Fundamentals of Convolutional Coding Rolf Johannesson, Kamil Sh. Zigangirov, 2015-08-03 Fundamentals of Convolutional Coding Second Edition regarded as a bible of convolutional coding brings you a clear and comprehensive discussion of the basic principles of this field Two new chapters on low density parity check LDPC convolutional codes and iterative coding Viterbi BCJR BEAST list and sequential decoding of convolutional codes Distance properties of convolutional codes Includes a downloadable solutions manual *Neural Information Processing* Tingwen Huang, Zhigang Zeng, Chuandong Li, Chi Sing Leung, 2012-11-05 The five volume set LNCS 7663 LNCS 7664 LNCS 7665 LNCS 7666 and LNCS 7667 constitutes the proceedings of the 19th International Conference on Neural Information Processing ICONIP 2012 held in Doha Qatar in November 2012 The 423 regular session papers presented were carefully reviewed and selected from numerous submissions These papers cover all major topics of theoretical research empirical study and applications of neural information processing research The 5 volumes represent 5 topical sections containing articles on theoretical analysis neural modeling algorithms applications as well as simulation and synthesis **Information Theory** Jan C. A. Lubbe, 1997-06-19 We live in the information society The main aim of this book is to describe the basic ideas of information theory answering questions such as how may we transmit and store information as compactly as possible what is the maximum quantity of information that can be transmitted by a particular channel or network and how can security be assured It covers all the basic ideas of information theory and sets them in the context of current applications These include Shannon's information measure discrete and continuous information sources and information channels with or without memory source and channel decoding rate distortion theory error correcting codes and the information theoretical approach to cryptology Throughout the book special attention has been paid to multiterminal or network information theory This text will be of use to advanced undergraduates and graduate students in electrical engineering and computer science Vision and Information Processing for Automation A. Browne, L. Norton Wayne, 2013-11-09 Developments in electronic hardware particularly microprocessors and solid state cameras have resulted in a vast explosion in the range and variety of applications to which intelligent processing may be applied to yield cost effective automation Typical examples include automated visual inspection and repetitive assembly The technology required is recent and specialized and is thus not widely known VISION AND INFORMATION PROCESSING FOR AUTOMATION has arisen from a short course given by the authors to introduce potential

users to the technology Its content is a development and extension of material presented in the course The objective of the book is to introduce readers to modern concepts and techniques basic to intelligent automation and explain how these are applied to practical problems Its emphasis is on machine vision Intelligent instrumentation is concerned with processing information and an appreciation of the nature of information is essential in configuring instrumentation to handle it efficiently An understanding of the fundamental principles of efficient computation and of the way in which machines make decisions is vital for the same reasons Selection of appropriate sensing e.g camera type and configuration of illumination of hardware for processing microchip or parallel processor to give most effective information flow and of the most appropriate processing algorithms is critical in obtaining an optimal solution Analysis of performance to demonstrate that requirements have been met and to identify the causes if they have not is also important All of these topics are covered in this volume

Advanced Information Systems Engineering Benkt Wangler, Lars Bergman, 2003-06-29 CAiSE 2000 was the 12th in the series of International Conferences on Advanced Information Systems Engineering In the year 2000 the conference returned to Stockholm where it was organized the very first time Since that year 1989 the CAiSE conferences have developed into an important forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering The objective of the CAiSE conference series is to bring together researchers and practitioners in the field of information systems engineering to meet annually in order to discuss evolving research issues and applications in this field The CAiSE conference series also aims to provide an opportunity for young scientists to establish relationships with senior scientists in their areas of interest Stockholm is an important center of research and development for some of the leading IT and communications companies in Europe and indeed in the world In tune with this environment a major theme of CAiSE 2000 was information systems and services in a digitized world This theme reflects the vast improvements in communication technology including the increasing use of Internet and WWW that has taken place over the last years and that has led to better communication and easier information access in general In addition this development has initiated changes in the way organizations cooperate and trade
