Meritocracy And Economic Inequality:

Meritocracy and Economic Inequality Kenneth Arrow, Samuel Bowles, Steven N. Durlauf, 2018-06-26 Most Americans strongly favor equality of opportunity if not outcome but many are weary of poverty's seeming immunity to public policy This helps to explain the recent attention paid to cultural and genetic explanations of persistent poverty including claims that economic inequality is a function of intellectual ability as well as more subtle depictions of the United States as a meritocracy where barriers to achievement are personal either voluntary or inherited rather than systemic This volume of original essays by luminaries in the economic social and biological sciences however confirms mounting evidence that the connection between intelligence and inequality is surprisingly weak and demonstrates that targeted educational and economic reforms can reduce the income gap and improve the country's aggregate productivity and economic well being It also offers a novel agenda of equal access to valuable associations Amartya Sen John Roemer Robert M Hauser Glenn Loury Orley Ashenfelter and others sift and analyze the latest arguments and quantitative findings on equality in order to explain how merit is and should be defined how economic rewards are distributed and how patterns of economic success persist across generations Moving well beyond exploration they draw specific conclusions that are bold yet empirically grounded finding that schooling improves occupational success in ways unrelated to cognitive ability that IQ is not a strong independent predictor of economic success and that people's associations their neighborhoods working groups and other social ties significantly explain many of the poverty traps we observe The optimistic message of this beautifully edited book is that important violations of equality of opportunity do exist but can be attenuated by policies that will serve the general economy Policy makers will read with interest concrete suggestions for crafting economically beneficial anti discrimination measures enhancing educational and associational opportunity and centering economic reforms in community based institutions Here is an example of some of our most brilliant social thinkers using the most advanced techniques that their disciplines have to offer to tackle an issue of great social importance *The Meritocracy Trap* Daniel Markovits, 2019-09-10 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in

order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

The Meritocracy Myth Stephen J. McNamee, Robert K. Miller, 2004-05-03 This book challenges the widely held American belief in meritocracy that people get out of the system what they put into it based predominately on individual merit The book identifies a variety of factors that suppress neutralize or negate the effects of merit creating non merit barriers to individual mobility Visit our website for sample chapters

Justice and the Meritocratic State Thomas Mulligan, 2017-12-12 Like American politics the academic debate over justice is polarized with almost all theories of justice falling within one of two traditions egalitarianism and libertarianism This book provides an alternative to the partisan standoff by focusing not on equality or liberty but on the idea that we should give people the things that they deserve Mulligan sets forth a theory of economic justice meritocracy which rests upon a desert principle and is distinctive from existing work in two ways First meritocracy is grounded in empirical research on how human beings think intuitively about justice Research in social psychology and experimental economics reveals that people simply don t think that social goods should be distributed equally nor do they dismiss the idea of social justice Across ideological and cultural lines people believe that rewards should reflect merit Second the book discusses hot button political issues and makes concrete policy recommendations These issues include anti meritocratic bias against women and racial minorities and the United States widening economic inequality *Justice and the Meritocratic State* offers a new theory of justice and provides solutions to our most vexing social and economic problems It will be of keen interest to philosophers economists and political theorists

Colin Gunton, Tim Keller, and the Trinitarian Challenge to Individualism Steve Pearson, 2025-08-05 In today s market driven world the relationship between faith and work is vital for every Christian in the workforce This book examines how much Christian thinking on the subject needs a radical shift Traditionally the focus has been on how Christians can influence the marketplace often overlooking the profound ways the market shapes our theology With a fresh perspective the book centers on identity contrasting today s individualism with the relational model of the Trinity It argues that the market can erode our Christian identity and distort our theology often without us being aware Through the insights of British theologian Colin Gunton who explored the Trinity s connection to identity and the work of Timothy Keller on faith and work the book reveals a crucial truth our understanding of identity is not relational enough To truly engage meaningfully at the intersection of faith and work our foundational theology must be reframed

Thomas Aquinas and the Civil Economy Tradition Paolo

Santori,2021-05-16 Delving into the history of economic thought this book presents a picture of the Mediterranean spirit of capitalism a tradition that has its protagonists in Thomas Aquinas and the eighteenth century civil economy and seeks to understand its presence and relevance for contemporary societies The book argues that it is reductive to attribute to the Protestant ethic the different formations of capitalism in the Western world Instead it is vital to acknowledge the differences in the ways in which the market is lived enterprises are created and conducted and civic life in general is understood in different regions This thought provoking study demonstrates that in Southern Europe the legacy of Aquinas and the civil economy adds different terms to those recurring in classical and neo classical economy common good reciprocity virtue public trust mutual assistance and public happiness It is these ideas of a market as a place for mutual assistance which can be said to characterize the Mediterranean spirit of capitalism Thomas Aquinas and the Civil Economy Tradition will be of interest to advanced students and researchers in the history of economic thought economic philosophy Christian ethics and moral theology

Race, Poverty, and Domestic Policy C. Michael Henry,2008-10-01 div What explains the continuing hardship of so many black Americans A distinguished group of scholars analyzes the long complex structural and environmental causes of discrimination and their effects on African Americans The authors examine the impact of poverty poor health poor schools poor housing poor neighborhoods and few job opportunities and demonstrate how multiple causes reinforce each other and condemn African Americans to positions of inferiority and poverty Some of the contributors examine policies designed to correct problems while others look at the changing racial and ethnic composition in America and its implications for African Americans as other minorities surpass them in numbers and claim political economic and social attention The late James Tobin has contributed a foreword to this important collection DIV
