Mere Reflection:

The Idea of Form Rodolphe Gasché, 2003 Against the assumption that aesthetic form relates to a harmonious arrangement of parts into a beautiful whole this book argues that reason is the real theme of the Critique of Judgment as of the two earlier Critiques Since aesthetic judgment of the beautiful becomes possible only when the mind is confronted with things of nature for which no determined concepts of understanding are available aesthetic judgment is involved in an epistemological or rather para epistemological task The predicate beautiful indicates that something has minimal form and is cognizable This book explores this concept of form in particular the role of presentation *Darstellung* in what Kant refers to as mere form which involves not only the understanding but also reason as the faculty of ideas Such a notion of form reveals why the beautiful can be related to the morally good On the basis of this reinterpreted concept of form most major concepts and themes of the Critique of Judgment such as disinterestedness free play the sublime genius and beautiful arts are examined by the author and shown in a new light

Kant's Theory of Taste Henry E. Allison, 2001-03-19 This book constitutes one of the most important contributions to recent Kant scholarship In it one of the pre eminent interpreters of Kant Henry Allison offers a comprehensive systematic and philosophically astute account of all aspects of Kant's views on aesthetics The first part of the book analyses Kant's conception of reflective judgment and its connections with both empirical knowledge and judgments of taste The second and third parts treat two questions that Allison insists must be kept distinct the normativity of pure judgments of taste and the moral and systematic significance of taste The fourth part considers two important topics often neglected in the study of Kant's aesthetics his conceptions of fine art and the sublime

Persons and Valuable Worlds Eliot Deutsch, 2001 Convinced that the crisis in contemporary Western philosophy rises from the sundering of moral or value considerations from notions of rationality and the nature of reality Deutsch philosophy U of Hawai i advocates a kind of pluralistic but not relativistic philosophical anthropology ontology ethics and epistemology in a cross cultural context Annotation copyrighted by Book News Inc Portland OR

Altman, 2017-12-11 This remarkably comprehensive Handbook provides a multifaceted yet carefully crafted investigation into the work of Immanuel Kant one of the greatest philosophers the world has ever seen With original contributions from leading international scholars in the field this authoritative volume first sets Kant's work in its biographical and historical context It then proceeds to explain and evaluate his revolutionary work in metaphysics and epistemology logic ethics aesthetics philosophy of science philosophy of religion political philosophy philosophy of history philosophy of education and anthropology Key Features Draws attention to the foundations of Kant's varied philosophical insights transcendental idealism logic and the bridge between theoretical and practical reason Considers hitherto neglected

topics such as sexuality and the philosophy of education Explores the immense impact of his ground breaking work on subsequent intellectual movements Serving as a touchstone for meaningful discussion about Kant's philosophical and historical importance this definitive Handbook is essential reading for Kant scholars who want to keep abreast of the field and for advanced students wishing to explore the frontiers of the subject Time, Duration and Change Franz Bockrath, 2023-11-22 This book studies various perspectives in the history of European philosophy on the relationship between time and movement Ever since the pre Socratic thinker Zeno of Elea linked time and space to understand bodily movement his so called paradoxes of motion have remained unsolved One of his most important critics the French philosopher Henri Bergson criticized the usual connection between time and space and established a new way of understanding time as duration *durée* Whereas Zeno presented an objectivist understanding of time Bergson emphasized its subjectivist meaning Both contradictory positions seem incompatible referring to pure intellect Zeno on the one hand or pure sensation Bergson on the other Looking at Hegel's Phenomenology this book shows that the outer and inner consciousness of time became crucial to his principle of movement and change In his view time is an integral part of dialectical processes that are historically substantiated Hegel sought to subordinate pure concepts and ideas so that they would become indispensable moments of the self knowing spirit Cassirer appreciated the idealism of coming into being but rejected Hegel's concept of the absolute Instead he established his philosophy of symbolic forms in which the development of different perceptions and conceptions of time from situational affective experience to the mathematical system of relations determines the direction of the symbolic formation process In the end the sensitive concept of time is replaced by the relational concept of natural numbers in which all here and now experiences are embedded Finally Bourdieu attempts to reintegrate symbolic forms into social processes The book reflects on the concepts mentioned here by discussing their pros and cons in order to shed more light on the relationship between time and movement in European thought
