rather such language was a key element in the propagation of new forms of belief and practice In contrast to Western approaches to the philosophy of language which are grounded in viewing language as a form of communication this book argues that it is the Indian and East Asian philosophies of language that shed light on the use of language in meditative and ritual practices in Japan It also illuminates why language was conceived as an effective means of progress on the path from delusion to awakening

Journeys East Harry Oldmeadow, 2004-04-28 This is the first book to treat the impact of religious philosophical and psychological traditions of the East on Western intellectuals artists travellers and spiritual seekers in the twentieth century Addressed to both general readers and scholars of religion it is especially valuable for its penetrating and inter religious analysis of two of the most compelling themes now facing the world the emergence of cross cultural religious understanding of the natural order and ecological crisis and the metaphysical basis for both the formal diversity and essential unity of religious traditions of both East and West The West has long romanticized the mysterious East but it has also judged its traditions as uncivilized Our notions about Eastern spirituality have been formed by a succession of travellers scientists artists intellectuals poets philosophers and missionaries as well as by Eastern travellers who have spent time in the West This book helps us to recognize the influence of Eastern ideas upon modern Western thought by tracing the history of engagements between East and West up until the present day It concludes with a section that helps us to perceive the timeless value of the many Eastern contributions to the West's current intellectual and spiritual state

Allegories of Desire Susan Blakely Klein, 2020-10-26 One of the more intriguing developments within medieval Japanese literature is the incorporation into the teaching of waka poetry of the practices of initiation ceremonies and secret transmissions found in esoteric Buddhism The main figure in this development was the obscure thirteenth century poet Fujiwara Tameaki grandson of the famous poet Fujiwara Teika and a priest in a tantric Buddhist sect Tameaki's commentaries and teachings transformed secular texts such as the Tales of Ise and poetry anthologies such as the Kokin waka shu into complex allegories of Buddhist enlightenment These commentaries were transmitted to his students during elaborate initiation ceremonies In later periods Tameaki's specific ideas fell out of vogue but the habit of interpreting poetry allegorically continued This book examines the contents of these commentaries as well as the qualities of the texts they addressed that lent themselves to an allegorical interpretation the political economic and religious developments of the Kamakura period that encouraged the development of this method of interpretation and the possible motives of the participants in this school of interpretation Through analyses of six esoteric commentaries Susan Blakeley Klein presents examples of this interpretive method and discusses its influence on subsequent texts both elite and popular

The Symbolism of the Stupa Adrian Snodgrass, 1992-01-01 In his preface to

The Symbolism of the Stupa Prof Craig Reynolds writes The stupa is a symbolic form that pullulates throughout South Southeast and East Asia In its Indian manifestations it is an extreme case in terms of architectural function it has no usable has a basic simplicity In this state of the art study Adrian Snodgrass reads the stupa as a cultural artifact The monument concretizes metaphysical principles and generates multivalent meanings in ways that can be articulated with literary texts and other architectural forms This study analyses a pattern of interrelated meanings generated by the form of the stupa It does so by reference to myth to ritual and to doctrine viewing the architectural form from within the conceptual framework of the tradition to which it belongs This approach involves questions of aim and methodology A deeper understanding of a symbol is gained by studying the grid or net formed by its symbolic homologues The pattern of meaning that emerges from the juxtaposition of cognate symbols does not exhaust the significance of the symbol which is ultimately beyond worlds but it reinforces its intimations indicating a logical cohesion and integrity which in itself is an intimation of the all pervasiveness of Principle It is precisely this pattern of inter reflection or symbols that this study attempts to delineate By bringing together cognate symbols in apposition it attempts to mark out the field of symbolic interactions which the stupa generates
