Metaphysics Of Free Will An Essay On Control

Randolph Clarke, Randolph K. Clarke

Metaphysics Of Free Will An Essay On Control:

The Metaphysics of Free Will John Martin Fischer, 1994-01-01 In this text Fischer argues that although we naturally assume that we have control of our behaviour and are morally responsible agents the assumption that we have this sort of control can be called into question Arguments can be made that if say causal determinism obtains or God exists we lack this sort of control And it is not absolutely evident that causal determinism is false and God does not exist Thus some of the most important and fundamental features of our lives can be put in doubt *Four Views on Free Will* John Martin Fischer, Robert Kane, Derk Pereboom, Manuel Vargas, 2009-02-04 Focusing on the concepts and interactions of free will moral responsibility and determinism this text represents the most up to date account of the four major positions in the free will debate Four serious and well known philosophers explore the opposing viewpoints of libertarianism compatibilism hard incompatibilism and revisionism The first half of the book contains each philosopher's explanation of his particular view the second half allows them to directly respond to each other's arguments in a lively and engaging conversation Offers the reader a one of a kind interactive discussion Forms part of the acclaimed Great Debates in Philosophy series **The Metaphysics of Free Will** John Martin Fischer, 1995-10-09 The Metaphysics of Free Will provides a thorough statement of the major grounds for skepticism about the reality of free will and moral responsibility The author identifies and explains the sort of control that is associated with personhood and accountability and shows how it is consistent with causal determinism In so doing our view of ourselves as morally responsible agents is protected against the disturbing changes posed by science and religion *Four Views on Free Will* John Martin Fischer, 2007-07-30 Four philosophers explore the opposing viewpoints of libertarianism compatibilism hard incompatibilism and revisionism The first half of the book contains each philosopher's explanation of his particular view the second half allows them to directly respond to each other's arguments *Essays on Free Will and Moral Responsibility* Daniel Cohen, Nick Trakakis, 2009-05-05 The problem of free will has fascinated philosophers since ancient times Do we have free will or at least the kind of free will that seems necessary for moral responsibility Does determinism threaten the idea that everything that happens is necessitated to happen given the past and the laws of nature threaten the commonly held assumption that we are indeed free and morally responsible Although these questions have been widely discussed in the past the present volume offers a variety of new perspectives from philosophers who have made significant contributions to this debate over recent years including Derk Pereboom Robert Kane Ishtiyaque Haji Michael McKenna John Martin Fischer David Widerker and Saul Smilansky The emphasis in these essays is not merely on free will but on allied notions such as moral responsibility moral obligation fairness and meaningfulness and on whether any room can be made for these notions in a deterministic or an indeterministic universe **The Oxford Handbook of Free Will** Robert Kane, 2011-07-27 This second edition of the Oxford Handbook of Free Will is intended to be a sourcebook and guide to current work on free will and related subjects Its focus is on writings of the past forty years in which there has been a resurgence of interest in traditional issues

about the freedom of the will in the light of new developments in the sciences philosophy and humanistic studies Special attention is given to research on free will of the first decade of the twenty first century since the publication of the first edition of the Handbook All the essays have been newly written or rewritten for this volume In addition there are new essayists and essays surveying topics that have become prominent in debates about free will in the past decade including new work on the relation of free will to physics the neurosciences cognitive science psychology and empirical philosophy new versions of traditional views compatibilist incompatibilist libertarian etc and new views e g revisionism that have emerged The twenty eight essays by prominent international scholars and younger scholars cover a host of free will related issues such as moral agency and responsibility accountability and blameworthiness in ethics autonomy coercion and control in social theory criminal liability responsibility and punishment in legal theory issues about the relation of mind to body consciousness and the nature of action in philosophy of mind and the cognitive and neurosciences questions about divine foreknowledge providence and human freedom in philosophy of religion and general metaphysical questions about necessity and possibility determinism time and chance quantum reality causation and explanation

Free Will and Moral Responsibility Justin Caouette, Ishtiyaque Haji, 2013-10-03 Determinism is roughly the thesis that facts about the past and the laws of nature entail all truths A venerable age old dilemma concerning responsibility distils to this if either determinism is true or it is not true we lack responsibility grounding control Either determinism is true or it is not true So we lack responsibility grounding control Deprived of such control no one is ever morally responsible for anything A number of the freshly minted essays in this collection address aspects of this dilemma Responding to the horn that determinism undermines the freedom that responsibility or moral obligation requires the freedom to do otherwise some papers in this collection debate the merits of Frankfurt style examples that purport to show that one can be responsible despite lacking alternatives Responding to the horn that indeterminism implies luck or randomness other papers discuss the strengths or shortcomings of libertarian free will or control Also included in this collection are essays on the freedom requirements of moral obligation forgiveness and free will a desert free conception of free will and vicarious legal and moral responsibility The authors of the essays in this volume are philosophers who have made significant contributions to debates in free will moral responsibility moral obligation the reactive attitudes philosophy of action and philosophical psychology and include John Martin Fischer Robert Kane Michael McKenna Alfred Mele and Derk Pereboom

Libertarian Accounts of Free Will Randolph Clarke, Randolph K. Clarke, 2005-12-08 This comprehensive study offers a balanced assessment of libertarian accounts of free will Bringing to bear recent work on action causation and causal explanation Clarke defends a type of event causal view from popular objections concerning rationality and diminished control He subtly explores the extent to which event causal accounts can secure the things for the sake of which we value free will judging their success here to be limited Clarke then sets out a highly original agent causal account one that integrates agent causation and nondeterministic event causation He

defends this view from a number of objections but argues that we should find the substance causation required by any agent causal account to be impossible Clarke concludes that if a broad thesis of incompatibilism is correct one on which both free will and moral responsibility are incompatible with determinism then no libertarian account is entirely adequate

Four Views on Free Will John Martin Fischer, Robert Kane, Derk Pereboom, Manuel Vargas, 2024-02-12 A lively and engaging debate between four representative views on free will completely revised and updated with new perspectives Four Views on Free Will is a robust and careful debate about free will how it interacts with determinism and indeterminism and whether we have it or not Providing the most up to date account of four major positions in the free will debate the second edition of this classic text presents the opposing perspectives of renowned philosophers John Martin Fischer Robert Kane Derk Pereboom and Manuel Vargas Substantially revised throughout this new volume contains eight in depth chapters almost entirely rewritten for the new edition in which the authors state their different positions on the debate offer insights into how their views have evolved over the past fifteen years respond to recent critical literature in the field and interact and engage with each other in dialogue In the first four chapters the authors defend their distinctive views about free will libertarianism compatibilism hard incompatibilism and revisionism The subsequent four chapters consist of direct replies by each of the authors to the other three Offering a one of a kind interactive conversation about the most recent work on the subject Four Views on Free Will Second Edition provides a balanced and enlightening discussion on all the key concepts and conflicts in the free will debate Part of the acclaimed Great Debates in Philosophy series it remains essential reading for undergraduate and graduate students lecturers and scholars in philosophy ethics free will philosophy of mind political philosophy law and related subjects

Causation and Free Will Carolina Sartorio, 2016-03-03 Carolina Sartorio argues that only the actual causes of our behaviour matter to our freedom Although this simple view of freedom clashes with most theories of responsibility including the most prominent actual sequence theories currently on offer Sartorio argues for its truth The key she claims lies in a correct understanding of the role played by causation in a view of that kind Causation has some important features that make it a responsibility grounding relation and this to the success of the view Also when agents act freely the actual causes are richer than they appear to be at first sight in particular they reflect the agents sensitivity to reasons where this includes both the existence of actual reasons and the absence of other counterfactual reasons So acting freely requires more causes and quite complex causes as opposed to fewer causes and simpler causes and is compatible with those causes being deterministic The book connects two different debates the one on causation and the one on the problem of free will in new and illuminating ways
