Metamorphosis And Identity:

Metamorphosis and Identity Caroline Walker Bynum, 2001-05-06 An exploration of the roles of metamorphosis and hybridity in the establishment of personal identity with particular emphasis on the twelfth and thirteenth centuries The four studies in this book center on the Western obsession with the nature of personal identity Focusing on the twelfth and thirteenth centuries but with an eye toward antiquity and the present Caroline Walker Bynum explores the themes of metamorphosis and hybridity in genres ranging from poetry folktales and miracle collections to scholastic theology devotional treatises and works of natural philosophy She argues that the obsession with boundary crossing and otherness was an effort to delineate nature's regularities and to establish a strong sense of personal identity extending even beyond the grave She examines historical figures such as Marie de France Gerald of Wales Bernard Clairvaux Thomas Aquinas and Dante as well as modern fabulists such as Angela Carter as examples of solutions to the perennial question of how the individual can both change and remain constant Addressing the fundamental question for historians that of change Bynum also explores the nature of history writing itself

Metamorphosis Virginia Lee Somerville, 1978 **Teacher Identity and the Struggle for Recognition** Patrick M. Jenlink, 2014-04-09 Teacher identity is shaped by recognition or its absence often by misrecognition of others Recognition as a teacher or the strong and complex identification with one's professional culture and community is necessary for a positive sense of self Increasingly teachers are entering educational settings where

difference connotes not equal better worse or having more less power over resources Differences between discourses of identity are braided at many points with a discourse of racism both interpersonal and structural Teacher Identity and the Struggle for Recognition examines the nature of identity and recognition as social cultural and political constructs In particular the contributing authors to the book present discussions of the professional work necessary in teacher preparation programs concerned with preparing teachers for the complexities of teaching in schools that mirror an increasingly diverse society Importantly the authors illuminate many of the often problematic structures of schooling and the cultural politics that work to define one's identity drawing into specific relief the nature of the struggle for recognition that all face who choose to enter teaching as a profession

Identity Troubles Anthony Elliott, 2015-10-29 In our turbulent world of global flows and digital transformations pervasive identity crises and self reinvention have become increasingly central to everyday life In this fascinating book Anthony Elliott shows how global transformations the new electronic economy digital worlds biotechnologies and artificial intelligence generate a metamorphosis across the force field of identities today Identity Troubles documents various contemporary mutations of identity from robotics to biomedicine from cosmetic surgery to digital lives and considers their broader social cultural and political consequences Elliott offers a synthesis of the key conceptual innovations in identity studies in the context of recent social theory He critically examines accounts of individualization reflexivity liquidization and new maladies of the soul situating these in wider social and historical contexts and drawing out critical themes He follows with a series of chapters looking at how what is truly new in contemporary life is having profound consequences for identities both private and public This book will be essential reading for undergraduate students in sociology cultural studies political science and human geography It offers the first comprehensive overview of identity studies in the interdisciplinary field of social theory

European Identity and Citizenship Sanja Ivic, 2016-06-08 This book uses a theoretical and empirical approach to explore the philosophies of European citizenship and European identity The author applies a focused analytical framework to argue that European identity and citizenship should be perceived as postmodern categories which are multi layered dynamic and fluid The book offers a detailed review of political and legal studies which do not comprehend or explain postmodernist concepts of citizenship and identity In the theoretical part of the book various philosophical models of citizenship and identity from antiquity to the postmodern era are portrayed and the author's own theory and analytical framework is developed The empirical part of the book discusses a variety of case studies illustrating how European Union policies apply to this framework
