welcome book Readers can see the faults of simplistic judgments neglect of evidence dismissal of researchers and injudicious implementation From the foreword by Paul Black We all know that small classes are better than large classes that children are best taught in groups according to their ability that some schools are much better than others and that we should teach children according to their individual learning styles or do we This book asks awkward questions about these and many other sacred cows of education Each chapter tackles a persistent myth in education confronting it with research evidence and teasing out any kernel of truth which may underlie the myth Leading authors from the world of education each bring analysis and expertise to bear on their chosen subject presenting their argument in an accessible manner based on sound scholarship Some of the conclusions drawn in Bad Education are likely to be real eye openers for many teachers and parents who will find some of their basic assumptions about education called into question It is also essential reading for anyone involved in educational policy making or management Contributors Philip Adey Mike Anderson Ed Baines Paul Black Peter Blatchford Margaret Brown Guy Claxton Frank Coffield Justin Dillon Julian Joe Elliott Simon Gibbs Jeremy Hodgen Neil Humphrey Annette Karmiloff Smith Bill Lucas Bethan Marshall Brian Matthews Corinne Reid Rob Webster Dylan Wiliam As education policymakers it can be difficult to resist the comfort of our own experience and gut instincts or the lure of populism Bad Education is an invaluable myth buster that tears down common misconceptions and serves up hard facts in their place This is a politically unpalatable guide to the evidence that will challenge policymakers the press and parents alike Dale Bassett Head of Public Policy AQA This book should become a manifesto for change for all of those in education who want to ensure our children do not receive a Bad Education Every Headteacher should buy a copy for every teacher and hopefully somebody might even place a copy under the Secretary of State s Xmas tree Gary Phillips Head Teacher Lilian Bayliss School This is a welcome and important book It takes apart the myths which support the dearly held convictions simplistic assumptions prejudices and irrational certainties of both politicians and teachers Admitting that education is not itself a science but demonstrating how both neuroscience and psychology have become available to inform educational policy and practice it should provide food for more careful and well informed thought to all who can influence what happens in our schools
