Metaphor And The Logic Of Language Use:

Metaphor and the Logic of Language Use Alan Bailin, 1998-01-01 **The Philosophy and Practice of Medicine and Bioethics** Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one's thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc **The Logic of Metaphor** Eric Steinhart, 2013-06-29 1 Metaphors and Logic Metaphors are among the most vigorous offspring of the creative mind but their vitality springs from the fact that they are logical organisms in the ecology of language I aim to use logical techniques to analyze the meanings of metaphors My goal here is to show how contemporary formal semantics can be extended to handle metaphorical utterances What distinguishes this work is that it focuses intensely on the logical aspects of metaphors I stress the role of logic in the generation and interpretation of metaphors While I don't presuppose any formal training in logic some familiarity with philosophical logic the propositional calculus and the predicate calculus is helpful Since my theory makes great use of the notion of structure I refer to it as the structural theory of metaphor STM STM is a semantic theory of metaphor if STM is correct then metaphors are cognitively meaningful and are nontrivially logically linked with truth I aim to extend possible worlds semantics to handle metaphors I'll argue that some sentences in natural languages like English have multiple meanings Juliet is the sun has at least two meanings the literal meaning Juliet is the sun and the metaphorical meaning Juliet is the sun MET Each meaning is a function from possible worlds to truth values I deny that these functions are identical I deny that the metaphorical function is necessarily false or necessarily true *The Educated Mind* Kieran Egan, 2007-12-01 The Educated Mind offers a bold and revitalizing new vision for today's uncertain educational system Kieran Egan reconceives education taking into account how we learn He proposes the use of particular intellectual tools such as language

or literacy that shape how we make sense of the world These mediating tools generate successive kinds of understanding somatic mythic romantic philosophical and ironic Egan s account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn A carefully argued and readable book Egan proposes a radical change of approach for the whole process of education There is much in this book to interest and excite those who discuss research or deliver education Ann Fullick New Scientist A compelling vision for today s uncertain educational system Library Journal Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read Dr Richard Fox British Journal of Educational Psychology A fascinating and provocative study of cultural and linguistic history and of how various kinds of understanding that can be distinguished in that history are recapitulated in the developing minds of children Jonty Driver New York Times Book Review

The Logic of Invention Roy Wagner, 2019-02-15 In this long awaited sequel to *The Invention of Culture* Roy Wagner tackles the logic and motives that underlie cultural invention Could there be a single logical factor that makes the invention of the distinction between self and other possible much as specific human genes allow for language Wagner explores what he calls the reciprocity of perspectives through a journey between Euro American bodies of knowledge and his in depth knowledge of Melanesian modes of thought This logic grounds variants of the subject object transformation as Wagner works through examples such as the figure ground reversal in Gestalt psychology Lacan s theory of the mirror stage formation of the Ego and even the self recursive structure of the aphorism and the joke Juxtaposing Wittgenstein s and Leibniz s philosophy with Melanesian social logic Wagner explores the cosmological dimensions of the ways in which different societies develop models of self and the subject object distinction The result is a philosophical tour de force by one of anthropology s greatest mavericks

Logical and Computational Aspects of Model-Based Reasoning L. Magnani, N.J. Nersessian, Claudio Pizzi, 2012-12-06 Information technology has been in recent years under increasing commercial pressure to provide devices and systems which help replace the human in his daily activity This pressure requires the use of logic as the underlying foundational workhorse of the area New logics were developed as the need arose and new foci and balance has evolved within logic itself One aspect of these new trends in logic is the rising importance of model based reasoning Logics have become more and more tailored to applications and their reasoning has become more and more application dependent In fact some years ago I myself coined the phrase direct deductive reasoning in application areas advocating the methodology of model based reasoning in the strongest possible terms Certainly my discipline of Labelled Deductive Systems allows to bring pieces of the application areas as labels into the logic I therefore heartily welcome this important book to Volume 25 of the Applied Logic Series and see it as an important contribution in our overall coverage of applied logic

Metaphor and Artificial Intelligence John A. Barnden, Mark G. Lee, 2001-03-01 This special issue arose out of a symposium on metaphor and artificial intelligence in which the main orientation was computational models and psychological processing models of metaphorical understanding The papers in this

issue discuss implemented computational systems for handling different aspects of metaphor understanding how metaphor can be accommodated in accepted logical representational frameworks psychological processes involved in metaphor understanding and the cross linguistic cognitive reality of conceptual metaphors *Metaphorical Metaphysics in Chinese Philosophy* Derong Chen, 2011-08-16 In *Metaphorical Metaphysics in Chinese Philosophy* Illustrated with Feng Youlan's New Metaphysics Derong Chen explores Chinese philosophy through a comprehensive study and critical analysis of Feng Youlan's new metaphysics proposing a systematic analysis of meaning that differs from the approach of the comparative linguistic analysis that A C Graham and Chad Hasen employed in their studies of Chinese philosophy This detailed analysis of Feng Youlan's new metaphysics demonstrates that Feng's system is not the completely Westernized philosophical system many scholars identify it as nor is it the pure logical and analytical system Feng himself intended to construct Rather the essence and characteristics of the new metaphysics at the core of Feng's philosophical system expose his philosophy as a continuation of the Chinese philosophical tradition in a new era This approach is most applicable to scholars of comparative philosophy and of any era of Chinese philosophy Metaphors Dead and Alive, Sleeping and Waking Cornelia Müller, 2009-10-15 Traditional thinking on metaphors has divided them into two camps dead and alive Conventional expressions from everyday language are classified as dead while much rarer novel or poetic metaphors are alive In the 1980s new theories on the cognitive processes involved with the use of metaphor challenged these assumptions but with little empirical support Drawing on the latest research in linguistics semiotics philosophy and psychology Cornelia Müller here unveils a new approach that refutes the rigid dead alive dichotomy offering in its place a more dynamic model sleeping and waking To build this model Müller presents an overview of notions of metaphor from the classical period to the present studies in detail how metaphors function in speech text gesture and images and examines the way mixed metaphors sometimes make sense and sometimes do not This analysis leads her to conclude that metaphors may oscillate between various degrees of sleeping and waking as their status changes depending on context and intention Bridging the gap between conceptual metaphor theory and more traditional linguistic theories this book is a major advance for the field and will be vital to novices and initiates alike **Routledge Handbook of Medicine and Poetry** Alan Bleakley, Shane Neilson, 2024-05-02 The Routledge Handbook of Medicine and Poetry draws on an international selection of authors to ask what the cultures of poetry and medicine may gain from reciprocal critical engagement The volume celebrates interdisciplinary inquiry critique and creative expansion with an emphasis upon amplifying provocative and marginalized voices This carefully curated collection offers both historical context and future thinking from clinicians poets artists humanities scholars social scientists and bio scientists who collectively inquire into the nature of relationships between medicine and poetry Importantly these can be both productive and unproductive How for example do poet doctors reconcile the outwardly antithetical approaches of bio scientific medicine and poetry in their daily work where typically the former draws on technical language and associated

thinking and the latter on metaphors How does non narrative lyrical poetry engage with narrative based medicine How do poets writing about medicine identify as patients Central to the volume is the critical investigation of the consequences of varieties of medical pedagogy for clinical practice Presenting a vision of how poetic thinking might form a medical ontology this thought provoking book affords an essential resource for scholars and practitioners from across medicine health and social care medical education the medical and health humanities and literary studies
