Existence and the Good Franklin I. Gamwell, 2012-01-02 Morals and politics depend on a metaphysical backing All reality is marked by certain necessary features and a divine purpose inherent in all reality defines the good to which all human life should be directed These are bold assertions in a climate where the credibility of metaphysics is widely denied Indeed for the past two centuries Western philosophy has been marked by a consensus that questions about moral and political life should be considered separately from questions about ultimate reality In this challenging work Franklin I Gamwell defends metaphysical necessity against both modern and postmodern critiques The metaphysics vindicated is not the traditional form both critiques typically have in view however Instead Gamwell outlines a neoclassical project for which Alfred North Whitehead and Charles Hartshorne are the main philosophical resources As it maintains the significance of theistic metaphysics the book makes no appeal to religious authority but solely to common human experience and on this basis articulates principles of human purpose and democratic justice

political continuum of violent mobilization utilization and often destruction of human and non human bodies and lives this book will be of interest to graduates and scholars of bio politics international relations and security studies

**Gadamer on Tradition - Historical Context and the Limits of Reflection** Anders Odenstedt, 2017-07-07 This book discusses Gadamer s theory of context dependence Analytical and partly critical the book also shows exegetical accuracy in the rendering of Gadamer s position It explores the following questions that Gadamer s theory of context dependence tries to answer in what way is thought influenced by and thus dependent on its historical context To what extent and in what way is the individual able to

become reflectively aware of and emancipate himself from this dependence The book takes Gadamer s wide interests into account e g issues relating to the history of historiography and the nature of art and aesthetic experience The problem of the context dependence of thought is prominent in contemporary philosophy including the fields of structuralism post structuralism deconstruction certain forms of feminist philosophy and the philosophy of science In this sense the book discusses an issue with wide repercussions      The Metaphysics of Evolution Thomas Whittaker,1928
