Reform Of Time Magic And Modernity:

The Reform of Time Maureen Perkins, 2001-03-20 Perkins communication and cultural studies Curtin U of Technology challenges the idea that the decline of magic is the result of the rise of scientific knowledge and the spread of education She argues that 19th century marginalization of superstition is part of a social history of time management In the course of her discussion she relates differing concepts of time to colonial discourse surveys technological developments in the calculation of time and assesses the role of popular beliefs in astrology books of fate and prophetic dreaming Distributed by Stylus Annotation copyrighted by Book News Inc Portland OR Making Magic Randall Styers, 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a definitively non modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In *Making Magic* Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world **The Magical Imagination** Karl Bell, 2012-02-23 Innovative history of the popular magical imagination and ordinary people's experience of urbanization in nineteenth century England *Magical Thinking* Stuart McWilliams, 2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present On Time On Barak, 2013-07-19 In this pioneering history of transportation and communication in the modern Middle East On Barak argues that contrary to accepted wisdom technological modernity in Egypt did not drive a sense of time focused on standardization only Surprisingly the introduction of the steamer railway telegraph tramway and telephone in colonial Egypt actually triggered the development of unique timekeeping practices that resignified and subverted the typical modernist infatuation with expediency and promptness These countertempos predicated on uneasiness over dehumanizing European standards of efficiency sprang from and contributed to non linear modes of arranging time Barak shows how these countertempos formed and developed with each new technological innovation during the nineteenth and early twentieth centuries contributing to a particularly Egyptian sense of time that extends into the

present day exerting influence over contemporary political language in the Arab world The universal notion of a modern mechanical standard time and the deviations supposedly characterizing non Western settings from time immemorial On Time provocatively argues were in fact mutually constitutive and mutually reinforcing The colonisation of time Giordano Nanni,2020-10-20 The Colonisation of Time is a highly original and long overdue examination of the ways that western European and specifically British concepts and rituals of time were imposed on other cultures as a fundamental component of colonisation during the nineteenth century Based on a wealth of primary sources it explores the intimate relationship between the colonisation of time and space in two British settler colonies Victoria Australia and the Cape Colony South Africa and its instrumental role in the exportation of Christianity capitalism and modernity thus adding new depth to our understanding of imperial power and of the ways in which it was exercised and limited All those intrigued by the concept of time will find this book of interest for it illustrates how western European time s rise to a position of global dominance from the clock to the seven day week is one of the most pervasive enduring and taken for granted legacies of colonisation in today s world *Time, work and leisure* Hugh Cunningham,2016-05-16 This book traces the history of the relationship between work and leisure from the leisure preference of male workers in the eighteenth century through the increase in working hours in the later eighteenth and early nineteenth centuries to their progressive decline from 1830 to 1970 It examines how trade union action was critical in achieving the decline how class structured the experience of leisure how male identity was shaped by both work and leisure how in a society that placed high value on work a leisured class was nevertheless at the apex of political and social power until it became thought of as the idle rich Coinciding with the decline in working hours two further tranches of time were marked out as properly without work childhood and retirement Accessible wide ranging and occasionally polemical this book provides the first history of how we have imagined and used time Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen,2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large *The Cambridge History of Magic and Witchcraft in the West* David J. Collins, S. J.,2015-03-02 This book presents twenty chapters by experts in their

fields providing a thorough and interdisciplinary overview of the theory and practice of magic in the West Its chronological scope extends from the Ancient Near East to twenty first century North America its objects of analysis range from Persian curse tablets to US neo paganism For comparative purposes the volume includes chapters on developments in the Jewish and Muslim worlds evaluated not simply for what they contributed at various points to European notions of magic but also as models of alternative development in ancient Mediterranean legacy Similarly the volume highlights the transformative and challenging encounters of Europeans with non Europeans regarding the practice of magic in both early modern colonization and more recent decolonization

Shaping the Day Paul Glennie, Nigel Thrift, 2009-02-12 Timekeeping is an essential activity in the modern world and we take it for granted that our lives are shaped by the hours of the day Yet what seems so ordinary today is actually the extraordinary outcome of centuries of technical innovation and circulation of ideas about time Shaping the Day is a pathbreaking study of the practice of timekeeping in England and Wales between 1300 and 1800 Drawing on many unique historical sources ranging from personal diaries to housekeeping manuals Paul Glennie and Nigel Thrift illustrate how a particular kind of common sense about time came into being and how it developed during this period Many remarkable figures make their appearance ranging from the well known such as Edmund Halley Samuel Pepys and John Harrison who solved the problem of longitude to less familiar characters including sailors gamblers and burglars Overturning many common perceptions of the past for example that clock time and the industrial revolution were intimately related this unique historical study will engage all readers interested in how telling the time has come to dominate our way of life
