Kronk, 1999 Cometography is a catalog of every comet observed throughout history It is the most complete and comprehensive collection of data on comets available Cometography comes in four sequential volumes and this the first covers ancient times through to the end of the eighteenth century Cometography uses the most

reliable orbits known to determine all the key parameters of each well observed comet Cometography also provides non technical details to help the reader understand how the comet may have influenced various cultures at the time of its appearance All the information in Cometography has been sourced directly from the original documents including European monastic histories Roman Greek and Muslim texts Chinese Japanese and Korean scripts In many cases dates of important historical events can be corrected based on the appearance of a comet In this way Cometography will be valuable to historians of science as well as providing amateur and professional astronomers with a definitive reference on comets through the ages

Cometography: Volume 6, 1983-1993 Gary W. Kronk, Maik Meyer, David A. J. Seargent, 2017-04-20
Cometography is a multi volume catalog of every comet observed from ancient times up to the 1990s when the internet took off as a medium of scientific record It uses the most reliable orbits known to determine the distances from the Earth and Sun at the time of discovery and last observation as well as the largest and smallest angular distance to the Sun most northerly and southerly declination closest distance to the Earth and other details to enable the reader to understand each comet s physical appearance Volume 6 the final volume in the catalog covers the observations and pertinent calculations for every comet seen between 1983 and 1993 The comets are listed in chronological order with complete references to publications relating to each comet and physical descriptions of each comet s development throughout its apparition Cometography is the definitive reference on comets through the ages for astronomers and historians of science

Cometography: Volume 5, 1960-1982 Gary W. Kronk, Maik Meyer, 1999 Definitive reference on comets seen from 1960 to 1982 for amateur and professional astronomers and historians of science

Cometography: Volume 2, 1800-1899 Gary W. Kronk, 1999
Cometography is a four volume catalog of every comet observed throughout history Volume II provides a complete discussion of every comet seen during the nineteenth century Cometography uses the most reliable orbits known to determine the distances from the Earth and Sun at the time a comet was discovered and last observed as well as the largest and smallest angular distance to the Sun most northerly and southerly declination closest distance to the Earth and other details to enable the reader to understand the physical appearance of each well observed comet The book also provides non technical details to help the reader better appreciate how the comet may have influenced various cultures at the time of its appearance Cometography will be valuable to historians of science as well as providing amateur and professional astronomers with a definitive reference on comets through the ages
