MERLEAU-PONTY
ON LANGUAGE AND SOCIAL SCIENCE:
THE DIALECTIC OF PHENOMENOLOGY
AND STRUCTURALISM

INTRODUCTION:

MERLEAU-PONTY AND THE SOCIAL SCIENCES

What is the relation between philosophy and science? For Kant, philosophy

deals with the conditions of possibility and science operates within the conditioned actuality. If one analyzes an existing science philosophically, one begins with its established laws and uses a regressive method that uncovers its conditions of possibility for human subjects. If one seeks to establish a science, one must determine its conditions of possibility for the human subject and employ a progressive method that indicates within what parameters it is to be actualized. While Kant's regressive and progressive methods are not now widely employed, they indicate the necessary relationship between scientific investigation and human cognition. This relationship is important if philosophy of science is to be understood properly, because philosophy of science deals with two very different instances. On the one hand, philosophy of science can pertain to paradigmatic or actual sciences. If a science is paradigmatic, the relationship of philosophy to this science largely concerns the clarification of its concepts. On the other hand, philosophy of science can pertain to non-paradigmatic or emerging sciences. If a science is non-paradigmatic, philosophy addresses the foundation of the potential science. Here, generally speaking, the physical and natural sciences are paradigmatic and the social sciences are non-paradigmatic. Philosophy of the physical and natural sciences has a different purpose from philosophy of the social sciences. Whereas philosophy of the physical and natural sciences is primarily logical, philosophy of the social sciences is largely epistemological in the sense that it seeks to establish the type of knowledge that can be gained of social phenomena.

THE DIALECTIC OF PHENOMENOLOGY

Two points follow from this situation. First, until the method whereby knowledge of social phenomena is established, the logical clarification of social-scientific concepts does not really advance the social sciences. Second, even with the establishment of the social sciences along side the physical and natural sciences, the relationship of scientific investigation to human cognition remains as a relevant philosophical topic. Particularly for the social sciences, the relationship of social phenomena to human cognition is important precisely because social phenomena always carry a reference to human subjects. The social sciences must show not only how cognition of these objects is possible but also how such cognition takes into account both the objectively conditioned social phenomena and the subjective conditions that pertain to the social actors involved. In other words, the social sciences are concerned with both the objective and subjective status of social phenomena.

In this article I wish to address the relevance of the terminology of Merleau-Ponty to the philosophy of the social sciences. However, in order to make this point, I will be focusing for the most part upon his investigations on language *per se*. While his analysis of language does not serve as a complete foundation for the social sciences, it does provide a possible relation to one of the key problems associated with the endeavor to use phenomenology as the foundation for the social sciences. Whether a phenomenological approach to the social sciences is ultimately satisfactory, I submit that Merleau-Ponty's analysis of language bridges the gap between the objective and subjective aspects of social-scientific explanation.

In a more article,¹ I proposed that methodological studies pertaining to social-scientific explanation need to proceed in two directions, viz., toward a more adequate theory of objective probability and a more adequate theory of subjective probability. By objective probability, I refer to the external causal factors determinative of social action insofar as they can be isolated by the social sciences, and by subjective probability I refer to the internal motivations of the social actors involved insofar as they can be determined by the social sciences making the observation. Controlled that social-scientific explanation aims at both the probable objective and subjective determinants of social phenomena. First, I argued that explanation in the social sciences, like explanation in the physical and natural sciences, is refutable to degrees of probability, i.e., no science that is other than partly formal can claim apodicticity for its explanations. Under such conditions,

Merleau Pontys Philosophy Of Language Structuralism And Dialectics 1987:

Merleau-Ponty's Philosophy of Language James M. Edie, 1987 *Merleau-Ponty* Stephen Priest, 2002-11 In this wide ranging and penetrative study Stephen Priest uses clear and direct language to explain the thoughts and ensuing importance of one of the greatest contemporary thinkers Merleau-Ponty and the Art of Perception Duane H. Davis, William S. Hamrick, 2016-03-01 This collection of essays brings together diverse but interrelated perspectives on art and perception based on the philosophy of Maurice Merleau Ponty Although Merleau Ponty focused almost exclusively on painting in his writings on aesthetics this collection also considers poetry literary works theater and relationships between art and science In addition to philosophers the contributors include a painter a photographer a musicologist and an architect This widened scope offers important philosophical benefits testing and providing evidence for the empirical applicability of Merleau Ponty s aesthetic writings The central argument is that for Merleau Ponty the account of perception is also an account of art and vice versa In the philosopher s writings art and perception thus intertwine necessarily rather than contingently such that they can only be distinguished by abstraction As a result his account of perception and his account of art are organic interdependent and dynamic The contributors examine various aspects of this intertwining across different artistic media each ingeniously revealing an original perspective on this intertwining Merleau-Ponty's Phenomenology of Language Dimitris Apostolopoulos, 2019-09-06 Merleau Ponty s status as a philosopher of perception is well established but his distinctive contributions to the philosophy and phenomenology of language have yet to be fully appreciated Through detailed clear and accessible analyses of Merleau Ponty s views of linguistic meaning expression and understanding and by tracing the evolution and development of these views throughout the course of his philosophical career Merleau Ponty s Phenomenology of Language offers a global and comprehensive picture of his engagement with the philosophy of language This book demonstrates that the phenomenology of language is essential for grasping the meaning and motivations behind some of Merleau Ponty s most celebrated philosophical contributions It argues that his philosophy of language should take on a central role in our appraisal of the development and basic goals of his thought And it suggests that the success of phenomenology s return to the things themselves must be judged not only by the evidence of intuition but also by the labour of expression Routledge History of Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchquilt of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl

and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events

Modern Movements in European Philosophy Richard Kearney, 1995-01-15 In this now classic textbook Richard Kearney surveys the work of nineteen of this century's most influential European thinkers The second edition has a new chapter devoted to Julia Kristeva whose work in the fields of semiotics and psychoanalytic theory has made a significant contribution to recent continental thought

Phenomenology or Deconstruction? Christopher Watkin, 2009-03-03 Phenomenology or Deconstruction challenges traditional understandings of the relationship between phenomenology and deconstruction through new readings of the work of Maurice Merleau Ponty Paul Ricur and Jean Luc Nancy A constant dialogue with Jacques Derrida's engagement with phenomenological themes provides the impetus to establishing a new understanding of being and presence that exposes significant blindspots inherent in traditional readings of both phenomenology and deconstruction In reproducing neither a stock phenomenological reaction to deconstruction nor the routine deconstructive reading of phenomenology Christopher Watkin provides a fresh assessment of the possibilities for the future of phenomenology along with a new reading of the deconstructive legacy Through detailed studies of the philosophy of Merleau Ponty Ricur and Nancy he shows how a phenomenological tradition much wider and richer than Husserlian or Heideggerean thought alone can take account of Derrida's critique of ontology and yet still hold a commitment to the ontological This new reading of being and presence fundamentally re draws our understanding of the relation of deconstruction and phenomenology and provides the first sustained discussion of the possibilities and problems for any future deconstructive phenomenology

Thinking between Deleuze and Merleau-Ponty Judith Wambacq, 2018-01-03 Thinking between Deleuze and Merleau Ponty is the first book length examination of the relation between these two major thinkers of the twentieth century Questioning the dominant view that the two have little of substance in common Judith Wambacq brings them into a compelling dialogue to reveal a shared historically grounded concern with the transcendental conditions of thought Both Merleau Ponty and Deleuze propose an immanent ontology differing more in style than in substance Wambacq's synthetic treatment is nevertheless critical she identifies the limitations of each thinker's approach to immanent transcendental philosophy and traces its implications through their respective relationships with Bergson Proust C zanne and Saussure for ontology language artistic expression and the thinking of difference Drawing on primary texts alongside current scholarship in both French and English Thinking between Deleuze and Merleau Ponty is comprehensive and rigorous while remaining clear accessible and lively It is certain

to become the standard text for future scholarly discussion of these two major influences on contemporary thought

Profiles in Contemporary Social Theory Anthony Elliott, Bryan S Turner, 2001-05-18 This comprehensive book provides an indispensable introduction to the most significant figures in contemporary social theory Grounded strongly in the European tradition the profiles include Michel Foucault Jürgen Habermas Roland Barthes Jean Baudrillard Pierre Bourdieu Zygmunt Bauman Martin Heidegger Fredric Jameson Richard Rorty Nancy Chodorow Anthony Giddens Stuart Hall Luce Irigaray and Donna Haraway In guiding students through the key figures in an accessible and authoritative fashion the book provides detailed accounts of the development of the work of major social theorists and charts the relationship between different traditions of social cultural and political thought *Profiles in Contemporary Social Theory* will become a major reference work in the field of social theory because it offers in depth commentaries that comprehensively examine the contents contexts and critical evaluation of key theorists of the day **The Intersubjectivity of Embodiment ,**

web nov 13 2022 define the equilibrium state of a chemical reaction system what is its practical significance state the meaning and significance of the following terms reversible reaction quantitative reaction kinetically inhibited reaction explain the meaning of the statement equilibrium is macroscopically static but microscopically dynamic very

4 1 introduction to chemical equilibrium - Jul 19 2022

web in a chemical equilibrium the forward and reverse reactions occur at equal rates and the concentrations of products and reactants remain constant if we run a reaction in a closed system so that the products cannot escape we often find the reaction does not give a 100 yield of products
