Methodological Issues In Accessibility Special Issue Of Journal Of Transportation And Statistics

Claude Comtois, Brian Slack

Methodological Issues In Accessibility Special Issue Of Journal Of Transportation And Statistics:

Methodological Issues in Accessibility Jeffrey Prey, 2001-07 The concept of accessibility is fundamental to urban and regional transportation analysis Because of the increasing complexity of transportation systems and their impact on our quality of life accessibility based ideas must become an integral part of transportation planning and evaluation The papers in this special issue of the Journal of Transportation and Stat reflect the diverse considerations that must be taken into account in developing means to measure accessibility Papers address conceptual issues in defining and measuring accessibility some target the development of applications tools while others focus on empirical examples of accessibility measures Charts and tables *Journal of Transportation and Statistics* ,2000

The Geography of Transport Systems Jean-Paul Rodrigue, Claude Comtois, Brian Slack, 2013-07-18 Mobility is fundamental to economic and social activities such as commuting manufacturing or supplying energy Each movement has an origin a potential set of intermediate locations a destination and a nature which is linked with geographical attributes Transport systems composed of infrastructures modes and terminals are so embedded in the socio economic life of individuals institutions and corporations that they are often invisible to the consumer This is paradoxical as the perceived invisibility of transportation is derived from its efficiency Understanding how mobility is linked with geography is main the purpose of this book The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of transportation This text provides greater discussion of security energy green logistics as well as new and updated case studies a revised content structure and new figures Each chapter covers a specific conceptual dimension including networks modes terminals freight transportation urban transportation and environmental impacts A final chapter contains core methodologies linked with transport geography such as accessibility spatial interactions graph theory and Geographic Information Systems for transportation GIS T This book provides a comprehensive and accessible introduction to the field with a broad overview of its concepts methods and areas of application The accompanying website for this text contains a useful additional material including digital maps PowerPoint slides databases and links to further reading and websites The website can be accessed at <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography as well as those interest in economic and urban geography transport planning and engineering

The Geography of Transport Systems Claude Comtois, Brian Slack, 2009-05-18 Covering methodologies linked with transport geography and addressing networks modes terminals international and urban transportation and environmental impacts this key book provides a comprehensive introduction to this important field

Urban Transport in the Developing World Harry T. Dimitriou, Ralph Gakenheimer, 2011-01-01 Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability These challenges include coping with financial deficits providing for the poor dealing

meaningfully with global warming and energy shortages addressing traffic congestion and related land use issues adopting green technologies and adjusting equitably to the impacts of globalisation This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn *Mobility 2030* ,2004
