Howitt, 1986-01-15 *Perspectives on Management Capacity Building* provides a lively spectrum of views on the problems and prospects of improving the management and performance of municipal governments in the United States. Leading specialists in public administration probe the management needs of local governments and explore ways in which they can improve their capacity to manage. Today state and local governments are caught in the transition between the expansionism of the post World War II years and the retrenchment era of the late seventies and eighties. Improved management capacity has emerged as the most effective way for local governments to ride out the economic and political pressures confronting them. This book first investigates the meaning of the term management capacity. It then considers how management needs have changed in the post war period and how these needs vary among large cities, suburbs, and rural communities. Two of the contributions explore the organizational politics of management improvement, while others look at the functional areas of computers and financial management. The book also addresses human resource problems such as labor relations, management development, and training of municipal legislators and concludes with several viewpoints on federal efforts to improve local management capacity *Financial Management for Local Governments*, 1991 *Financial Management for Human Service Administrators* Lawrence L. Martin, 2021-04-05 The second edition of Martin's practical text continues to provide a solid grounding of financial management for human services and social work students and professionals while maintaining a concise and approachable style. Starting with a foundation of the basics of financial management, a comprehensive overview includes topics such as budgeting, systems, financial accounting, and the interpretation and analysis of financial statements, performance measures, forecasting of revenues, expenses, and caseloads, fee setting, government contracts and grants, fund development, risk management, and auditing. Readers apply the concepts, principles, and tools introduced in each chapter through case studies and exercises that encourage mastery of the content in real world situations *Eurasian Economic Perspectives* Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, 2020-09-28 This book presents selected papers from the 26th and 27th Eurasia Business and Economics Society (EBES) Conferences held in Prague, Czech Republic, and Bali, Indonesia. While the theoretical and empirical papers gathered here cover diverse areas of economics and finance in various geographic regions, the main focus is on the latest research concerning banking and finance, as well as empirical studies on emerging economies and public economics. The book also includes studies on political economy and regional studies *IT Financial Management* Maxime Sottini, 2017-01-01 It is now accepted that IT functions are a fundamental part of the competitive business model.
