Messerschmitt Me 263:

Messerschmitt Me 263 / Ju 248 Uwe W Jack,2024-03-16 In the 1930s in Germany rocket engines and air breathing jet engines were considered equal means of propulsion for high speed aircraft Alexander Lippisch s Messerschmitt Me 163 was a rocket powered interceptor that could climb vertically at a fantastic rate The initial enthusiasm was later replaced by the realization that this aircraft lacked the necessary range and that landing on a skid made the operation complicated The Messerschmitt company and Alexander Lippisch then developed the improved successor the Me 263 also named Junkers Ju 248 This fighter had everything that could be expected for successful use in the Luftwaffe Its top speed was 1000 km h By the end of the war prototypes had flown and additional aircraft were under construction The Soviet Union was impressed and rebuilt and tested this rocket aircraft as the I 270 A version flew in Great Britain as the De Havilland D H 108 with an air breathing turbine engine Many photos original drawings and descriptions present this unusual fighter aircraft in great detail A publication that should not be missed by anyone interested in the Luftwaffe or aviation technology Please note The eBook version for Kindle is formatted as Print Replica in the same layout as the print version and is not optimally formatted for the Kindle reader [Aircraft of the Luftwaffe, 1935-1945](#) Jean-Denis G.G. Lepage,2009-03-23 One of the most significant innovations in modern warfare has been the appearance and development of air power a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself This book covers the history and development of the German air force from 1935 to 1945 with descriptions and illustrations of almost all of the Luftwaffe s airplanes including fighters jet fighters dive bombers ground attackers medium and heavy bombers jet bombers seaplanes flying boats and carrier planes transport and gliders reconnaissance and training aircrafts helicopters and many futuristic projects and other rarities [Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939-1945](#) Dan Sharp,2020-09-22 Germany s air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt s Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945 by Dan Sharp based on original

Sound Barrier Peter Caygill, 2006-10-30 As the speed of early aircraft gradually increased there eventually became an awareness during the 1940's that strange things were occurring at around 500mph Many later WW2 fighter aircraft were reported to become dangerously uncontrollable in high speed power dives Pilot's and aircraft designers were beginning to encounter the sound barrier We now realize it to be a phenomenon that occurs when the speed of sound is reached and air compressibility demands additional power to break through it Breaking the sound barrier became one of the biggest challenges to the world's aircraft designers and it took great courage and daring for the test pilots of that era to find the way through this difficult obstacle This is the story of how innovative design and pilots learned how to deal with supersonic flight It records the many different experimental aircraft and tells of the experiences of those that flew them Many pilots lost their lives during those dangerous flights but those who survived became legendary
