Central Library and Documentation Branch, 1982 **Story Sorcery** Belinda Nell, 2025-08-22 Ever wondered why your brilliant marketing campaigns land with all the grace of a giraffe on roller skates Welcome to the delightfully twisted world where neuroscience meets marketing and your customer's brain becomes your secret weapon ethically of course Story Sorcery reveals the shocking truth whilst you've been crafting logical arguments about features and benefits your customer's brains have already decided whether they fancy you or not In roughly 13 milliseconds That's faster than it takes you to realise you've put odd socks on Drawing from cutting edge research at Harvard MIT and Stanford this book exposes the beautiful chaos happening inside every customer's head You'll discover why 95% of purchasing decisions happen unconsciously how stories literally rewire listener's brains and why Pepsi's Kendall Jenner advert became a 6 billion lesson in what not to do Inside this brain bending journey you'll learn Why your reptilian brain acts like the world's most paranoid bouncer How to speak to all three brains in your customer's head yes they have three The neuroscience behind why people queue for hours to buy things they could order online Ethical influence techniques that make customers thank you instead of tolerate you Why that visual information is processed 60 000 times faster than text statistic is complete bollocks Perfect for Marketers tired of shouting into the digital void Business owners who want customers to actually listen Anyone curious about why humans make beautifully irrational decisions People who enjoy science served with a generous helping of wit This isn't about manipulation it's about communication that works with human nature instead of wrestling against it Because understanding minds isn't just good business it's good karma Warning May cause sudden clarity about why your previous marketing felt like performing Shakespeare to a room full of goldfish *Multidisciplinary Design Optimization of Complex Structures Under Uncertainty* Debiao Meng, Shun-Peng Zhu, 2024-09-02 In the realm of engineering structures design the inevitability of uncertainties poses a significant challenge Uncertainty Based Multidisciplinary Design and Optimization UBMDO stands out for its dual ability to precisely quantify the impact of uncertain variables and harness the potential of multidisciplinary design and optimization thereby attracting considerable attention From basic theory to advanced applications this book helps readers achieve more efficient and reliable design optimization in complex systems through rich case studies and practical technical guidance The book systematically expounds the fundamental theories and methods of UBMDO encompassing crucial techniques such as uncertainty modeling sensitivity analysis approximate modeling and uncertainty based optimization It also introduces various uncertainty analysis methods such as stochastic non probabilistic and hybrid approaches aiding readers in comprehending and managing uncertainty within systems Through diverse practical engineering cases in fields
