My Green Animal:

The Law of Animals John Hall Ingham, 2003 *Animal-Assisted Therapy in Counseling* Cynthia K. Chandler, 2024-05-08

The fourth edition of *Animal Assisted Therapy in Counseling* is the most comprehensive book available dedicated to training mental health practitioners in the performance of animal assisted therapy in counseling. This edition includes material on real world animal assisted interventions featuring counselor client dialogues and sample therapeutic opportunities. Each chapter includes the most recent research and practice and a wide variety of case examples present animal assisted interventions in different settings with different types of animals. This unique resource is an indispensable guide for any counselor or psychotherapist looking to develop and implement animal assisted therapy techniques in practice. Wildlife Trade and

Animal Victimization Ragnhild Aslaug Sollund, 2025-03-31 This book examines the trade in nonhuman animals of endangered wild species. Wildlife trafficking is after loss of habitat the biggest threat to many animal species and biodiversity. This book draws on extensive empirical data from Norway to highlight the parallel legal and illegal markets, the motivation of traders, animal victimization, the weaknesses of existing regulatory frameworks and the difficulties of legal enforcement. As a long time signatory of the Convention on International Trade in Endangered Species of Wild Fauna and Flora and a rich consumer country, Norway provides the perfect case for investigating the consequences of legalising or banning wildlife trade. The work applies a green non-speciesist theoretical perspective to analyse empirical data covering approximately 350 cases as well as qualitative interviews with law enforcement agencies and confiscation reports from customs. The book will be an essential resource for researchers and academics in green criminology, global criminology, environmental law and environmental studies. It will also be of value to professionals working in wildlife and animal welfare policies and enforcement such as governmental and non-governmental organizations. The Animals' Freedom Fighter Jon Hochschartner, 2017-04-24

Founded in the 1970s and today active in more than 40 countries, the Animal Liberation Front has in recent years been considered a domestic terrorist group by both the FBI and the Southern Poverty Law Center despite the ALF's official stance of nonviolence. A clandestine phantom cell organization, the ALF has functioned as a sort of Underground Railroad for captive animals, executing raids and attacks on animal testing facilities. Yet little has been written about the group or its founder. With unprecedented access by the author, this book tells the story of Ronnie Lee, the unassuming British activist who launched an extremist movement that continues to use intimidation and economic sabotage to advance its cause. *Committee Prints on Administration Legislative Proposals on the Animal Drug User Fee Act Amendments of 2008 and the Animal Generic Drug User Fee Act of 2008* United States. Shrimp and Prawn Welfare in the Wild-Caught Fishing Industry Ren Ryba, Shannon M Davis, Tse Yip Fai, Peter Singer, 2025-09-26. At 37 trillion individuals per year, wild-caught shrimp and prawns appear to be the single most numerous group of animals directly killed for human food consumption on the planet. Recent scientific developments suggest that at least some species of shrimp are sentient beings, and should that be the case, there is a need for policies that could improve shrimp welfare. This book delves into the ethical implications of the probability that shrimp and prawns are capable of feeling pain and the welfare policies that could be adopted. It looks at global shrimp fisheries and their different animal welfare concerns, from the largest industrial trawlers in developed and developing countries to small-scale fisheries in developing countries. The authors provide a new dataset of the estimated numbers of individual shrimp caught by country and species, using this to describe the shrimp fishing industry in the world's top 30 countries by estimated catch. Examining recent developments in government and industry policy, the book suggests ways that policymakers could improve wild-caught shrimp welfare, from installing electrical stunning equipment in large-scale trawl fisheries to improving supply chain practices in small-scale fisheries. It provides a roadmap for future research and policy to address this urgent emerging challenge. This book's data visualisations and roadmap will empower researchers, NGOs, and policymakers to focus their efforts on the most impactful and evidence-based solutions for improving aquatic animal welfare.
